## Contemporary Russian literature

Russian culture is diverse and rich, and it is difficult to imagine that we can get acquainted with it without immersion in Russian literature. The works written by Russian classics are included in the golden fund of world literature, are translated into many languages of the world, and are definitely a part of the world cultural heritage. Today's world is rich in talent just as much.

If you like reading, we offer you our today's review of contemporary Russian prose that can become your guide to Russian character, mindset, and everyday life.

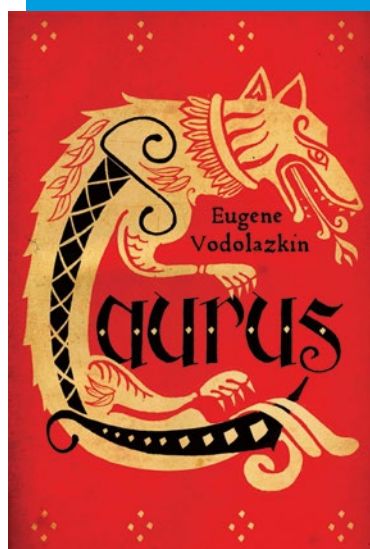

**ILYA ILF, YEVGENY PETROV**

## The Little Golden Calf

satirical novel

This is a satirical novel about the adventures of charismatic schemer and crook Ostap Bender. It is included in the golden collection of Russian literature. The action takes place against the backdrop of Soviet mundanity of the 1930s and is a bright parody of reality. A combination of realism and such literary techniques as hyperbole, pun, grotesque produced a facetious story with multiple meanings. In 1949-1956, the novel was called ideological sabotage and banned.

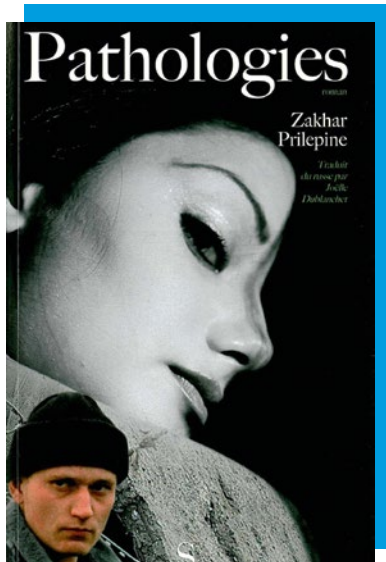

**EUGENE VODOLAZKIN**

## Laurus

non-historical novel

The main character of the novel Laurus is a medieval herbalist Arseny. He has the gift of healing but is unable to save his beloved. He decides to walk his earthly path by devoting his life to her. He nurses the plague stricken and wounded, wretched and feeble, and the more he sacrifices himself, the more evident his gift becomes. But can love and sacrifice save a human soul?

This is a very profound and multi-layered novel about people, God, love, and sacrifice. It is written in modern Russian and Old Russian, has been translated into more than 30 languages, and has won recognition from critics and readers.

**ZAKHAR PRILEPIN**

## The Pathologies

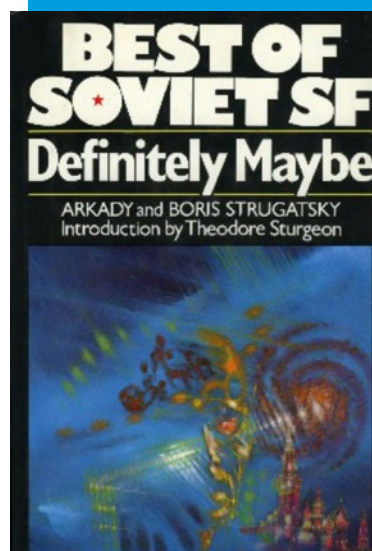

novel / realism

The outskirts of Grozny city. War in the Caucasus. The group of young and angry special operations forces soldiers came to war.

Svyatoy Spas is a quiet town lost among Russian hills and plains. The six-year-old boy, living his childhood tenderly and sensitively. The grown-up young man, loving passionately and jealous till it bleeds.

But the line between the past and the present, between peace and war is blurred. The main character, Egor Tashevsky – a man with a restless and attentive state of mind – tries to fit the war into his concept of normality and mentally lives his broken childhood and sybaritic youth again.

*The Pathologies* is a complex and cinematic novel about ruthless war, persistent hope, and people at war. The novel stands out from other works by addressing a distressing theme of the Chechen War and harsh realism.

**BORIS AND ARKADY STRUGATSKY**

## One Billion Years to the End of the World

tale / science fiction

The main character of the tale, astrophysicist Dmitri Malianov, suddenly finds himself on the cusp of a scientific breakthrough. And just from then onward, some strange things begin happening in his life that seem to be going to obstruct his further work. A similar situation is faced by other researchers whose work in a variety of fields of science looks promising. Who and what is behind the attempts to stop the scientific progress of humankind? And why?

One of the most unusual works by the Strugatsky brothers – the tale *One Billion Years to the End of the World* is written in the genre of philosophical science fiction and laced with numerous literary, historical and metaphysical allusions.

# Russian Music for Our Pleasure...

and for Learning  
the Language

National song creativity collects and crystallizes the main archetypal national traits. We can identify a certain culture by listening to music. Listening to the songs of various peoples, we get acquainted with their history, character, lifestyle, and mentality. In this issue, we will open the door to the world of the musical and song culture of Russia.

Apart from the fact that music can be considered a universal language of cross-cultural communication, songs can become a great language learning tool. Even for such a difficult language as Russian. Songs help memorize new vocabulary, develop listening and pronunciation skills, and get acquainted with the culture of the study language in a relaxed atmosphere. Songs motivate. Songs help. Songs encourage. The song that "sticks" in our head becomes a reason why we open a dictionary thinking, "What is it all about?" Besides, listening to music, we relax and have a good time while our subconscious mind is doing its work, helping us digest the information we get.

If you have just started getting acquainted with Russian, you should listen to meditative and melancholic folk songs hiding a key to a mysterious Russian soul and character. "Ptashechka" ("Little Bird"), "Zhuravli" ("The Cranes"), "Eh, uhnem!" ("Hey, heave-ho!"), "Step da step krugom" ("Steppe All Around"), which are old songs with a soul and a history, are catchy and remain in our hearts. Russian music and song culture is diverse and interesting. Here everyone can find something that will be to their taste irrespective of their preferences.

### **DMITRI HVOROSTOVSKY (1962-2017)**

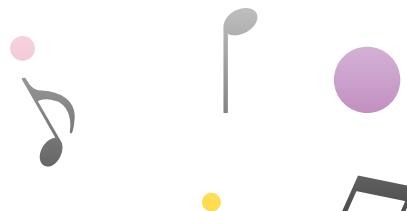

opera/romance

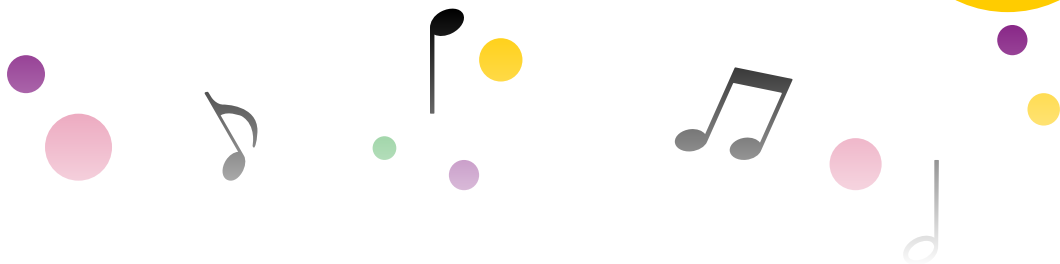

The Soviet and Russian opera singer, beautiful baritone who has left a rich creative legacy. An outstanding man of art, a man with a big heart, Hvorostovsky was nominated for Grammy three times, performed at the best world venues, and cooperated with the outstanding contemporary conductors. Hvorostovsky's singing and performing talent significantly exceeds the opera genre. He performed not only opera arias but also romances, Russian folk songs, spiritual music works, and patriotic songs. Hvorostovsky's music is profound, full of sense and feelings, and it leaves indifferent very few people.

