Accessible Education in Russia for Vietnamese Citizens

Vietnam-Russia relations have a long-standing and glorious history. Today, international bilateral relations focus on scientific and technological development and improvement of the education systems as well as achievement of social and economic objectives of the two states. Vladimir Murashkin, Head of the Russian House in Hanoi, talks about cooperation in education and the opportunities for Vietnamese applicants.

 **Russian House
in Hanoi, Telegram**

Russia is one of Vietnam's key partners in education and science and technology cooperation. It provides ample opportunities for training highly qualified Vietnamese specialists. A large part of the Vietnamese political elite and intellectuals got their education in the Soviet Union and Modern Russia. Such a situation, in combination with territorial proximity, makes education in Russia attractive to a great number of young people who are still planning their future.

OUTSTANDING VIETNAMESE GRADUATES OF SOVIET AND RUSSIAN UNIVERSITIES

Phạm Tuân – the first Vietnamese cosmonaut, Hero of the Soviet Union, graduate of Gagarin Air Force Academy.

Chan Dang Khoa – Vice President of the Association of Vietnamese Writers, graduate of Maxim Gorky Literature Institute in Moscow. He is the author of 12 books of poems, four volumes of short stories and novels, and a literary criticism article.

Nguyen Van An – Chairman of the National Assembly of the Socialist Republic of Vietnam (2001-2006).

Nguyen Dang Phat – Secretary General of the Vietnam – Russia Friendship Association, graduate of Moscow State University.

The number and quality of educational programs delivered by Russian universities is so high that applicants are spoiled for choice and can choose any field of study, from ballet to space. Such fields of study as **economics, medicine, IT, a wide range of engineering specialties** are most popular among Vietnamese applicants. Creative fields of study such as painting and singing are also in high demand.

To date, more than 3,000 Vietnamese citizens are studying in Russia. This figure will be on the increase in the foreseeable future because the national economy's demand for personnel for high-tech industries of the national economy will remain high.

Vietnamese citizens can study at Russian university on a fee-paying basis. The cost of educational programs is considerably lower than at European and US universities.

Dang Minh Khoi – Ambassador Extraordinary and Plenipotentiary of the Socialist Republic of Vietnam in the Russian Federation

Education is one of the control points in Russia-Vietnam cooperation. Your country has helped us train more than 10,000 highly qualified specialists. Many graduates have taken top leadership positions in Vietnam, such as the positions of Prime Minister, Secretary General, heads of ministries and government agencies. Many of them work in such important fields as the oil and gas industry and atomic engineering.

The Russian Government allocates one of the biggest quotas to citizens of the Socialist Republic of Vietnam to study in Russia. For the 2024/2025 academic year, 1,000 quota places were allocated to Vietnamese citizens.

To participate in the competitive selection to get a quota place from the Russian Government to study in Russia, Vietnamese candidates must fill in the application form and submit all required documents on the portal **“Education in the Russian Federation for Foreigners”** education-in-russia.com.

As candidates from Vietnam participate in the portfolio competition, they should wait after submitting their applications until the overall ranking is compiled. Further selection takes place based on this ranking.

The existing selection system allows talented and ambitious young people to get an education at the top Russian universities. The qualifications obtained, knowledge and skills make them sought-after specialists for national and international companies. As the evidence from practice shows, graduates of international relations faculties have some competitive advantages in their job search irrespective of the degree they earned: the educational institution status, qualification level, Russian language proficiency, international communication experience.

Phạm Tuân is a Hero and a Legend

Preparing our regular column HED_people, we were thinking about who should be chosen as a hero for the special Vietnamese issue of our magazine. And the editorial team quite rightly chose Phạm Tuân, the first Vietnamese cosmonaut. The story of Phạm Tuân, a top-notch pilot, cosmonaut, patriot, outstanding leader, and just an amazing person, is an inspiring story of a deed which is worth telling.

Vietnamese pilot, Hero of the Vietnamese War Phạm Tuân flew into space on July 23, 1980 on board the Soyuz 37 spacecraft. This event became a milestone one in the history of the Vietnam-Russia friendship.

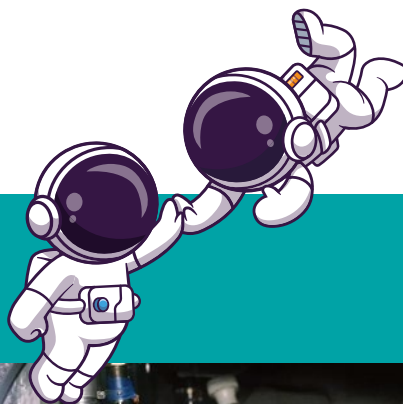

Tuân was born into a peasant family. Since childhood, he had been dreaming of becoming a pilot to protect his homeland from enemy planes. His way to the dream was not easy. Tuân, who suffered from malnutrition and was not strong and healthy enough to become a pilot. But, like in any story of overcoming, poor health was just an obstacle to overcome. He was persistent and determined, did sports and made himself fit, and, at last, he became a cadet at Gagarin Air Force Academy.

“

**Pilot cosmonaut
Georgy Grechko**

In fact, he was a top-notch pilot. He shot down the unshootable American bomber B-52. Generally speaking, he was doomed: he was to fly up to it, he shot it down, but after that he was pursued by the American fighters. They even did not shoot him down at once because they realized that when he would start landing... It was night, runway lights would be lit, he would be seen very well, he would move at low speed, and they would shoot him up like a partridge. He really flew up to his airdrome and disappeared. The lights were not lit. He turned out to have been training to land Mig-21 in the dark. He showed such a class! This could be done very seldom. It means that it was almost impossible to shoot down B-52 because there was the guard, savers around it. And surviving it was even more impossible!

russiainflight.ru

Viktor Gorbatko and Phạm Tuân

А. Пушиков

In 1979, Phạm Tuân was selected to participate in the Interkosmos Soviet program. He took a training course and in July, 1980 he took a flight on board the Soyuz 37 and Soyuz 36 spacecraft and the Salyut 6 space station. During the Olympic Games in Moscow, Viktor Gorbatko and Phạm Tuân entered orbit. Without exaggeration, the whole world was observing the crew's work.

