Russian Higher Education

for Applicants from Mongolia

Mongolia highly values the level of Russian education, shows great interest in the culture of our country. There has been an increase in the number of quota places to study at Russian universities. Offline and online events organized by Rossotrudnichestvo allow the university representatives to get acquainted with school students and take part in the selection of the most talented applicants.

Acting Head of the Rossotrudnichestvo representative office in Mongolia, Acting Director of the Russian House in Ulaanbaatar Valeria Kilpyakova talks about how Mongolian young people apply to Russian universities, what majors they choose, and about many other interesting things.

ABOUT MOTIVATION TO APPLY TO RUSSIAN UNIVERSITIES

The prestige of Russian higher education, despite some decline in the beginning of the post-Socialist period, is maintained at a rather high level.

Firstly, Mongolia still has the socialist-era infrastructure technologically based on Soviet/Russian standards – the Ulanbaatar railway, the Erdenet mining and processing plant, the CHP system. **Maintenance and periodic update of these technologically complex facilities requires relevant specialists that can be trained only in Russia.**

Secondly, academic and educational relations established in the course of socialist years, in particular, through the system of joint research expeditions, also could not disappear completely. **The need to continue research objectively created an environment for the reproduction of new personnel by sending Mongolian young people to Russian universities.** The factor of influence of the older generation of Mongolians on their young compatriots' mindsets plays an important part.

8,000

Mongolian students are studying at Russian universities

≈70,000

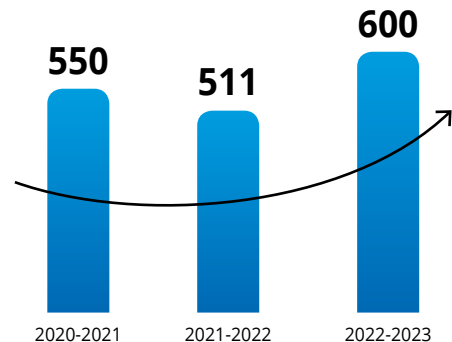

Mongolian citizens have obtained a higher education in the USSR and the Russian Federation

ABOUT QUOTAS

The number of quotas increases from year to year, and competition is low so far. Due to the pandemic, competition at Russian universities reduced to two applicants per place. This is due in no small part to poor knowledge of the Russian language because of the insufficient number of Russian language classes on the school curriculum: two hours per week in 7-8th grades, three hours in 9th grades, and senior – 12th grades have no Russian language on the curriculum at all.

Education quotas for Mongolian citizens

ABOUT WHERE TO SEARCH FOR THE INFORMATION ON RUSSIAN UNIVERSITIES

People mostly search for the information on Russian universities on social media platforms (the page of the Russian House in Ulaanbaatar on Facebook (Meta is banned across the Russian Federation) has 25,000 followers), from relatives and friends, on the website of the Ministry of Education of Mongolia, radio and TV.

The Russian House hosts live streams on Facebook (Meta is banned across the Russian Federation), online education fairs, career guidance events with the participation of universities. Such online meetings have been actively introduced since the second half of 2021.

The information on the study opportunities in Russia is disseminated through Russian Language Centers (RLC) supervised by the Russian House. There are 53 RLC throughout Mongolia: 24 in Ulaanbaatar and 29 in aimaks.

Russian language Olympiads in aimaks allow gifted children from faraway provinces to obtain certificates that guarantee free tuition at Russian universities funded by the Russian Government.

The Russian House actively cooperates with Russian schools where Mongolian citizens study. For example, with the branch of Plekhanov Russian University of Economics – 1,700 students, the joint Mongolian-Russian school № 3 – 2,700 students.

Biblionight at the Russian House in Ulaanbaatar

ABOUT ADMISSION TO RUSSIAN UNIVERSITIES

The Rossotrudnichestvo representative office is Mongolia's single operator to recruit foreign citizens to fill the Russian Government quotas. Applicants register on education-in-russia.com and participate in the portfolio competition.