### **KINO**

Punk rock

The Kino band and its leader, singer, and song writer Viktor Tsoi (1962–1990) are considered Russian rock pioneers. The band greatly influenced the development of Russian rock culture and was on a lot of tours to the former USSR countries and other foreign countries. Kino's music is still popular and inspires many contemporary musicians. For Russian language learners, the songs of the Kino band are a real find. The texts of the songs are simple and understandable and strike a chord because they are about love, life, people, and feelings, e.g. sadness or lust for freedom. In Russia, you can hardly find someone who does not know such songs as "Kukushka" ("Cuckoo"), "Zvezda po imeni Solntse" ("A Star Called the Sun"), and "Pachka Sigaret" ("A Pack of Cigarettes").

## **POLNALUBVI**

Indie

The pseudonym, which literally means “full of love,” belongs to young singer, song writer, and composer Marina Demeschenko. Marina was born in the town of Anadyr in Chukotka (try to find it on the map 😊). Since she was a child, she had been doing music and learned three instruments – the violin, the piano, and the guitar. She wrote her first song in 2016 and experimented with the popular cover songs. Today the singer has five studio albums. The album “The Tales of a Wood Nymph” was characterized by the audience as “elf pop” that combines touching texts, melodious and clear voice, deep basses, and choral accompaniment. The hit “Comets” was one of the TikTok trends.

## **PETR NALICH**

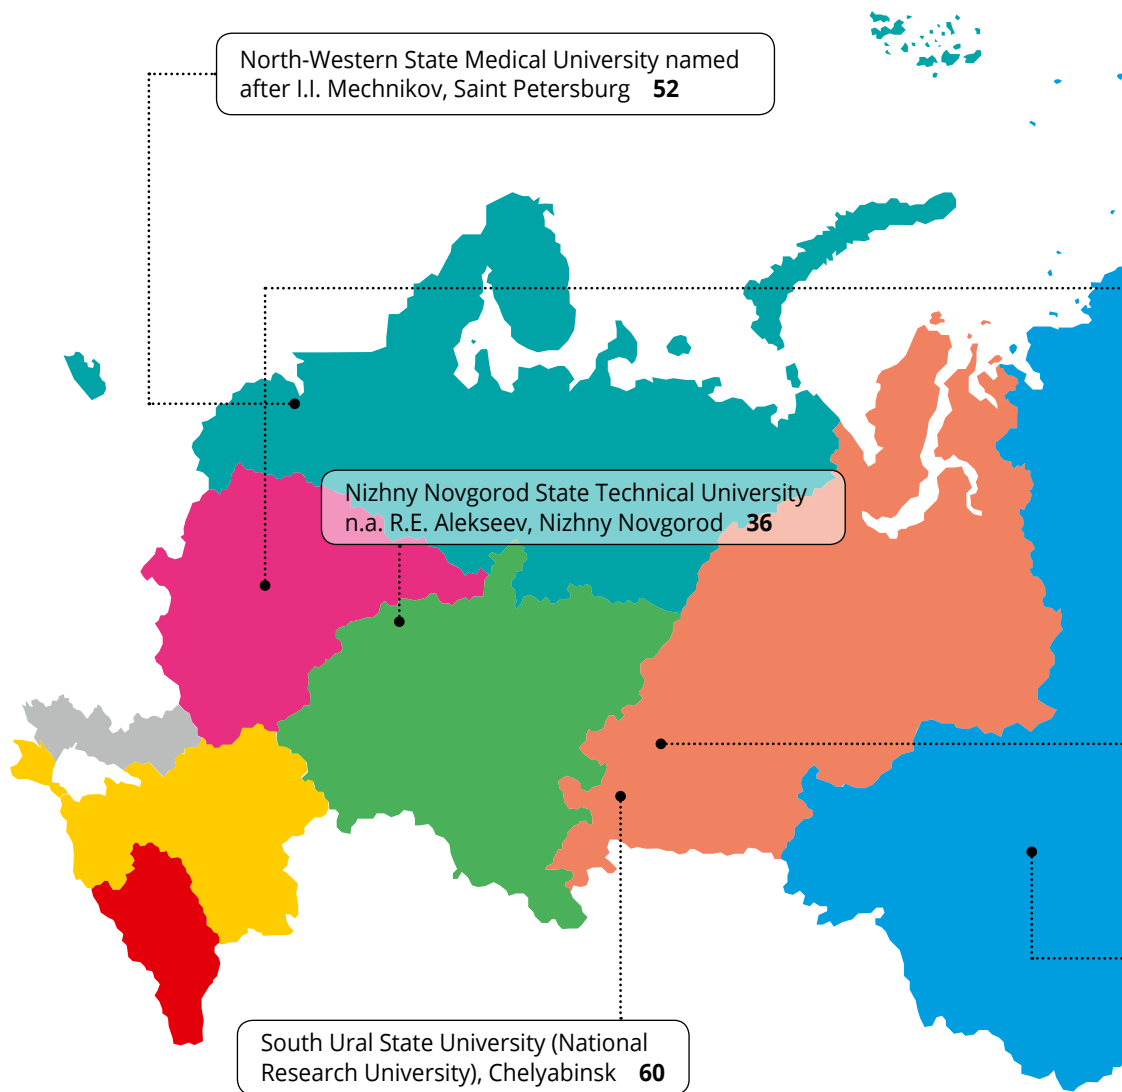

pop/rock/folk/author song

This Russian singer and composer writes songs and music for theatrical performances, movies, and cartoons. The clip for the funny song “Guitar” entered the top of the most viewed Russian clips and was viewed more than eight million times. The song “Lost and Forgotten” was performed at the Eurovision Song Contest 2010. Nalich is an outstanding singer, performing classical opera repertoire, romances, and author songs. Petr Nalich and his band have 13 studio albums mixing musical genres and styles in their tracks.

**Moscow, Russia**

## ADVANTAGES

- SULUP is the world's and Russia's largest center for land use planning science and education, with a successful experience of participating in implementing major state initiatives in the field of land and agrarian transformations
- SULUP supports and develops close cooperation with the industry
- SULUP graduates are in demand and are successfully employed in their degree field
- SULUP scientists have established and are heads of most academic schools of land use planning that are well-known in Russia and abroad. They participate in planning, appraisal and practical implementation of large-scale projects in land use planning management in Russia

**In 2011-2021, the University trained more than 15,000 specialists from 34 countries.**

## PREPARATORY DEPARTMENT

The Preparatory Department provides pre-university training for students who are going to pursue higher professional or postgraduate education programs taught in Russian 🇷🇺 at Russian universities.

### Studying at the Preparatory Department:

- Students have the opportunity to combine their preparation for admission to a Russian university and completion of their previous level of education in their home countries
- Throughout the entire educational process, students are supported by experienced advisors who teach at SULUP
- Flexible schedules and lower tuition fees compared with other universities
- The number of students in a group is 14 people
- Year-round pre-university training programs
- After students successfully pass exams, they obtain state-recognized certificates of completion of the pre-university training course

### Study areas:

- Economics
- Engineering and technology
- Medicine and biology
- Intensive course

## REQUIRED DOCUMENTS

If you have decided to study at our University, you must get an invitation to study. For this purpose, you must submit to [✉ interdep@guz.ru](mailto:interdep@guz.ru):

- Passport copy
- Translation of the passport into Russian
- Educational certificate
- Translation of the educational certificate into Russian
- Completed application form

The invitation will be ready a month after you obtain your documents. It will be sent to your email specified in your application form.