Tuân spent a total of 7 days, 20 hours and 42 minutes in space. On board the station, he carried out a biological experiment on azolla to grow plants on board the international space station and took photos of Vietnam from Earth orbit.

Viktor Gorbatko and Phạm Tuân are on a splashdown training session

Phạm Tuân and Viktor Gorbatko are on a preflight training session on the sea

For Vietnam, as a war-ravaged country, Phạm Tuân's access to the space orbit was a great deed, miracle and hope for revival. Tuân was not only the first Vietnamese cosmonaut in orbit but also the first person from an Asian country to fly into space. His flight was ten years ahead of Japan.

On July 31, 1980, Gorbatko and Tuân were awarded the title of Hero of the Soviet Union. On August 1, during the cosmonauts' visit to Vietnam, they were awarded the title of Hero of Labor of the Socialist Republic of Vietnam.

In 2000, Lieutenant General Phạm Tuân became the Head of the Main Directorate of Defense Industry of the Ministry of Defense. In 2002, he became the Chairman of the Military Commercial Joint Stock Bank. He retired in January 2008 and lives in Hanoi now.

Today, Phạm Tuân is an outstanding citizen of his country, a symbol of courage, a living legend, a person who epitomizes determination and bravery.

*The Forum of International
Graduates of Soviet and
Russian Universities in Cairo, a
plenary meeting*

Rossotrudnichestvo

Talks about the Prospects for International Cooperation in Education and Science

Rossotrudnichestvo conducts outreach efforts to promote higher education in Russia and strengthen the position of the Russian language abroad. Thousands of successful graduates of Soviet and Russian universities are outstanding public and political figures, top-notch specialists, and leaders are a prime example of the quality of higher education in Russia and the relevance of professional knowledge and skills it provides. Let us talk about the meetings of international graduates of Soviet and Russian universities and the prospects for international humanitarian cooperation.

The Graduates Forum participants from Lebanon, Congo, Egypt, Morocco, and Tunisia are attending the Global Trends in Education workshop

Rossotrudnichestvo carries out its activities aimed at consolidation of the large community of international graduates worldwide hand in hand with Russian partner universities of the Agency. Such comprehensive efforts to support educational and inter-university cooperation, civil society, the youth, academic community, business and non-profit organizations promote the interests of the Russian Federation and some regions through humanitarian and educational interaction.

The Forum of International Graduates of Soviet and Russian Universities – Representatives of the Education Systems of Middle Eastern and African Countries organized by Rossotrudnichestvo in Egypt (Cairo) on December 17-18, 2022 is one of the most important events in this area. This forum that brought together more than 150 graduates on one platform outlined a priority for the development of cooperation in education and science and technology, its importance and prospects for all participants.

Professor at the Faculty of Physical Education of Helwan University Musaad Oweis is presenting the letters of appreciation from the Guardian Council on Healthcare and Physical Education of the Arab Republic of Egypt to Deputy Head of Rossotrudnichestvo Pavel Shevtsov and Head of the Rossotrudnichestvo Representative Office in the Arab Republic of Egypt Marat Gatlin

The organizers and volunteers of the Russian House in Cairo

The Forum brought together the heads and staff members of the universities in Middle Eastern and African countries, representatives of national education authorities, executive committees of the associations of graduates from 15 countries of the region such as Egypt, Zambia, Jordan, Iraq, Lebanon, Morocco, the United Arab Emirates, Palestine, the Republic of the Congo, Syria, Tanzania, Tunisia, Ethiopia, and the Republic of South Africa, as well as the representative delegations of 30 Russian universities and Rosatom State Corporation.

The plenary meeting and roundtable discussions addressed the development of cooperation in the sphere of education, training of local personnel according to the current needs of national economies, and joint research areas. The lively discussion showed that the parties' interest in the development of interaction is really great and can have a lot of positive effects, including training of highly qualified specialists, development of their own scientific and technological potential, expansion of humanitarian cooperation and related strengthening of cross-national awareness and tolerance.

The first Forum shows that such events help establish direct contacts with stakeholders, discuss urgent issues of sharing experience in education and science, and enhance efforts to train local personnel through bilateral programs and agreements. That is why Rossotrudnichestvo is planning to develop these practices and is elaborating upon the possibility of organizing such regional events on a regular basis biennially.

THE TWO MAJOR EVENTS ARE TO BE HELD BEFORE THE END OF 2023:

- The Forum of International Graduates of Soviet and Russian Universities – Representatives of the Education and Healthcare Systems of Asian Countries is to be held in Vietnam on October 3-4, 2023
- The Forum of International Graduates of Soviet and Russian Universities – Representatives of the Education and Healthcare Systems of African Countries is to be held in Tanzania on November 7-10, 2023

Head of the Department at Tabbin Institute for Metallurgical Studies Professor Fathi Tugan (Egypt) and Professor at the Engineering Faculty of Asute Atef El Sayed University (Egypt) with the volunteers of the Russian House in Cairo

Russian Languages

Tips for Learning

The Russian language is steadily ranked among the top hardest languages to learn. The learner's first language can become an additional challenge in mastering Russian. V. Samuseva, RFL teacher at the Preparatory Department of Moscow Institute of Physics and Technology, talks about why it happens, how to cope with it, and how students from Vietnam learn Russian as a foreign language.

Our experience of working with Vietnamese students at the MIPT Preparatory Department shows that most of these students are hard-working and persistent in achieving their goals, which is certainly a positive factor. However, students from Vietnam have to face some difficulties in the learning process.