Valeria Kilpyakova

The portfolio competition has been held at the Rossotrudnichestvo representative office in Mongolia since 2020. In pre-covid times, the representatives of top Russian universities used to come to Mongolia and conduct selective tests.

Young people planning to apply as first-year university students are interviewed. These are mostly school leavers who finished schools using Russian educational programs. Other Mongolian applicants join the preparatory faculty, so the portfolio competition is held for them.

To pass the competitive selection and make the list of candidates, young people should take an active part on the Olympiads on major subjects, as well as in the Russian language and other subjects competitions. University Olympiads add some points to the candidate's portfolio, and their public and volunteering activities and participation in sports and cultural and educational contests and festivals, research and practice conferences are also taken into account.

We recommend that those dreaming of studying in Russia follow the page of the Russian House in Ulaanbaatar on Facebook (Meta is banned across the Russian Federation) which contains detailed information on requirements and conditions for participation in selective tests.

From now on, each candidate becomes personally responsible, which is the first step towards completion of selective tests.

ABOUT POPULAR MAJORS

Russia's higher education system traditionally has a high-quality school of training specialists for various sectors of the economy, so active career guidance counseling for school and university students, including Mongolian ones, is always relevant. Now our task is to turn young people's attention to regional universities of Russia, not only Moscow or Saint Petersburg universities. We offer excellent higher education in Krasnoyarsk, Novosibirsk, Ulan-Ude, and other territories located near to Mongolia.

Such fields of study as medicine, law, international relations, economics are especially popular among Mongolian students. The number of those wishing to pursue a degree in Psychology is on the increase. IT and engineering majors also become popular.

In the coming years, Mongolia may need, in relation to construction of the Soyuz Vostok pipeline, professionals specializing in Electric Power Engineering and Electrical Engineering; Oil and Gas Engineering; Automation of Technological Processes and Production. Tomsk Polytechnic University has already announced its readiness to start admitting and teaching students from Mongolia in the following academic year.

Today more than 300 citizens of Mongolia have a TPU degree. The cluster which is being developed now – the Russian House in Ulaanbaatar – the Soyuz Vostok pipeline – TPU does the work for the long run. **The personnel for the pipeline the section of which will cross Mongolia may be needed very soon, and Mongolian young people are very likely to get a prestigious and sought-after profession.**

Aspects of admission of Mongolian applicants

In 2022, we celebrate the 100th anniversary of the day when the first Mongolian students were admitted to Soviet and Russian universities and more than 100 years of diplomatic relations between our friendly countries. For Mongolian students, studying in Russia is an opportunity not only to get a decent education but also to live in a beautiful country with rich culture and outstanding art. Former school students can apply to Russian universities for educational programs of higher, secondary, and continuing professional education.

To familiarize Mongolian young people with higher education in Russia, we have collected the key aspects of admission to Russian universities.

“

Dorzhyamyn Byambasuren, Master's student at Buryat State Academy of Agriculture, agronomist

Career development is very important to me. To begin with, I ask myself, "If I choose one or another country and university of this country, what practical benefits will I have in Mongolia?" That's why, keeping in mind my interests and plans for the future, I've chosen a Russian university.

First of all, I've made my choice because the animal breeding and economic management methods in Buryatia, especially in Selenginsky District, are very similar to the same methods in the central aimaks of Mongolia. After graduation from the Russian university I'll be able to put the acquired knowledge into practice in my home country.

“

Mungunshagay Davyd, PhD student at Buryat State University, political scientist

I, for one, chose this university because of its territorial proximity to Mongolia. That's why I started examining the information about the cities and universities which are within reach. Of course, the first city I considered was Irkutsk, which is well known by many Mongolians, but the admission threshold there was higher than that in Ulan-Ude.