After you get the invitation, you must submit your documents to the Russian Consulate and obtain a visa to enter Russia.

**Going to study in Russia, do not forget to take your school leaving certificate + Bachelor's degree certificate if you apply for a Master's degree.**

**Application form  
for an invitation**

## POPULAR EDUCATIONAL PROGRAMS AND THEIR BENEFITS

As evidenced by international experience, the share of professionals with university degrees, who work in the field of land use planning of economically developed countries, is at least 60% of the enterprises' number of staff. Every year, more than 70% of SULUP graduates get employed by government authorities, organizations and institutions, and agricultural enterprises of Russia. According to the data from the performance monitoring of the universities of the Ministry of Science and Higher Education of Russia, the share of employed graduates was 80-100% in 2017-2012.

## ACCOMMODATION

International attendees are accommodated in the dormitory. The dormitory is a 12-story panel building with recessed balconies. The lodging units with a total area of 40 m<sup>2</sup> include two newly renovated rooms, for 4 and 2 people, respectively.

“

### **Rosero Vallejo Mari Lurdes, Ecuador. Geocology PhD student**

In the beginning, Russians seemed cold to me compared with Latin America, but later I realized that Russians are faithful and sincere people when they give you their friendship.

I like Moscow. But my favorite place in Russia is Murmansk. In Murmansk, I could observe the Polar Day, and, in winter, the northern lights. That's incredible!

The most difficult thing was the language, but I practice it every day and try to improve myself.

In my free time, I like cooking, taking photos, and traveling.

# KEMEROVO STATE MEDICAL UNIVERSITY

Founded in 1955

✉ [international@kemsma.ru](mailto:international@kemsma.ru)

# GENERAL MEDICINE

Specialist's program

Language of instruction: **English**   
**Russian** 

Duration: **6 years**

Tuition fee per year: **218,000 RUB**

During the first three years the only language of instruction is English. Starting from the fourth year, students use Russian during practical classes in clinical subjects and when communicating with patients. Mastering Russian is an important part of the learning process.

Every year students undertake an internship at the healthcare organizations in the city and get their first qualification of an advanced registered nurse practitioner as early as their third year of study.

**The following plays an important role in mastering the program:**

- The anatomy museum with a rich collection of unique exhibits
- The simulation center fitted with state-of-the-art equipment
- The learning management system (LMS)

Graduates are knowledgeable about patient examination techniques and well-versed in modern diagnostic methods and treatment technologies.

## LEARNING RUSSIAN

The first introductory course is offered to applicants at the stage of applying to the university.

Starting from the first year, students begin studying Russian as a foreign language systematically – they take elementary, basic and advanced courses and study medical Russian.

Training is provided by experienced teachers such as philologists who are knowledgeable about the most advanced teaching methods.

By the fourth year, students can communicate freely in Russian with patients, collect complaints, interview patients, participate in professional communication.

## ARRIVAL AND ACCOMMODATION

**Kemerovo** is a cozy green city for comfortable stay and various types of extracurricular activity.

Summers are warm, the average temperature is +20-22°C, but the temperature can often reach +30°C. Winters in Kemerovo are snowy, the average temperature is -10-15°C, and sometimes there are -30°C frosts and even lower temperatures.

Kemerovo has an international airport, but sometimes it is more convenient to get by plane to the airport in the city of Novosibirsk, which has a commuter bus to Kemerovo. The fare is 1,300 RUB.

Upon arrival, students contact the **International Student Office** where they get comprehensive assistance in executing migration documents and getting health insurance.

Students are accommodated in the dormitory within walking distance of the main building. Near the campus are boulevards and parks for walking and doing sports, supermarkets and cafés, public transport stations. The accommodation fee is 1,100 RUB per month.

Tutors from among students and teachers who are group advisors help students solve social and everyday problems.

**International students are actively integrated into the social environment of the university, city, and region. They get acquainted with the national culture and traditions of the peoples of Russia and the world, and participate in student creativity festivals.**

“

**Sarra Jaouadi, Tunisia. The second-year student at the Faculty of General Medicine**

Studying at KemSMU, I am falling in love with my future profession more and more. I have a particular interest in molecular genetics, anatomy, and biochemistry. However, I like not only major subjects but also the Russian language.

I didn't expect to get into such a multinational university. Students from Tunisia, India, Egypt, and other countries study here. All of us have become very good friends and get to know about our countries' cultures with pleasure.

“

**Daniel Atta, Côte d'Ivoire. The second-year student at the Faculty of General Medicine**

I've chosen KemSMU because it offers good education that will help me become a qualified specialist in my home country. Our teachers are very good. They are interested in our learning the study material.

Our life is very interesting here! I participate in student concerts with pleasure, singing in my native French language. Also, I like doing sports, and I go to the gym twice a week.

Nizhny Novgorod

# NIZHNY NOVGOROD REGION

**The Nizhny Novgorod Region** is a vast region in the center of European Russia – it is a part of the Volga Federal District. The administrative center, the city of Nizhny Novgorod, is located at the confluence of two rivers – Volga and Oka, 400 km northeast from Moscow.

The Volga River divides the region into two parts – the Left Bank (Zavolzhye) and the Right Bank, which differ very much from each other in natural and climatic conditions. Zavolzhye is a plain. The Right Bank of Oka and Volga is a rolling plain.

The region has more than 9,000 rivers and brooks. The largest rivers are Volga, Oka, Vetluga, and Sura. There is Gorky Reservoir and Nizhny Novgorod hydroelectric power plant in the region.

The climate of Nizhny Novgorod Region is moderately continental. Winters are usually cold and snowy, and summers are short and moderately hot.

**Around 48% of the territory is covered by forests. Coniferous forests are a major type of vegetation.**

The regional economy is based on the processing industry. The largest share in the industry is taken by manufacturing transportation means and equipment, oil products, metallurgical production, and manufacturing of finished metal products. The key industries are mechanical engineering and metalworking, followed by chemical and oil refining industries, forestry, wood processing and paper industries. The main area of the mechanical engineering industry is transport engineering, including car manufacturing, shipbuilding, diesel engine manufacturing, aircraft engineering, and machine tool engineering, with car manufacturing playing a primary role.

**The region is known for the world-recognized scientific schools:**

- radiophysics and electronics, including physics of solid microstructures
- nuclear and laser physics
- high energy physics
- nonlinear dynamics
- organometallic chemistry
- chemistry of high-purity substances
- microbiology
- high technologies in medicine: cardiology, traumatology, and orthopedics

**The Nizhny Novgorod Region** is a large agricultural region. The specializations of agriculture are: grain and potato production in crop farming and meat and dairy production and poultry farming in animal farming.