The point is that the Vietnamese and Russian languages belong to different typological groups, so cross-language interference is inevitable. It manifests itself at all levels: phonetic, grammatical, lexical, and socio-cultural levels.

ARTICULATION

As early as at the initial stage, students face problems when studying the Russian alphabet. There are more consonants in the Russian language than in the Vietnamese language. For example, Vietnamese has no sounds [zh, sh, ts] and some other sounds in Vietnamese, so students have to master new variants of articulation. Besides, the difference between such sounds as [y] and [i], [s], [sh] and [ts] becomes a considerable difficulty. Due to this, students make such mistakes as: "byl" is pronounced as "bil," "nios" – "niosh," "tsentr" – "sentr." In Vietnamese, such Russian consonants as [b-v], [d-z], [t-s], [t-ch] are not differentiated, which can lead to mistakes in pronunciation: "byl – vyl," "roditeli – roziteli," "veter – vecher."

Taking into account the considerable language differences, you should place emphasis on articulation and pronunciation of new unfamiliar sounds.

Another important point is palatalization of consonants. Vietnamese has no such a phenomenon, and consonants are not palatalized. For example, students pronounce the hard sound [l] in the word "pal'to."

Real challenges are caused by a combination of two consonants in the Russian language. As a rule, one of the consonants drops: "stranitsa" – "tranitsa." Sometimes an additional vowel is pronounced between the two consonants. For example, the word "plokho" reads [p"lokho].

Another special thing about Vietnamese is that it is syllabic, unlike Russian. It means that words are pronounced and written as separate words irrespective of the number of syllables. That's exactly why the Vietnamese find it hard to pronounce polysyllabic Russian words as one word, in one breath.

With all this in mind, work on pronunciation and articulation requires a system approach. Try to do as many diverse tasks as possible to practice the pronunciation of fricatives, hard and soft consonants and pronunciation of polysyllabic words as one word.

WORD STRESS

Many difficulties are caused by word stress. To be fair, native speakers of many other languages share this pain with Vietnamese students 😊. Accentuation in cognate words can embarrass even advanced students. As you know, stress in the Russian language is movable and can differ even in derivative words and forms of the same word. For example, if in the noun "nachálo" the stress falls on the second syllable, Vietnamese students try to keep the same stress in the derivative verb: "nachál" instead of "náchal."

Special emphasis should be placed on question intonation in a Russian sentence without an interrogative word because declarative and interrogative sentences have identical patterns here.

You can overcome these difficulties not only by studying general rules but also by practicing active listening and reading.

GRAMMAR

Vietnamese has no grammatical gender. It plays a huge part in the Russian language because nouns agree with many parts of speech in gender. That is why genders and inflection of nouns for gender is a stumbling stone.

The same can be said about the case system, which does not exist in Vietnamese, but is one of the key elements of Russian grammar.

It is impossible to successfully master Russian without understanding the importance of gender and prepositional case system. It is important here that you do not neglect both written and oral exercises and memorizing rules and words. Use visual aids such as tables, diagrams, and situational pictures that will facilitate honing the skill using particular speech patterns. Have patience and practice!

LEXIS

Students can also make lexical mistakes caused by the differences in speech patterns. For example, if you say "spasibo" ("thank you") to a Vietnamese student, they will answer "nichego" ("nothing") (in translation into Russian), while in Russian we answer "pozhalujsta" ("my pleasure") or "ne za chto" ("not at all").