## NIZHNY NOVGOROD

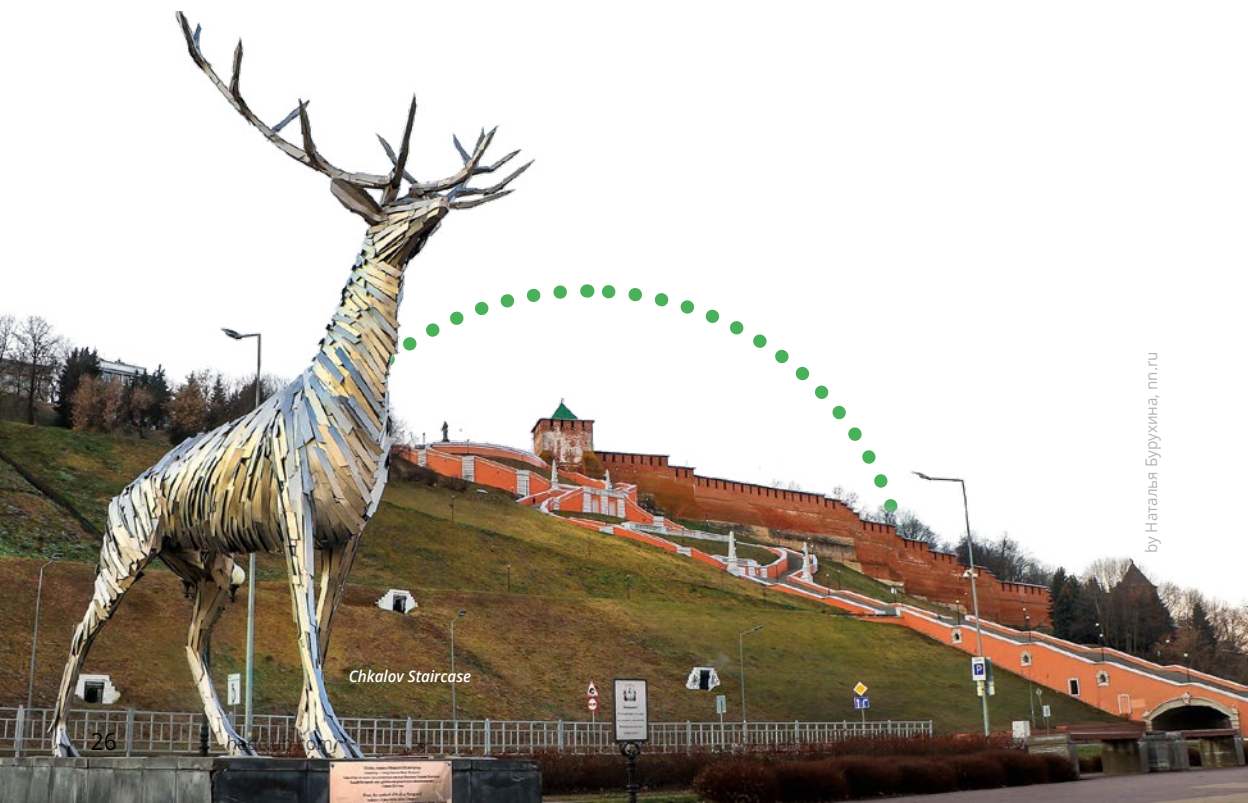

**The city of Nizhny Novgorod** – the region’s administrative center – is a large transport hub. Extensive water, railway, motor transport routes establish reliable ties with raw material supplies bases and districts – consumers of products manufactured in the region as well as large cultural centers.

Nizhny Novgorod is Russia’s largest industrial center with the enterprises of mechanical engineering, metalworking, and information technology playing a leading role.

**Nizhny Novgorod was founded in 1221 by Prince Yuri Vsevolodovich to protect Russian borders. Under Ivan III, Nizhny Novgorod was a sentry city. It had a regular army. This was the place for Moscow to march against Kazan.**

Nizhny Novgorod made a great contribution to the construction of the Russian state. In 1612, Kuzma Minin and Prince Dmitry Pozharsky’s militia from Nizhny Novgorod played a decisive role in the liberation of Moscow from Polish intervention.

During the Soviet period from 1932 to 1990, the city was named after Maxim Gorky, the Great Russian writer who was born there.

Today, the city, that once played such a significant role in the history of Russia, is turning into a modern metropolis. Nizhny Novgorod is Russia's largest center of river cruise tourism and the venue of Nizhny Novgorod fair-based international exhibitions.

Nizhny Novgorod is one of the richest cultural centers in Russia. The most prominent artists have received education in the local theater and art schools. The city has opened a large number of theaters, museums and cinemas.

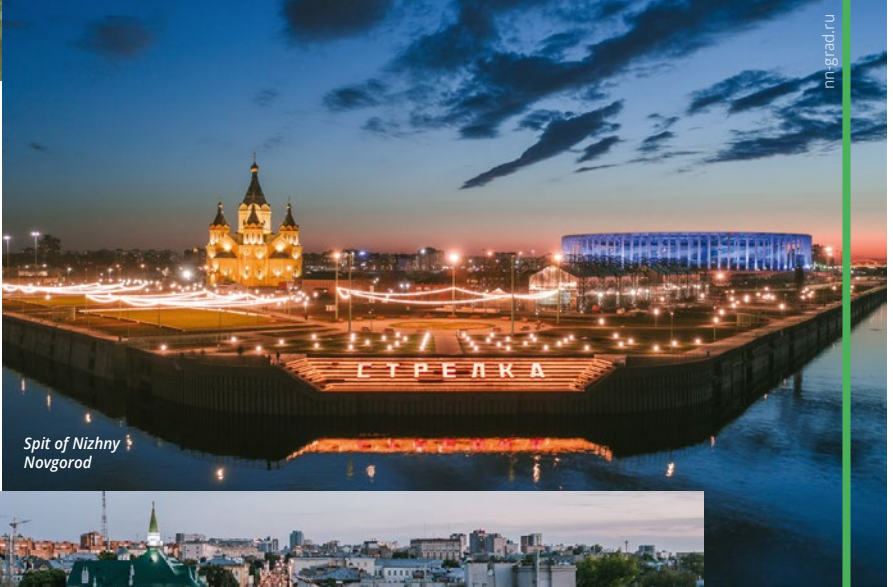

This city can surprise any traveler by an entwinement of modern and ancient buildings, each time rising before your eyes in a completely unexpected appearance.

## 10 FACTS ABOUT NIZHNY NOVGOROD

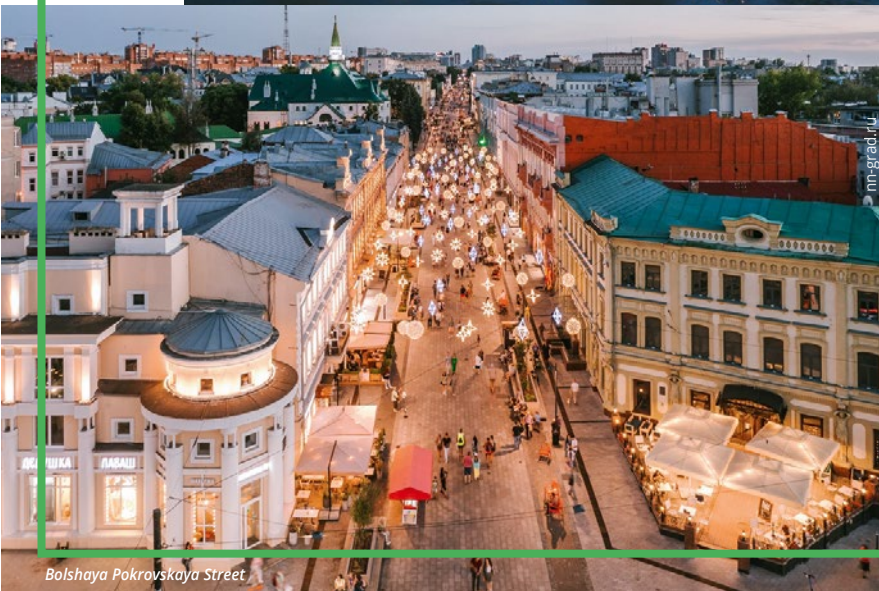

- 1 The most unassailable Kremlin in Russia was besieged five times in its entire history, but was never taken.
- 2 Nizhny Novgorod organized the famous militia led by Kozma Minin and Prince Dmitry Pozharsky that liberated Russia from Polish-Lithuanian intervention.
- 3 The city has two of the world's four churches built in a special inimitable style at the expense of merchant Grigory Stroganov, a famous "oligarch" of Petrin times.
- 4 Nizhny Novgorod has the longest pedestrian staircase in Russia. The staircase is eight-shaped and has 560 steps from both sides and 442 steps from bottom to top from the right side. The staircase looks solid from Volga, and that is precisely why Nizhny Novgorod residents not only hold track-and-field competitions on it, but also use it to create a unique art object.
- 5 The Upper Volga Embankment is 80 meters high, which makes it the highest embankment in Russia.
- 6 Nizhny Novgorod has a cableway, which is the longest one not only in Russia, but also in entire Europe. It is 3,362 meters long.
- 7 The name of Sormovo district was derived from the word "sram", or "sorom" (which means "shame"). Five hundred years ago, "soromnye" ("shameless") people – tramps and beggars were settled there.
- 8 Nizhny Novgorod boasts a lot of historic sights associated with Maxim Gorky. One of them is the Bugrovs' Poorhouse that has been preserved to the present day. It was a prototype of the famous homeless shelter from the Lower Depths play.
- 9 Nizhny Novgorod has a state-of-the-art planetarium, which is also an ambitious research center. The main hall of the planetarium is equipped with the system of Argus Planetarium projectors – one-of-a-kind Russian counterpart of Western projection systems. The Nizhny Novgorod Planetarium has a digital telescope and Russia's only spacecraft docking simulator accessible to visitors.
- 10 One of Stalin's bunkers built at the beginning of the Great Patriotic War, which was never used by the leader, is located in Nizhny Novgorod. The secret bomb shelter was called Special Facility N74.

# GORODETS

## FAMOUS FOR ITS CRAFTSPEOPLE

The Nizhny Novgorod Region is a picturesque region with numerous rivers and lakes, a major historic and cultural center, and an industrial and transport hub. Nizhny Novgorod is regularly ranked among the most developed and livable cities. Today we continue to familiarize you with the region and its sights. Fasten your seatbelts, everyone. We are leaving for Gorodets.

**Gorodets** is one of the oldest Russian fortress towns whose proud history stirs up many disputes among scholars even today. The exact date of the town's foundation is not fixed. However, starting out from the first references in chronicles, it can be said that the town was founded in 1150–1172. The fortress town was to protect the southern borders of the Russian state from raids of hostile neighbors. It was repeatedly attacked and was burned down, but it was always restored and had been a major trade, political and industrial center for centuries. In the 18th century, bread trade was booming and shipbuilding and woodworking crafts were developing here. And later, it was a place where the first major metallurgical, woodworking, and leather manufacturing plants of the Nizhny Novgorod Region were established.

Taking into account the Gorodets' status as a commercial and industrial center located at the intersection of the major trade routes, it is no wonder that it was a place where rich merchant families settled. And this fact was one of the drivers of the town and region's development. The splendid houses with rich and exquisite decoration, churches, hospitals, and the necessary infrastructure were built.

Gorodets is a place where Alexander Nevsky, Grand Prince of Vladimir, passed away in 1263.

Throughout its history, Gorodets has gone through periods of rise and fall caused by military clashes, disasters, political turbulence, and trade and industry development. **Today it is a major tourist center that attracts many tourists from across Russia and the world every year.**

**You can get from Nizhny Novgorod to Gorodets:**

-  by car
-  by commuter train
-  by bus
-  by motor ship  
(from May to September)

музейныйквартал.рф

## PLACES TO VISIT

Gorodets is exceptionally remarkable and beautiful. It is actually a museum town. Most of the ancient buildings have been preserved here. Local authorities make efforts to preserve the historic and cultural heritage in good order. So, in the uphill part you can enjoy a walk among the houses of the 19<sup>th</sup> century and delve into the atmosphere of that time.

The town center includes only four streets, including the streets named after Andrei Rublev, Vladimir Lenin, Alexander Nevsky, and Revolution Embankment. **And this is the place where all the main museums of Gorodets are located.**

- Museum House of Countess Panina (Rubleva Street, 16)
- Museum of Good (Revolution Embankment, 10)
- The Russian Samovar Museum (Revolution Embankment, 11)
- Regional Museum (Lenina Street, 11)
- Gorodets Gingerbread Museum (Lenina Street, 2)
- City of Masters (Yuri Dolgorukiy Embankment, 1)

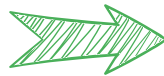

Museum Quarter  
in Gorodets

City of Masters

**City of Masters** is a whole complex where you can see the wooden architecture works of the 16th-19th centuries, from the princely tower to the peasant log house. Despite the fact that the buildings in the City of Masters are actually modern buildings constructed in the style of Old Russian wooden architecture, the complex is still the most visited site in Gorodets. It holds various events, meetings, master classes where you can get an idea of folk crafts in Gorodets and even learn to make toys and painted crockery.

Of the ancient fortress standing on the borders of the Old Russian state, only a small fragment of the fortress wall has been preserved until now. To see this sight, you should climb up the Knyazhya Gora mountain.

**Feodorovsky Monastery** – an active friary – is one of the most ancient Russian monasteries. It was founded in 1154. The sanctuary is most famous for its copy of the Feodorovskaya Icon of the Mother of God. The icon itself has not been preserved. It burned down together with the wooden chapel during the invasion of Batu Khan. The light and beautiful monastery complex, which is a witness of historic events, is open to parishioners and visitors.

**When in  
Gorodets,

quota places for foreign citizens

Nizhny Novgorod State Technical University n.a. R.E. Alekseev is one of the leading technical universities in the Volga Federal District. For 125 years, NNSTU has been maintaining its status as an advanced technical university with a mission to train engineering and research personnel for the industry.

### Tuition fees per year

Bachelor's programs 162,400–212,350 RUB

Master's programs 172,590–224,770 RUB

### 4 AREAS OF EDUCATION

- Social sciences
- Humanities
- Mathematical and natural sciences
- Engineering and technologies

**ADMISSION**

Everyone who wants to join NNSTU n.a. R.E. Alekseev can submit their documents for registration as an applicant both offline and online.

For this purpose, they must register in their Personal Account and send a full package of documents.

At the moment, Russia provides a government quota for foreigners to apply to Russian universities for Bachelor's, Master's or PhD programs and study in state-funded places. NNSTU n.a. R.E. Alekseev has allocated 550 quota places to foreign citizens.

**Nizhny Novgorod Polytech is  
a future-oriented university**

**PREPARATORY DEPARTMENT****Study areas:**

- Engineering and technology
- Medicine

**Form of study:** full-time

**Duration:** October – June

**Tuition fee 130,000 RUB**

Everyone interested can submit their documents for application review by sending scanned documents to ✉ [zorina@nntu.ru](mailto:zorina@nntu.ru).

**The list of documents:**

- A passport
- A notarized translation of the passport
- A certificate of previous education
- A notarized translation of the educational certificate

**At the end of the course, attendees get a certificate confirming the completion of the course at the Preparatory Department for Foreign Citizens if they successfully pass the exams.**

**The university development program includes the following strategic projects:**

- Engineering Systems for Next-Generation Nuclear Energy Centers and Laser Stations
- Green Economy: Technological Breakthrough and Environmental Safety
- Cybersecure Devices and Technologies of Electric Power Systems
- Design Technologies of Highly Automated Land and Water Transport
- Advanced Integrated Radar Systems for Transport Systems and Strategic Facilities

**NNSTU ADVANTAGES**

- The quality of education is confirmed by the positions in the leading global rankings
- The Nizhny Novgorod Region's leader and one of Russia's leaders in engineering personnel training
- The Priority 2030 program implementation
- Training of highly qualified personnel, intellectual and entrepreneurial elite
- Extensive research facilities and world-class research

The university is a flagship university of Rosatom State Corporation, United Shipbuilding Corporation, and United Aircraft Corporation.

## ADAPTATION

For successful socio-cultural adaptation of international students, the university holds plenty of **events** such as:

- City tours
- Language Days
- First-Year Student Days
- Visits to theaters and museums
- Days/weeks of international students' cultures by country/region
- Roundtable discussions
- Day of Languages
- Meetings with interesting people
- Festivals
- Conferences
- Master classes
- Workshops
- Various sports events

## SUMMER SCHOOLS

**From January to March, NNSTU n.a. R.E. Alekseev holds thematic schools on a regular basis.**

The schools' educational program is designed for students and graduates of NNSTU n.a. R.E. Alekseev as well as students of Russian and foreign universities, teachers, and visiting Russian and foreign experts.