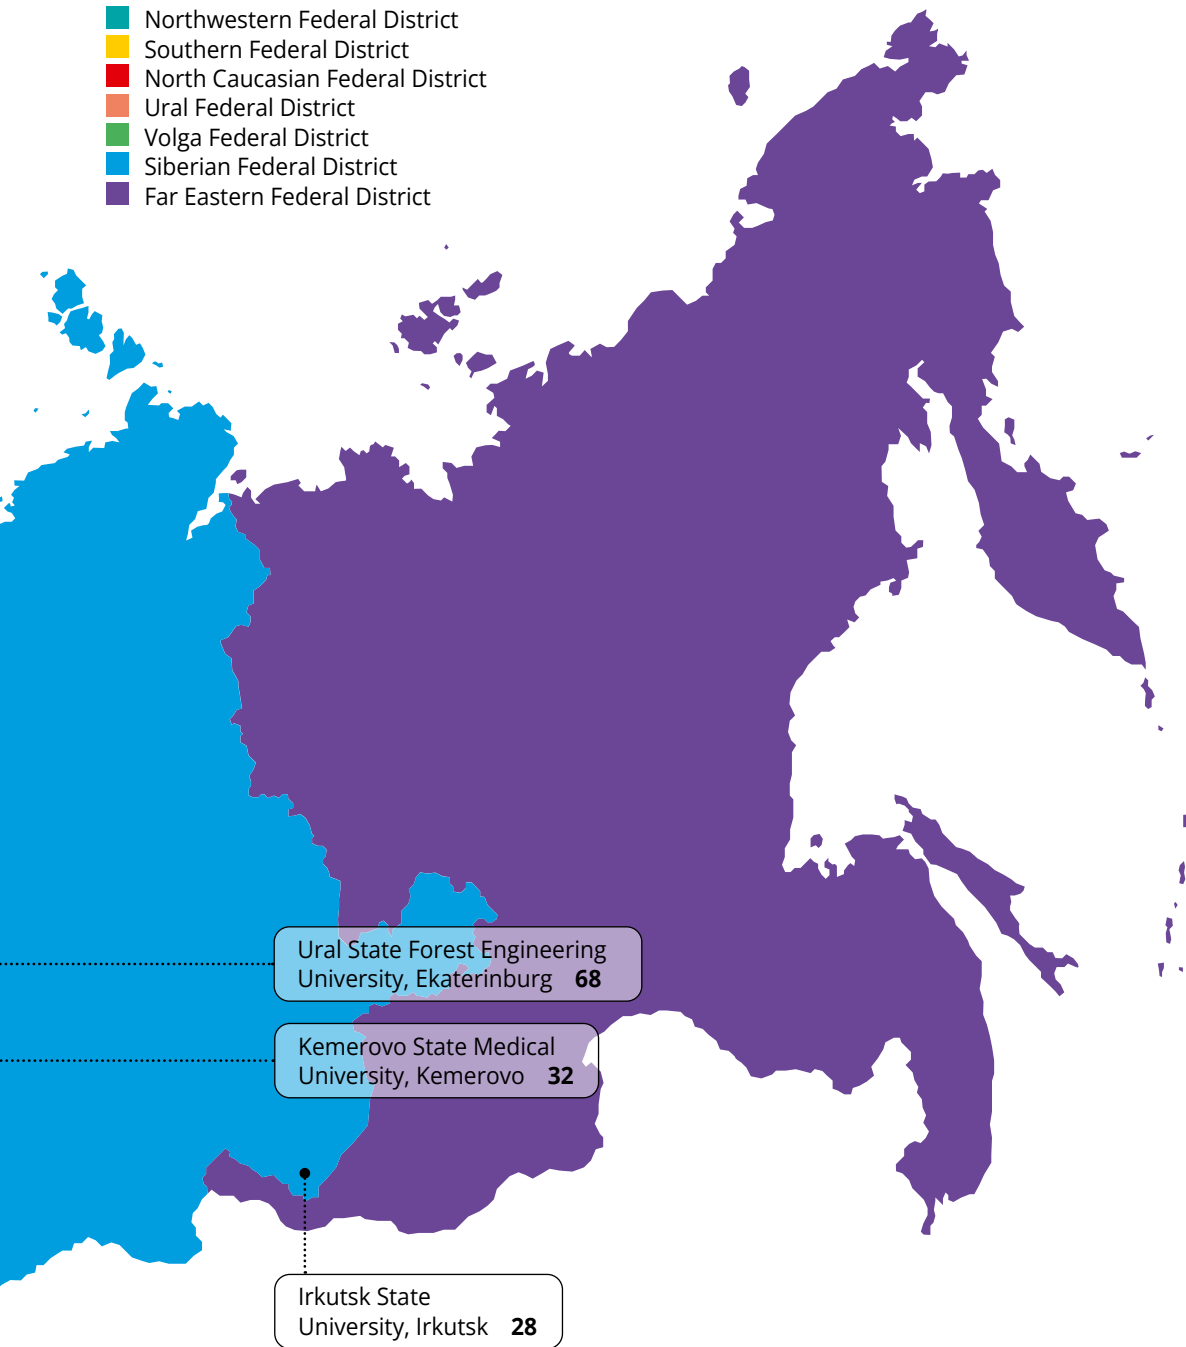

The socio-cultural differences in Russian and Vietnamese societies also have an impact. For example, according to the etiquette rules, Vietnamese school and university students address their teacher using the word "prepodovatel" ("teacher"), while in Russian it is fine to address people by name and patronymic or last name. That is why, even realizing the necessity and appropriateness of using names and patronymics when communicating with Russian people, Vietnamese students say that they feel uncomfortable. **This problem will be gradually solved when students practice and immerse themselves in the cultural environment.**

ASPECTS OF THE LEARNING PROCESS

- Individual learning path: elective and optional courses
- Minor is an additional specialization supplementing the major (MagoLego for Master's studies)
- Compulsory subjects related to digital literacy and the English language
- The opportunity to spend one or two semesters at a foreign university under the international academic mobility program
- Project-oriented disciplines and internships at the university's industrial partners

INTERNATIONAL SUMMER SCHOOL HSE UNIVERSITY – ST. PETERSBURG

The **Summer School** offers foreigners the opportunity to

- get acquainted within a short period of time with the learning process at HSE University – St. Petersburg and the best courses in finance and economics, political science and international relations, design, and media communications
- immerse themselves in the world of a wonderful urban culture: river and canal tours, exploring the old center of the city, visiting Peterhof and other architectural masterpieces

While studying at the Summer School, participants are accommodated in the dormitory of HSE University – St. Petersburg.

Duration: 2 weeks – 1 month

Russian Language and Culture course

Depending on their proficiency level, candidates can attend the beginner course (A1-A2) or improve their language proficiency (B1-C1).

Classes are conducted at the university buildings or online, depending on the study mode. Those wishing to apply for participation can get various discounts, including the Early Bird discount and the group discount for students of the same university.

Apply for the International
Summer School 2024

THE WAYS TO ENROLL AT HSE UNIVERSITY – ST. PETERSBURG

1

In 2024, HSE University – St. Petersburg offers 160+ state scholarships from the Russian Government for foreign citizens

State scholarships are awarded by the HSE University's Selection Committee based on the recommendations of educational programs. The scholarship covers 100% of the tuition fee.

- For Bachelor's degree applicants – based on the results of entrance exams
- For Master's degree applicants – based on the portfolio competition and the interview with the educational program

2

Olympiads

- **The International Youth Olympiad** and **Vysshaya Proba** – for Bachelor's degree applicants
- **Open Doors: Russian Scholarship Project** from the Global Universities Association and **Top League** – for Master's degree applicants

Successful participation gives international applicants the right to study at the university for free in a chosen field of study using the Russian Government scholarship.

3

Partial grants for foreign citizens

The grants covering 25-70% of the tuition fee are awarded to foreign citizens based on their total score in the entrance exams or the portfolio competition.

4

Applying through Rossotrudnichestvo

You can get a quota place if you apply on the website education-in-russia.com and undergo selection at the Russian House in your country.

In 2024, HSE University – St. Petersburg offers 35 places to apply for through Rossotrudnichestvo.

Nota bene! To get a quota place at HSE University, you should also pass entrance exams at the university.

To apply for participation in the HSE University's competition, you should register in the International Applicant's Personal Account and upload the document package. You can take entrance examinations online and offline. Registration in the Personal Account will be available from November 1, 2024.

PREPARATORY FACULTY FOR FOREIGN CITIZENS

Foreign citizens at ISU are trained by the highly qualified teachers. All of them have many years' experience in working with foreign citizens, are knowledgeable about modern information technologies, and are authors of textbooks and study guides.

Study areas:

- humanities
- economics
- natural sciences
- medicine and biology
- engineering and technology

Duration 10 months

Tuition fee 108,000 – 110,000 RUB

HOW TO GET INTO ISU

1 Choose a field of study and financing option (fee-paying place/state-funded place)

If you have any questions, you can contact the university representative by email

2 Submit the complete package of documents

The documents are submitted to the university's Admission Office on June 20 – August 18, 2024. You should submit the notarized translations of your passport and academic credentials

3 Pass the university's entrance exams

The entrance exams will be held on August 19-30, 2024. The exam schedule will be sent to your email address

4 Get an official invitation from the university

If you successfully pass your entrance exams for fee-paying places, the university representative will send you the agreement

5 Get an official invitation from the university

The invitation will be issued within a month

6 Buy a ticket

You should buy a ticket to Irkutsk and inform the university coordinator of your arrival to arrange the meeting at the airport

7 Arrival in Irkutsk and registration at the university

The university representative will meet you at the airport and take you to the dormitory, and the International Office staff member will familiarize you with the rules of stay in Russia and will help you get migration registration

Foreign citizens can take their entrance exams online.

INSTITUTE OF PHILOLOGY, FOREIGN LANGUAGES AND MEDIA COMMUNICATION

This is one of the largest subdivisions of Irkutsk State University which trains specialists in **linguistics, philology, and journalism.**

The Institute comprises the Faculty of Theoretical and Applied Philology, the Faculty of Foreign Languages, and the Higher School of Journalism where around 2,000 Russian and international students are currently pursuing the following fields of study:

- Philology (Bachelor's and Master's programs)
- Linguistics (Bachelor's and Master's programs)
- Journalism (Bachelor's and Master's programs)
- Pedagogical Education (Bachelor's program)
- Foreign Region Studies (Master's program)

The institute graduates work as translators and interpreters, teachers, editors, journalists, copywriters, international relations specialists.

The Institute offers a wide range of supplementary educational programs for international students:

- Russian language and philology internships
- Courses of Russian as a Foreign Language
- Baikal summer schools of Russian as a foreign language
- English language summer school
- Online courses of Russian as a Foreign Language
- Russian literature courses

Mounting the detector of the Baikal Neutrino Telescope

Foreign citizens can study for free:

- within the Russian Government quota. They can apply for a scholarship through the information system education-in-russia.com, then undergo the qualifying rounds at the Rossotrudnichestvo representative office
- as part of the program supporting compatriots living abroad

STUDYING

Specialist's program

- General Medicine (🇷🇺 RU, 🇬🇧 EN)
- Pediatrics
- Preventive Medicine
- Dentistry
- Pharmacy
- Clinical Psychology

Bachelor's program

- Biology
- Higher Nursing Education

After completing their sixth year of study, graduates have the opportunity to continue their education at KemSMU by pursuing clinical residency and PhD programs in modern fields of training highly qualified personnel.

The most popular specialties among international students at KemSMU

- Cardiology
- Surgery
- Neurology
- Psychiatry

ADMISSION

To get admitted, applicants must pass competitive selection based on the results of entrance exams in biology, chemistry, physics which are conducted online in the test format in English using proctoring technologies.

List of documents

The passport and academic credentials must be translated into Russian and notarized

International students apply to KemSMU to gain fundamental medical knowledge and acquire practical skills that will allow them to become qualified doctors regardless of their future specialty.

Entrance exam preparation program

GENERAL MEDICINE

Specialist's program

Language of instruction: **English** 
Russian 

Duration: **6 years**

Tuition fee per year: **235,000 RUB**

During the first three years the only language of instruction is English. Starting from the fourth year, students use Russian during practical classes in clinical subjects and when communicating with patients. Mastering Russian is an important part of the learning process.

Every year students undertake an internship at the healthcare organizations in the city and get their first qualification of an advanced registered nurse practitioner as early as their third year of study.

The following plays an important role in mastering the program:

- The anatomy museum with a rich collection of unique exhibits
- The simulation center fitted with state-of-the-art equipment
- The learning management system (LMS)

Graduates are knowledgeable about patient examination techniques and well-versed in modern diagnostic methods and treatment technologies.

LEARNING RUSSIAN

The first introductory course is offered to applicants at the stage of applying to the university.

Starting from the first year, students begin studying Russian as a foreign language systematically – they take elementary, basic and advanced courses and study medical Russian.

Training is provided by experienced teachers such as philologists who are knowledgeable about the most advanced teaching methods.

By the fourth year, students can communicate freely in Russian with patients, collect complaints, interview patients, participate in professional communication.

ARRIVAL AND ACCOMMODATION

Kemerovo is a cozy green city for comfortable stay and various types of extracurricular activity.

Summers are warm, the average temperature is +20-22°C, but the temperature can often reach +30°C. Winters in Kemerovo are snowy, the average temperature is -10-15°C, and sometimes there are -30°C frosts and even lower temperatures.

Kemerovo has an international airport, but sometimes it is more convenient to get by plane to the airport in the city of Novosibirsk, which has a commuter bus to Kemerovo. The fare is 1,300 RUB.

Upon arrival, students contact the **International Student Office** where they get comprehensive assistance in executing migration documents and getting health insurance.