Ahmed Said Amer,  
Associate Professor at the Department of Architectural  
Design of the Engineering Faculty of Menoufia University  
(Sibin-al-Kawm, Egypt), building design and construction  
consultant, graduate of Nizhny Novgorod State University  
of Architecture and Civil Engineering

# Russia – Egypt: a Policy of Rapprochement

Among graduates of Russian universities, you can find a lot of prominent figures and highly qualified specialists in a variety of fields of knowledge and science. Coming back home, they work for the good of their countries and become mentors for next generations of young specialists. Today's guest of our HED\_people column is Ahmed Said Amer, a graduate of Nizhny Novgorod State University of Architecture and Civil Engineering.

Studying in Russia became a very important stage of my life. The eventful and challenging stage that I managed to go through with the help of God.

**Take the Russian language, for instance. Learning a new language, immersion in an unfamiliar culture, building relationships with my colleagues and fellow students required major efforts. There can hardly be anything more important than motivation in learning the Russian language because it is very hard to learn. Pronunciation of all these long difficult words is a challenge for persistent learners.**

I was lucky to get the greatest support from my family on my way. My wife moved with me and accompanied me. Help and assistance from my teachers, colleagues, and even neighbors greatly facilitated the process of adaptation to a new country.

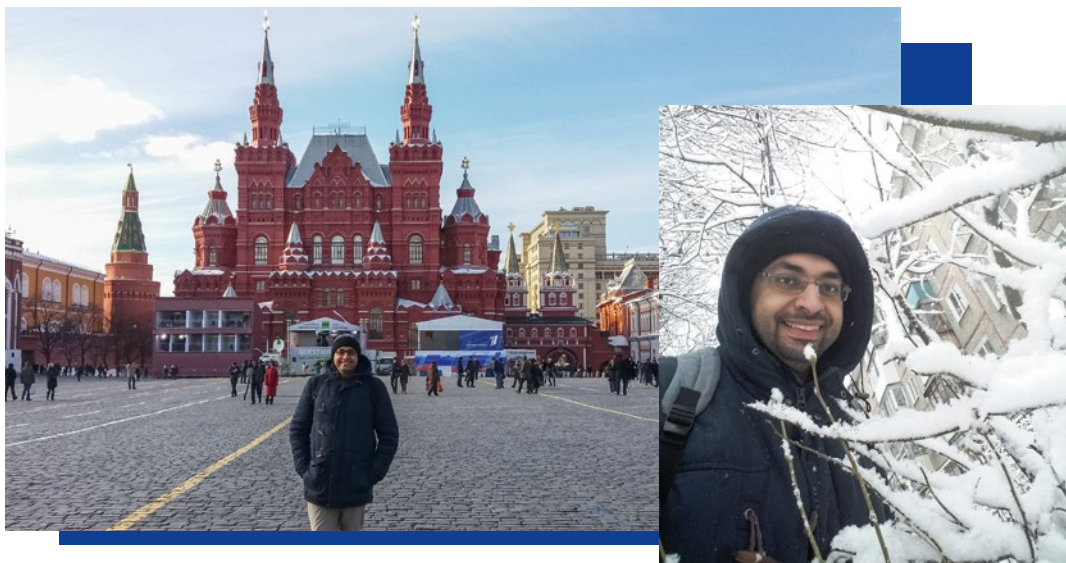

Or, for example, the quality of teaching and requirements for students. **I had occasion to be present at the defense of a doctoral thesis. And I was shocked by the serious approach to training of specialists in Russia. At that moment, I realized that it wouldn't be easy.**

One of the most persistent myths about Russia says that Russia is an extremely cold country. And that's what I really had occasion to experience. Russian winters are rather harsh. However, Russian people are welcoming and friendly. I learned it first hand.

At the very beginning, I was sent to Far Eastern Federal University. Here, in the east of Russia on the Russky Island, I studied Russian. And it was here that I realized how vast this country was. Next, I moved to Nizhny Novgorod, a beautiful city on the Volga River.

**In fact, I would advise everyone who is going to Russia or is already here to visit as many various cities as possible. The diversity of this country is really striking.**

**People often ask me, "Why Russia?" And what can I say? Why not? Russia is a wonderful country with a welcoming atmosphere, rich culture, and centuries-old history. And what is more, I acquired a taste for Russian food, especially borscht and fish. In Russia, there are so many ways to cook fish.**

I spent three years and nine months in Russia. I dealt with Russians at work, at university, in the street, at the market, and at the bank. Russians are really good people. They are proud of themselves and their history. They maintain their identity and cherish their traditions. Of course, all foreign policy challenges of recent years influence the world's perception of this country and its people, and this makes the development of cultural and educational relations between our countries even more important.

Egypt and Russia have an eventful history of bilateral relations. For example, President Gamal Abdel Nasser adopted a policy of rapprochement between the Egyptian and Russian peoples. This period went hand in hand with the development of economic, cultural, and humanitarian relations. Today we can see an increase in mutual interest between our countries.

**The Ministry of Higher Education of Egypt actively cooperates with the Ministry of Science and Higher Education of Russia.**

The current Minister of Higher Education of Egypt, Professor Mohamed Ashour studied in Russia and earned a PhD degree in Architecture. Everyone interested can go to study at Russian universities, getting a scholarship from the Russian Government.

I take the opportunity to thank everyone who helped and supported me. My wife, who didn't hesitate to embark on this long journey, my scientific supervisor, Professor Narenkov as well as Professors Anna Gelfond and Olga Oreleskaya. I am also grateful to all those unmentioned people fate brought me together with.

## POPULAR FIELDS OF STUDY

- Oil and Gas Engineering
- Chemical Engineering
- Economics
- Management
- Informatics and Computer Engineering

International students on an internship

A tour around the university's oil and gas facilities

Self-instruction

## OIL AND GAS ENGINEERING

### Bachelor's programs

- Drilling of Oil and Gas Wells (full-time)
- Operation and Maintenance of Oil Production Facilities (full-time)
- Operation and Maintenance of Gas and Gas Condensate Production Facilities and Underground Storages (full-time, part-time)
- Construction and Repair of Gas and Oil Pipelines and Storage Facilities (full-time, part-time)
- Operation and Maintenance of Transport and Storage Facilities for Oil, Gas and Refined Products (full-time, part-time)

- ✓ Experimental work at the department laboratories
- ✓ Work on onshore and offshore drilling simulators

### Career prospects

- Drilling supervisor, process engineer
- Manager
- Assistant driller, driller, well service operator, oil and gas production operator, operator of booster and cluster pump stations, water and oil pretreatment plants
- Production submanager at oil and gas companies
- Positions at design, engineering and research organizations

**Most international students are sought after by oil and gas companies all over the world.**

## ARRIVAL

Visitors are taken from the airport to the city by

 **Aeroexpress trains** from 470 RUB

 **Taxi** – 1,500 RUB on average

Metro is the fastest and the most comfortable transport in the city. The fare is 50–75 RUB per trip.

It is easy to get to the university, so students arriving in Moscow are met at the university at the address: **65, Leninsky Prospekt, bld. 1, Moscow**. The Akademicheskaya metro station.

Upon arrival, foreign citizens receive comprehensive visa support, but they must get health insurance themselves.

All foreign students are accommodated in the university campus – the comfortable dormitories. Each room accommodates 2-3 persons. The accommodation fee is around 20,000 RUB per year.

**The Week of National Cultures** is an annual event aiming to improve the relationship between the university's ethnic groups. The program includes a photo show of the unique sights of various nations, a quest game, the Guess a Movie contest, an exhibition of national costumes, national cuisines, and a gala concert.