Students are accommodated in the dormitory within walking distance of the main building. Near the campus are boulevards and parks for walking and doing sports, supermarkets and cafés, public transport stations. The accommodation fee is 1,100 RUB per month.

Tutors from among students and teachers who are group advisors help students solve social and everyday problems.

International students are actively integrated into the social environment of the university, city, and region. They get acquainted with the national culture and traditions of the peoples of Russia and the world, and participate in student creativity festivals.

“

Mariam Shenouda, Egypt. The third-year student at the Faculty of General Medicine of KemSMU

I am keen on studying and everything associated with my future profession. I like anatomy, physiology, and pharmacology. Here, international students have everything they need, and that's why many fears turned out to be unsound. I advise my Egyptian friends, who want to become doctors, to apply to KemSMU. I have a great many Russian friends, and we have a whale of a time together, communicating, going for a walk, and participating in various events.

“

Anil Kumar, India. The fourth-year student at the Faculty of General Medicine of KemSMU

KemSMU employs great teachers who literally live for their subject, and that's why our lectures are very interesting. There are no unimportant disciplines in medicine, and each of them plays its part in mastering the profession. Most of all, I gravitate towards surgery and anatomic pathology. It is so great to have the opportunity to delve into our profession directly at hospitals. Even though we don't perform any medical procedures yet, we can see practitioners doing it. This experience is invaluable.

Unification of cultures

Do Thi Le, Vietnam. The Preparatory Department attendee

Thanks to the Multidisciplinary International Olympiad for Master's Degree Applicants "My Career" in which I was lucky to participate in 2022, I managed to get the Russian Government quota to study at MSUT "STANKIN" for free.

MSUT "STANKIN" boasts wonderful teachers that help us actively improve our Russian. We live in the student dormitory with a very friendly atmosphere. We always communicate with Russian students, which allows us to learn more about Russian culture.

La Tuan Anh, Vietnam. The third-year PhD student at the Department of Applied Mathematics

After completing my Master's degree, I decided to move to the capital of Russia to continue my education at the best scientific school of MSUT "STANKIN."

We constantly participate in research conferences, which makes it possible to practice Russian and demonstrate our research achievements. The department staff members are very friendly, they always give tips and help us with our research theses.

Nguyen Minh Hoang, Vietnam. The second-year Bachelor's student majoring in Mechanical Engineering

I study at the Department of Mechanical Engineering Technology. I really like the way our teachers treat international students, and they conduct classes in an understandable language.

In the future, I plan to pursue my Master's degree at MSUT "STANKIN" because our department has very big advantages and well-developed technical facilities.

-  interadmission@phystech.edu
-  eng.mipt.ru/how-to-apply

ADMISSION

 Vietnamese citizens can apply to MIPT for state-funded (the Russian Government Scholarship) or fee-paying places.

Admission within the quota (state-funded places)

To participate in the competitive selection, candidates stating their willingness to study in the Russian Federation within the quota must:

- Register in the information system education-in-russia.com
- Fill in the application form in the best possible way
- Submit their photo, scanned passport, scanned academic credential (or certificate confirming their study period)

Based on the competitive selection results, the list of candidates is compiled. The candidates who successfully passed the competitive selection and were included in the list get the study scholarship.

NB! The number of state-funded places at MIPT for Vietnamese citizens is not limited.

To enroll at a particular phystech school, candidates who got the Russian Government quota must pass an additional selection. The selection can include the test, interview or portfolio competition.

For detailed information, you should contact the university's International Department at interadmission@phystech.edu

The winners of the Open Doors International Olympiad have the opportunity to enroll in a Master's program at MIPT in a state-funded place without entrance exams.

Admission on a fee-paying basis on equal terms

To enroll in a fee-paying place, applicants must get a lower passing score in entrance exams.

Written entrance exams are held in July.

INTERNSHIPS

Starting from the third year of Bachelor's studies, students work for specialized organizations and research institutes where they have the opportunity to put into practice the knowledge they acquire.

Among the MIPT's partner employers are Yandex, Rosneft, Sberbank, Gazprom, Rostelecom, A4 Technologies.

PREPARATORY COURSES

The course of Russian as a Foreign Language from the beginner level to B1 for the following study areas:

- natural sciences
- engineering and technology

The IT Start program includes:

- the Russian language course
- the intensive informatics course helping students prepare for their entrance exams at the top Russian engineering and technology universities

The attendees from Syria, Egypt, Turkey, India, China, Indonesia, Latin American countries, Africa take the preparatory course.

ACCOMMODATION

MIPT accommodates all international students in the dormitory. The MIPT campus is located in Dolgoprudny which is 20 minutes' drive from Moscow, the largest city in Eastern Europe with well-known tourist attractions such as world-famous theaters, museums, historical sights, the largest shopping centers, and many others. The campus is guarded 24/7.

INFRASTRUCTURE

- Outpatient clinic
- Stadium
- Sports halls for football, volleyball, table tennis, track-and-field, unarmed combat, and other sports
- Swimming pool, tennis court

ADAPTATION

The MIPT staff members provide assistance in executing required documents to get health insurance and registration, in undergoing a medical examination and fingerprinting, and in getting bank and SIM cards and an access card.

MIPT has the international student adaptation system that includes:

- Buddy project
- Adaptation workshops
- Quarterly meetings with the International Student Office staff
- Exchange Club
- Russian Speaking Club
- Extracurricular activities for international students

Do Minh Tuong, Vietnam

Studying in Russia became an exciting and challenging adventure for me. From a new country to a new culture and way of life – everything was unusual, and I had to get accustomed to it.

The language barrier became the first obstacle I had to face. Despite the difficulties, studying Russian in Russia and speaking practice did me a world of good: I became more confident, and this laid the groundwork for my educational path in Russia.

In the beginning, Russians seem to be distracted and rather grim. This impression changed after I had made friends with my fellow students. I found out that Russian people are rather friendly. Besides, the stereotypes about Russians also turned out to be false. Russians don't play with bears and don't drink vodka for breakfast. 😊

One of the key aspects of the Russian way of life that caught my attention was a focus on individualism and privacy, compared to community thinking which is predominant in Vietnamese culture. That's why building relationships and networking with local residents required a different set of social skills and respecting personal boundaries.

The academic system, which is different from the Vietnamese one, also was a source of concern. And here, assistance provided by the teachers and staff members of the International Department turned out to be invaluable.

EDUCATION

Educational programs taught in Russian and English

The higher education programs offered by Sechenov University are the gold standard of medical education in the Russian Federation and are ranked among the Top 300 medical programs in the world. The modern clinical campus in Russia offers each student an opportunity to develop a unique set of competencies starting from the first year of study.

The university graduates are part of the professional elite of global healthcare.

TRAINING OF ENGINEERS AND CROSS-FUNCTIONAL SPECIALISTS IN THE FOLLOWING FIELDS:

- Nanomaterials
- Mechanics and Mathematical Modeling
- Information and Information Technologies
- Materials Science and Engineering
- Medical Engineering

ADVANTAGES

- Interdisciplinary biomedical and medical education
- Practice-oriented curricula
- A wide range of research topics for scientific projects
- Project activity starting from the first year of study
- Competencies at the nexus of specialties and sciences: bioengineering, research, technological and entrepreneurial competencies
- Joint international projects
- Academic mobility programs
- Student Olympiads in emergency medicine, oncology, epidemiology, and others

ADMISSION

Till June 20 – submitting online applications at international.sechenov.ru/en

From June 20 – submitting applications and registering for an exam at abiturient.sechenov.ru

PREPARATORY DEPARTMENT

The Russian language course at the university's Institute of Linguistics and Intercultural Communication.

Subjects: Russian as a Foreign Language, Biology, Chemistry, Physics, and Mathematics.

MASTER'S / PHD PROGRAMS

Duration: 2 years

- 16 unique fields of study, traditional professions and professions of the future
- 25 majors
- 3 English-taught programs 
- 3 internationally accredited programs
- Breakthrough research at the Biomedical Science and Technology Park

RESIDENCY / PHD PROGRAMS

Duration: 2, 3, 4 years

- 70+ clinical medicine specialties
- High-tech medicine в residency
- Planning an individual learning track for a future career
- Getting to work on a thesis while studying
- Laparoscopic and robotic surgery, laser technologies at a clinic, reconstructive microsurgery, digital diagnostics
- 3,000+ beds at the clinical center
- Praxi-Medica: simulation centers for honing surgical skills
- Vetlab: living tissue surgery

All-Russian Sechenov Olympiad for School Students

InterOlymp Olympiad

Open Doors Olympiad

INFRASTRUCTURE

Sechenov University is the center for academic, scientific and resource excellence in the Russian healthcare system with the incorporated sports camp and infrastructure for study, practical training and cutting-edge research:

- Modern student dormitories with Wi-Fi
- The central scientific medical library
- The Center for Research Career, the clinical center, the congress center
- The university's Medicine History Museum, a botanical garden, a vivarium
- The Center for Clinical Trials of Drugs
- The Center for Continuing Medical Education with a virtual training clinic
- The Burevestnik Sports Center with an ice rink, the Zvenigorod health center, the Phoenix student sports club, the Sechenovets sports and health camp

INTERNSHIP AND EMPLOYMENT

Students can participate in the Sechenov Tech accelerator and create innovative biomedtech products, participate in biotechnology workshops, find prospective employers at job fairs.

- The Center for Graduate Employment Assistance
- Job fair
- The Center for Research Career and the case study area of Sechenov University
- SYSE "Young Researcher and Entrepreneur at Sechenov University"
- Russia's only network accelerator Sechenov Tech for the university's biomedtech startups aimed at supporting student startups from expert evaluation of a project to production of pilot prototypes
- Entrepreneurship case competitions

STUDENT LIFE

Sechenov University creates opportunities for international students to lead a fulfilling student life:

- The Buddy volunteering program aimed at supporting first-year students: the international medical environment helps them adapt to life in Moscow
- 35 compatriot associations
- The FIRST MED MEDIA student media center
- Festival "Spring at Pirogovskaya"
- Sechenov University Ball
- Beauty and Talent Contest "Miss Sechenov University"
- The NewArt Cultural Center holding the most important university events
- Youth grant competitions
- Food Festival for International Students Unity Food Fest
- Student Universiades, Spartakiads, sports competitions and festivals
- Phygital academy for the development of phygital sports: at the nexus of physical and digital activities

PGUPS cares about student security. All university buildings, including the dormitories, are guarded by the security team 24/7 and equipped with video surveillance systems.

PARENTS BRIDGE

Parent's Account for getting the information on attendance, academic progress, academic, scientific, sports, and other achievements of a student.

Arya Naradi Iswara, Indonesia

I went to study in Russia under the intergovernmental agreement between the Russian Federation and Indonesia. In the beginning, I studied at the university's Russian Language Center, and only then I entered PGUPS and became a first-year student. Studying was interesting and difficult. If I had any questions or difficulties, I was helped not only by the students but also by the teachers.

I graduated from the university in 2022. I studied at the Faculty of Transport Construction, and my specialization was Construction of Railways, Bridges and Transport Tunnels.

Don't be afraid of anything, come here, the university is always waiting for you!

“

Odgerel Undram

I am pursuing the Bachelor's degree in Design at RSU named after A. N. Kosygin.

I consider that success in research can be achieved thanks to the optimal learning environment arousing passion and a sense of responsibility towards research. RSU named after A. N. Kosygin has provided me with all the good conditions that helped me, as a foreigner, to interact and integrate into the student community.

RSU has offered me a wide range of opportunities in the research culture with the most optimal and up-to-date educational technologies.