## CAMPUS

- 5 dormitory buildings, over 4,000 places
- A gym, a skiing center, a football field with workout areas, basketball and volleyball courts
- Dance, instrumental, drama studios, a chess club, a movie club, an art studio and a recording studio

### INTERNATIONAL FRIENDSHIP CLUB

The social youth organization familiarizes students with the culture and creativity of various peoples in Russia and foreign countries. The Club works with 22 fellow countrymen associations established at the university. At the beginning of an academic year, they find "their" guys on the list of enrollees and help first-year students adapt to the university and Russia.

## PREPARATORY DEPARTMENT

Pirogov RNRMU trains students from foreign countries so that they can pursue higher and postgraduate education at our university or any other Russian university.

The preparatory courses of our university bring together attendees from more than 30 countries every year.

**Training is provided on a contract (fee-paying basis) and on a state-funded basis.**

**PLACES ALLOCATED**  
for the 2024-2025 academic year

75

fee-paying places

75

state-funded places

Preparatory  
courses

### COMPLETE COURSE (10 months)

- **1<sup>st</sup> semester:** Russian language (general linguistic course)
- **2<sup>nd</sup> semester:** Russian language (terminology)

Studying the major subjects taught in Russian, such as Chemistry, Physics, Mathematics, and Biology.

**Tuition fee 320,000 RUB**

### CRASH COURSE (4 months)

- **One semester:** Russian language (general linguistic course and terminology)

Studying the major subjects taught in Russian, such as Chemistry, Physics, Mathematics, and Biology.

**Tuition fee 160,000 RUB**

## REASONS TO CHOOSE PIROGOV RNRMU

- 1 **The quality of education.** The university offers high-quality education based on academic excellence and cutting-edge research. The educational programs have been developed taking into account current healthcare demands and needs.
- 2 **Reputation and recognition.** The university has a solid reputation and is recognized locally and globally.
- 3 **Resources and equipment.** The university invests in its study programs and boasts state-of-the-art equipment, technology, and laboratories that provide our students with access to advanced methods and practical experience.
- 4 **International cooperation.** We actively cooperate with many universities and organizations worldwide. This provides our students with the opportunities to go on exchange programs, study in other countries, and participate in international projects, which contributes to their cross-cultural experience and development.
- 5 **Real opportunities for career advancement.** The university establishes strong relationships with various companies and industries, which provides students with extensive access to internships and practical work. The university has the Student and Graduate Employment Promotion Center.
- 6 We offer the opportunity to undergo assessment to get a permit to work as middle grade medical staff.

## REQUIRED DOCUMENTS

Students from foreign countries apply for entrance exam preparation courses with prior registration.

### Application dates:

- July 17 - September 30  
(for the complete course)
- January 10-30  
(for the crash course)

### The list of documents required for admission of foreign citizens:

- Personal application
- Originals and copies of academic credentials. The academic credentials should be translated into Russian (the translation is notarized in the Russian consulate in the country of residence or in the Russian Federation)
- Medical certificate confirming the absence of medical contraindications to studying in the Russian Federation, including the results of HIV infection, hepatitis C, syphilis, and tuberculosis tests

- Dentistry: 5 years of study, full-time
- Dentistry, specialization "Dental Care Provision within the International Standards": 5 years of study, full-time
- Osteopathy: 5 years of study, full-time.

**The first Specialist's program in Osteopathy in Russia**

### **Master's program**

- Public Health: 2 years of study, full-time

**As well as more than 70 residency specialties.**

## **PREPARATORY DEPARTMENT**

The Preparatory Department of NWSMU named after I.I. Mechnikov prepares foreign citizens for admission to Bachelor's and Specialist's programs as well as residency and PhD programs taught in Russian. Attendees study the language at a high level and take natural sciences courses.

**Mode of study:** full-time

**Groups:** up to 10 people

**Duration:** November 1 - August 31

- Russian language course that develops the capacity and readiness for written and oral communication in Russian
- Courses in some subjects (Chemistry, Biology, Physics, and Mathematics) necessary for studying at a Russian medical university
- Closing the basic education gaps
- Acquiring laboratory skills, note-taking skills and skills in working independently with study books as well as skills in working with Russian-language scientific texts
- Attending cultural events
- Studying and living in Saint Petersburg, one of the most beautiful cities in the world

### **Programs:**

- University entrance preparation
- Russian for foreign postgraduate applicants

# GENERAL MEDICINE / GENERAL MEDICINE IN ENGLISH

**Duration:** 6 years

**Languages of instruction:**

 Russian /  English

**Tuition fee per year:**

**from 331,000 RUB / from 420,500 RUB**

**There are state-funded and quota places** for the General Medicine program taught in Russian.

Students specializing in General Medicine are trained in accordance with the Federal State Educational Standard. The high quality of university training is ensured by highly qualified teachers, including around 120 Professors and 160 Associate Professors. Training is provided at the university's clinical facilities and at major municipal polyclinics and in-patient clinics in Saint Petersburg. Simulation training, scenario-based learning, and problem-based learning are widely used.

**The multicultural student community helps adapt to the study and living environment.**

## ADVANTAGES

- Practice-based learning
- Academic exchange programs
- Grants and internships
- Participation in multidisciplinary Olympiads
- Graduate employment promotion

**Medical graduates have advanced qualifications necessary for:**

- working at medical and preventive institutions
- prevention and early detection of various diseases
- provision of elective and emergency care
- making a clinical diagnosis and treatment of patients
- scientific and teaching activities

## CAREER PROSPECTS

**Graduates get successfully employed by:**

- medical and preventive institutions
- health and medical authorities
- research institutions

# DENTISTRY

**Duration:** 5 years

**Languages of instruction:**

 English,  Russian

**Tuition fee per year:** from 409,700 RUB

This unique Dentistry program places emphasis on mastering the Russian language in the first years of study, honing practical phantom skills, and preparing students for practical activities within international standards. Students master the program individually with professional tutors taking into account innovative dental technologies on state-of-the-art phantom and clinical equipment.

The university trains highly qualified doctors in accordance with the best achievements in Russian and world science. They have advanced diagnostics and treatment technologies at their fingertips and are capable of working in the current economic environment and achieving significant results in public health protection.

Our graduates are top-notch dental specialists and successful people.

## ADVANTAGES

- Russian language course
- Practical training at the university's clinical facilities
- Phantom-based practical training
- Mentoring

### Medical graduates have advanced qualifications necessary for:

- provision of dental care on an outpatient basis and on a day-patient basis within international standards
- participation in medical rehabilitation of patients with dental diseases
- teaching patients to carry out core health-promoting hygiene activities that help prevent dental diseases and improve their health

## USUE ADVANTAGES

- USUE offers high-quality training of highly qualified specialists in various areas of economics, finance, regional and municipal economy and economics and management, food technologies, merchandising, service and tourism
- In these fields of study, the university trains Bachelors, Masters and PhDs in accounting and audit, regional economy, logistics, marketing, management, world economy, and many other areas
- For three years, USUE has been the leader among the universities, the graduates of which are the highest-paying specialists in Yekaterinburg labor market, according to the *Business Quarter* magazine
- USUE was placed 14th in the ranking of the best Russian universities by the level of graduate salary in economics and finance, according to the SuperJob portal
- USUE provides active assistance to students, who have successfully mastered Russian speaking and writing skills, to undertake pre-graduation internship at various financial organizations. And, if they get a resident permit or Russian citizenship, USUE assists them in finding jobs at banks, auditing, logistics and other companies in the Urals region

Master graduates with a degree in International Business, the program taught in English