I think that all these subtle details have helped me to feel loyalty and confidence which, in its turn, develops responsibility for the achievement of the best results.

“

Gankhuyag Ganchimeg

I am 23 years old. I've completed my studies at RSU named after A. N. Kosygin. Unfortunately, this was a period of the coronavirus pandemic, but this didn't ruin my impression of the university.

Thanks to my teachers, I learned a lot. In addition to the lessons, I learned how to become better and happier. Although I have many drawbacks, I did my best day by day.

Studying far from home, I was gaining new impressions. Although I didn't have my family beside me, I could count on support from my new friends. It was great to study here!

NATIONAL UNIVERSITY OF OIL AND GAS "GUBKIN UNIVERSITY" (NATIONAL RESEARCH UNIVERSITY)

Founded in 1930

11
faculties

20
Bachelor's programs

14
Master's programs

8
Specialist's programs

14
PhD programs

The university provides training in all areas of the oil and gas industry: from exploration, extraction, transportation, processing of oil and gas, creation of technology and information support for engineering processes to studying economic and international aspects of the oil and gas market.

11,000
students

POPULAR FIELDS OF STUDY

- Oil and Gas Engineering
- Chemical Engineering
- Economics
- Management
- Informatics and Computer Engineering

International students on an internship

A tour around the university's oil and gas facilities

Self-instruction

OIL AND GAS ENGINEERING

Bachelor's programs

- Drilling of Oil and Gas Wells (full-time)
- Operation and Maintenance of Oil Production Facilities (full-time)
- Operation and Maintenance of Gas and Gas Condensate Production Facilities and Underground Storages (full-time, part-time)
- Construction and Repair of Gas and Oil Pipelines and Storage Facilities (full-time, part-time)
- Operation and Maintenance of Transport and Storage Facilities for Oil, Gas and Refined Products (full-time, part-time)

- ✓ Experimental work at the department laboratories
- ✓ Work on onshore and offshore drilling simulators

Career prospects

- Drilling supervisor, process engineer
- Manager
- Assistant driller, driller, well service operator, oil and gas production operator, operator of booster and cluster pump stations, water and oil pretreatment plants
- Production submanager at oil and gas companies
- Positions at design, engineering and research organizations

Most international students are sought after by oil and gas companies all over the world.

ARRIVAL

Visitors are taken from the airport to the city by

 **Aeroexpress trains** from 470 RUB

 **Taxi** – 1,500 RUB on average

Metro is the fastest and the most comfortable transport in the city. The fare is 50–75 RUB per trip.

It is easy to get to the university, so students arriving in Moscow are met at the university at the address: **65, Leninsky Prospekt, bld. 1, Moscow**. The Akademicheskaya metro station.

Upon arrival, foreign citizens receive comprehensive visa support, but they must get health insurance themselves.

All foreign students are accommodated in the university campus – the comfortable dormitories. Each room accommodates 2-3 persons. The accommodation fee is around 20,000 RUB per year.

The Week of National Cultures is an annual event aiming to improve the relationship between the university's ethnic groups. The program includes a photo show of the unique sights of various nations, a quest game, the Guess a Movie contest, an exhibition of national costumes, national cuisines, and a gala concert.

CAMPUS

- 5 dormitory buildings, over 4,000 places
- A gym, a skiing center, a football field with workout areas, basketball and volleyball courts
- Dance, instrumental, drama studios, a chess club, a movie club, an art studio and a recording studio

INTERNATIONAL FRIENDSHIP CLUB

The social youth organization familiarizes students with the culture and creativity of various peoples in Russia and foreign countries. The Club works with 22 fellow countrymen associations established at the university. At the beginning of an academic year, they find "their" guys on the list of enrollees and help first-year students adapt to the university and Russia.

PIROGOV RUSSIAN NATIONAL RESEARCH MEDICAL UNIVERSITY

- 2 Take **online** entrance exams
- 3 Sign the applications and the enrollment agreement
- 4 Pay your tuition fees **online**
- 5 Receive an extract from the enrollment order

Congratulations! Now you are officially enrolled at SPbPU!

Vu Duk Hui, Vietnam. Bachelor's student in Business Informatics at the Institute of Industrial Management, Economics and Trade

For me personally, high qualifications and experience of teachers are one of the major benefits of studying at Polytechnic University. They are professionals in their field, who are always ready to help and explain the study material and give us valuable knowledge, advice and recommendations. Thanks to them, I can deepen my knowledge and develop skills I need for my future career.

Here I made many friends with whom we share our knowledge and experience and participate in various events held at Polytech. I feel very comfortable here and can completely immerse myself in the learning process.

PREPARATORY DEPARTMENT

The general education program of pre-university training **“Russian as a Foreign Language”**: teaching Russian from scratch.

Duration – 1 year

As the evidence from practice shows, international students easily adapt and master the language, constantly communicating with students from Russia and other countries.

International USFEU students constantly participate in student events.

Teaching Russian is based not only on theory, but also on practice, which is combined with introductory tours to the museums and historical and cultural sites. Attendees visit the city theaters and exhibitions.

POPULAR FIELDS OF STUDY

- Applied Informatics
- Technosphere Safety, Ecology and Environmental Management
- Forestry
- Construction of Automobile Roads, Bridges and Tunnels
- Transport Technology and Operation of Technological Machines and Complexes
- Chemical Engineering and Biotechnology

The language of instruction is Russian 

INTERNATIONAL STUDENT SUPPORT

- Assistance in executing documents while checking in at the dormitory and getting health insurance
- Health care delivery support if somebody falls ill
- Migration registration

ADAPTATION

The university has the **International Volunteer Club** where students provide assistance to international students in their social and language adaptation.

 vk.com/clubinterusfeu

DORMITORIES

The university has nine dormitories (the total number of places is 2,500). All international students are accommodated in the university dormitories.