Russian language lesson at the Preparatory Faculty for Foreign Citizens

### PREPARATORY FACULTY FOR FOREIGN CITIZENS

**Duration** 10 months

- **Economics**  
125,000 RUB ≈ 1,400 USD
- **Medicine**  
140,000 RUB ≈ 1,600 USD  
**Medicine and Pharmacy** – enrollment with the opportunity to study at Saint Petersburg State Chemical and Pharmaceutical University, Perm State Pharmaceutical Academy
- **Engineering**  
130,000 RUB ≈ 1,500 USD
- **Natural Sciences**  
130,000 RUB ≈ 1,500 USD
- **Humanities**  
130,000 RUB ≈ 1,500 USD  
Enrollment with the opportunity to study at Ural Federal University
- **Culture, Art, Creativity**  
130,000 RUB ≈ 1,500 USD  
Enrollment with the opportunity to study at Yekaterinburg State Theater Institute

### ENGLISH LANGUAGE

**Tuition fee** 90,000 RUB ≈ 996 USD

Distance learning

### RUSSIAN AND ENGLISH LANGUAGES COURSE

**Tuition fee** 110,000 RUB ≈ 1,217 USD

Distance learning

### POPULAR PROGRAMS

#### Railway Operation

- Railway Automatics and Telemechanics
- Trunk Transport

#### Operation of Automobile Transport and Transport Infrastructure

Enrollment with the opportunity to study at Ural State University of Railway Transport

#### NEW! Aircraft Engineering

- Operation and Maintenance of Aircraft and Engines  
Enrollment with the opportunity to study at Ufa State Aviation Technical University

#### NEW! Oil and Gas Engineering

- Oil and Gas Engineering and Technologies
- Operation and Maintenance of Oil and Gas Processing Facilities  
Enrollment with the opportunity to study at Industrial University of Tyumen
- Oil and Gas Well Drilling
- Operation and Maintenance of Oil and Gas Production Facilities  
Enrollment with the opportunity to study at Gubkin Russian State University of Oil and Gas (National Research University)

The group of Arab students pursuing Bachelor's and Master's programs

## **INSTITUTES**

- Digital Technologies of Management and Information Security
- Management, Entrepreneurship and Engineering
- State, Municipal Management and Law
- Economics and Finance
- Master's studies
- Continuous and Distance Education
- Strategic Planning and Financial Analysis

Fields of study

## **INTERNATIONAL COOPERATION**

- Over 157 cooperation agreements with the universities in 39 countries
- Parallel study programs

## **SCIENTIFIC SCHOOLS**

- Study of electrochemical processes and development of electrochemical sensors, methodological support, software and instrumentation for monitoring of humans' living environment and health
- Environmental economics
- Social sphere finance
- Regional economy in the system of spatial economics
- Food security
- Macroeconomic aspects of the development of the world economy and regional economy

### **Hamid Khan, Afghanistan**

I came from Afghanistan to learn Russian. Living in Russia and knowing Russian is my dream.

After completing the Preparatory Faculty I entered the Bachelor's program at USUE. You can get a really high-quality education here. Many of my friends studied at USUE and got excellent jobs.

When I came, I was met by the university staff members and accommodated in the student dormitory. Even before my arrival, the staff members always kept in touch with me, informed me when the invitation would be issued, wrote the letter to the consulate asking them to assist me in getting a visa, and notified them that the university was waiting for me.

Here we have good and highly qualified teachers that can answer any question. Besides giving classes, they acquaint us with the city and conduct tours.

# FOUNDATION PROGRAM

## The course of Russian as a Foreign Language and major disciplines

**The intensive course** with immersion in the cultural environment helps students master Russian from scratch to the level sufficient for enrolling at a Russian university and studying there. The eventful extracurricular program of the course includes acquaintance with the city and visits to theaters and museums.

650 hours of the Russian language and 550 hours of subjects in the chosen study area.

**Duration:** 10 months

**Language of instruction:** Russian 🇷🇺

**Tuition fee** **99,000 RUB** ≈ 1,200 USD  
(the exchange rate can fluctuate)

### Study areas

- Engineering sciences – engineering, information technology, car manufacturing, civil engineering, architecture
- Humanities – law, history, linguistics, psychology
- Medical sciences – sport and health research
- Economic sciences – economics, management, marketing, business administration, econometrics
- Natural sciences – biology, physics, chemistry, nanotechnologies

After completing the course, students obtain the Russian language proficiency certificate.

# MECHATRONICS AND ROBOTICS

## Computer-Aided Control Technologies in Robotics

### Bachelor's / Master's program

**Duration:** 4 / 2 years

**Language of instruction:**

Russian 🇷🇺, English 🇬🇧

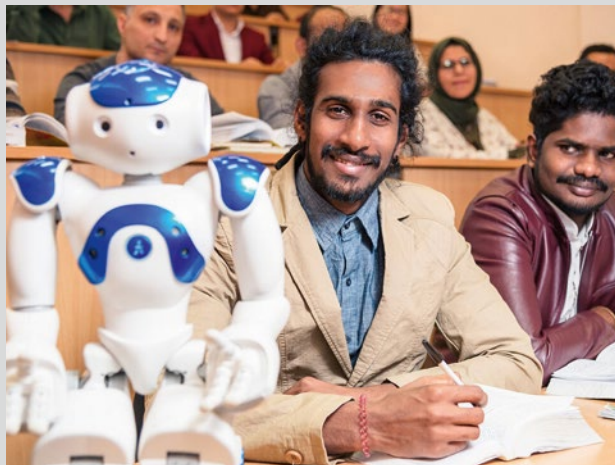

**Tuition fees per year:**

**159,000 / 169,000 RUB**

≈ 1,750 / 1,860 USD

### The Mechatronics and Robotics program offers:

- A modern profession sought after by innovative enterprises
- Participation in university, all-Russian, and international student Olympiads, contests, and competitions in the field of the profession being acquired, which are held, in particular, in various Russian cities and abroad
- Participation in international student exchange and academic mobility programs
- In-depth study of the English language and mastering the supplementary educational program "Translator in the Sphere of Professional Communication" with a second university degree
- European Diploma Supplement
- The opportunity to continue education by pursuing Master's and PhD degrees at SUSU
- Participation in sports, cultural, and scientific events organized by the university and the Instrumentation Engineering Faculty

One of the most innovative production plants in Chelyabinsk – Vysota 239 (Height 239) of Chelyabinsk Pipe Rolling Plant is the **practical training facility** for students.

**Graduates** of the Mechatronics and Robotics program can design computer control systems for mechatronic and robotic systems, develop process engineering solutions to produce them and test methods, operate and repair state-of-the-art robotic and mechatronic equipment.

Recent graduates are in high demand and have the opportunity to be employed by modern engineering companies and high-technology production enterprises, in particular, in the defense industry, mechanical engineering, power engineering, metallurgy, the transport industry, car manufacturing, dealing with design, production, adjustment, and operation of state-of-the-art robotic equipment.

# BIOTECHNOLOGY

## Industrial and Environmental Biotechnology

### Master's program

**Duration:** 2 years

**Language of instruction:** English 

**Tuition fees per year:** **169,000 RUB**  
≈ 1,860 USD

**Among the teachers** of major disciplines are well-known international researchers from  Australia,  India, and  Bulgaria as well as heads and leading specialists of food industry enterprises.

### While studying, students:

- ✓ Acquire practical skills in developing and manufacturing biotechnological products, including functional products
- ✓ Gain world-class knowledge and practical experience at the top enterprises of the industry
- ✓ Participate in scientific projects implemented jointly with the industrial partners at the platform of the International Laboratory of Synthesis and Analysis of Food Ingredients as well as the Russian-Chinese Joint Research Laboratory of Food Biotechnology
- ✓ Learn to launch new technologies as well as streamline the processes at biotechnology facilities aimed at import substitution: pharmaceuticals, the agro-industrial sector, and food manufacturing

**The program graduates** are sought after by food industry enterprises, research institutes, biotechnology laboratories and can work as:

- Process engineers
- Biotechnology engineers
- Biotechnological (pharmaceutical) production engineers
- Process engineers at departments of production process development and optimization
- Staff members at quality control departments
- Biotech data analysts