WHY DO MONGOLIAN CITIZENS CHOOSE RUSSIAN EDUCATION?¹

- 1 An opportunity to build business contacts in the professional sphere
- 2 The strong similarity between Russian and Mongolian cultures and mentalities
- 3 Prestige of Russian education
- 4 Comfortable living conditions, from a similar climate and homelike landscape to similar cultural and language practices

¹ A.V. Kombaev, M. Davyd. Russian Education as Soft Power: Educational Strategies of Mongolian Students // Power. 2022. Volume 30. № 3. P. 216-220

KEA AREAS OF RUSSIAN-MONGOLIAN BUSINESS COOPERATION

- 1 Mining industry, oil refining, gasification, power engineering, railway transport, air transportation, logistics
- 2 Leather, industrial and textile production, construction and production of building materials, air and water purification, softscape, and processing and storage of agricultural and animal products
- 3 Food product manufacturing, supermarket chains, tourism (wellness, environmental, heritage, extreme tourism), healthcare (medical technologies and services, medicines and medical equipment), culture, science, education

Dulamsurenngiyn Davaa, Ambassador Extraordinary and Plenipotentiary of Mongolia to Russia

Russian-Mongolian cooperation in education and culture is of key importance. There are new generations that often have had no opportunity to learn about the traditions of friendship between our peoples. We should put an end to this trend through joint efforts.

Our art specialists study in Russia again. Our opera singers are successfully employed by famous Russian theaters. For example, the holder of the Mongolian higher state order of Chingis Khaan, Distinguished Artist of Mongololia, talented singer Ganbaataryn Ariunbaatar performs on the stage of the Mariinsky Theater in Saint Petersburg.

STAFFING NEEDS OF MONGOLIA'S ECONOMY

- Engineering and technology majors (for example, for the new project of the Gazprom company)
- Agriculture majors
- Medical specialties
- Specialists in trade, business, economics and finance
- Specialists in education, transport, and military science

POPULAR PROFESSIONS AMONG MONGOLIAN STUDENTS

- Engineers
- IT specialists
- Healthcare professionals
- Lawyers
- Economists
- Managers
- Foreign affairs experts

ADMISSION TO RUSSIAN UNIVERSITIES

Every year the Russian Government allocates quota (free for students) places for Mongolian young people to study at Russian universities. There were 600 such places this year.

Mongolian citizens can also study at Russian universities on a fee-paying basis. The cost of the educational programs is significantly lower than that of programs at universities in Europe and America, and Asian countries.

LEARNING RUSSIAN

- Russian schools in Ulaanbaatar that teach Mongolian children under Russian programs
- Ulaanbaatar branch of Plekhanov Russian University of Economics
- Tours around Russian cities for the winners of trivia games organized with support from Rossotrudnichestvo

Three Mongolian schoolgirls sent to the Artek International Children's Center under the Rossotrudnichestvo program "Hello, Russia!" successfully performed in the All-Russian contest "Big School-Break." And the winner Khenzee Nomundar will go on a tour from Saint Petersburg to Vladivostok.

RUSSIAN HOUSE IN MONGOLIA

Russia and Mongolia have long been maintaining amicable relations. They have been cultivating contacts in the field of science, education, culture, sports, and other areas. The Russian-Mongolian friendship days and cross festivals of culture are held on a regular basis. Many Russian universities cooperate with educational institutions in Mongolia.

To familiarize school students with Russian education, the Rossotrudnichestvo representative office – Russian House in Ulaanbaatar – holds some events for them:

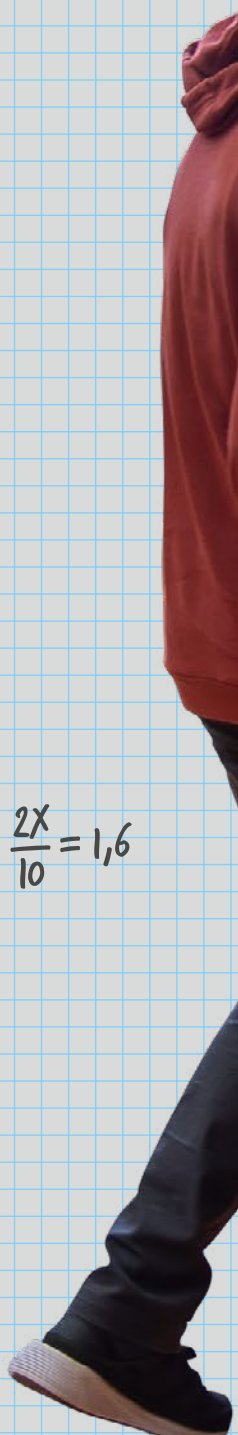

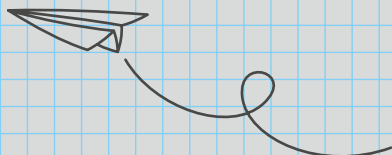

- Russian language and natural sciences Olympiads – the winners can get an education quota place at a Russian university
- Russian language courses – if attendees successfully complete them, they can apply for an education quota place at a Russian university
- various events held in Russian and with the translation into Mongolian
- educational services fairs where staff members of prestigious Russian universities present their educational programs and tell the participants about admission requirements

ADMISSION REGULATIONS AT RUSSIAN UNIVERSITIES

- 1** Foreign citizens can take entrance exams held by the university even if they have valid results of the Unified State Exams. The admission office will take into consideration a better result.
- 2** Foreign citizens have the right to combine the results of the Unified State Exams (USE) and entrance exams. For example, if the applicant passes the USE in the Russian language with high scores, they submit the result to the admission office. But if the applicant is dissatisfied with their USE score in mathematics, they can take the entrance exam to try to improve their result. Finally, the highest score is chosen.
- 3** Foreign citizens are eligible for state-funded places if they apply under the international education agreements or have compatriot status. Applicants applying within the Russian Government quotas apply to a university as part of a special competition for foreign nationals.
- 4** Those applying as compatriots cannot exercise special rights – neither social rights nor rights related to the applicant's achievements.
- 5** Some universities have reduced the number of entrance exams for international applicants applying for fee-paying places (on a contract basis) to one. Foreign citizens apply as part of a special competition without competing with Russian applicants. However, you should bear in mind that the number of entrance exams is determined by a university itself. You must get more specific information from the admission office.
- 6** The procedure for translating foreign documents into Russian is changed. Some universities undertook to perform this procedure.
- 7** The document recognition certificate (if necessary) is submitted not later than on the day of enrollment consent submission. So you should find out beforehand where you can undergo this procedure, how to pay the duty, and clarify other issues for yourself.
- 8** Foreign documents must be legalized, if necessary.

$$\frac{2x}{10} = 1,6$$

$$6-2-2=2$$

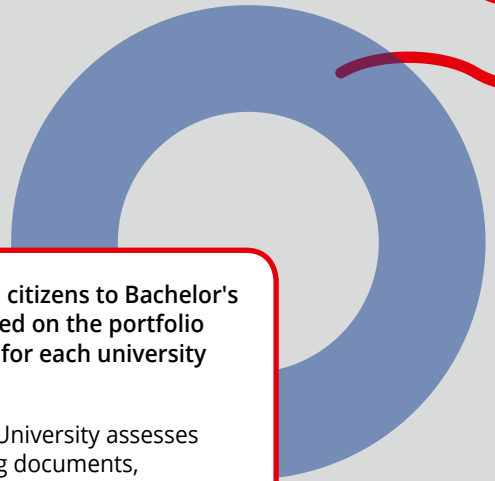

ENTRY REQUIREMENTS FOR RUSSIA

- Russia entry form completed on the State Services website
- Valid negative PCR test and retest taken within 72 hours from the date of arrival in Russia. As of the date of receiving the test results in Russia, students must isolate themselves. At the same time, they can study online
- If the PCR test is positive, applicants or students undergo a two-week quarantine
- To continue their education offline, international students must submit two negative PCR tests to the university

To find out more about admission to Russian universities, adaptation and life in Russia, read other HED magazine issues.

Some top universities admit foreign citizens to Bachelor's / Master's / Specialist programs based on the portfolio competition. Prepare separate files for each university you are going to apply to.

For example, Saint Petersburg State University assesses motivations letters, academic training documents, documents confirming the level of proficiency in the language of instruction as well as individual achievements.

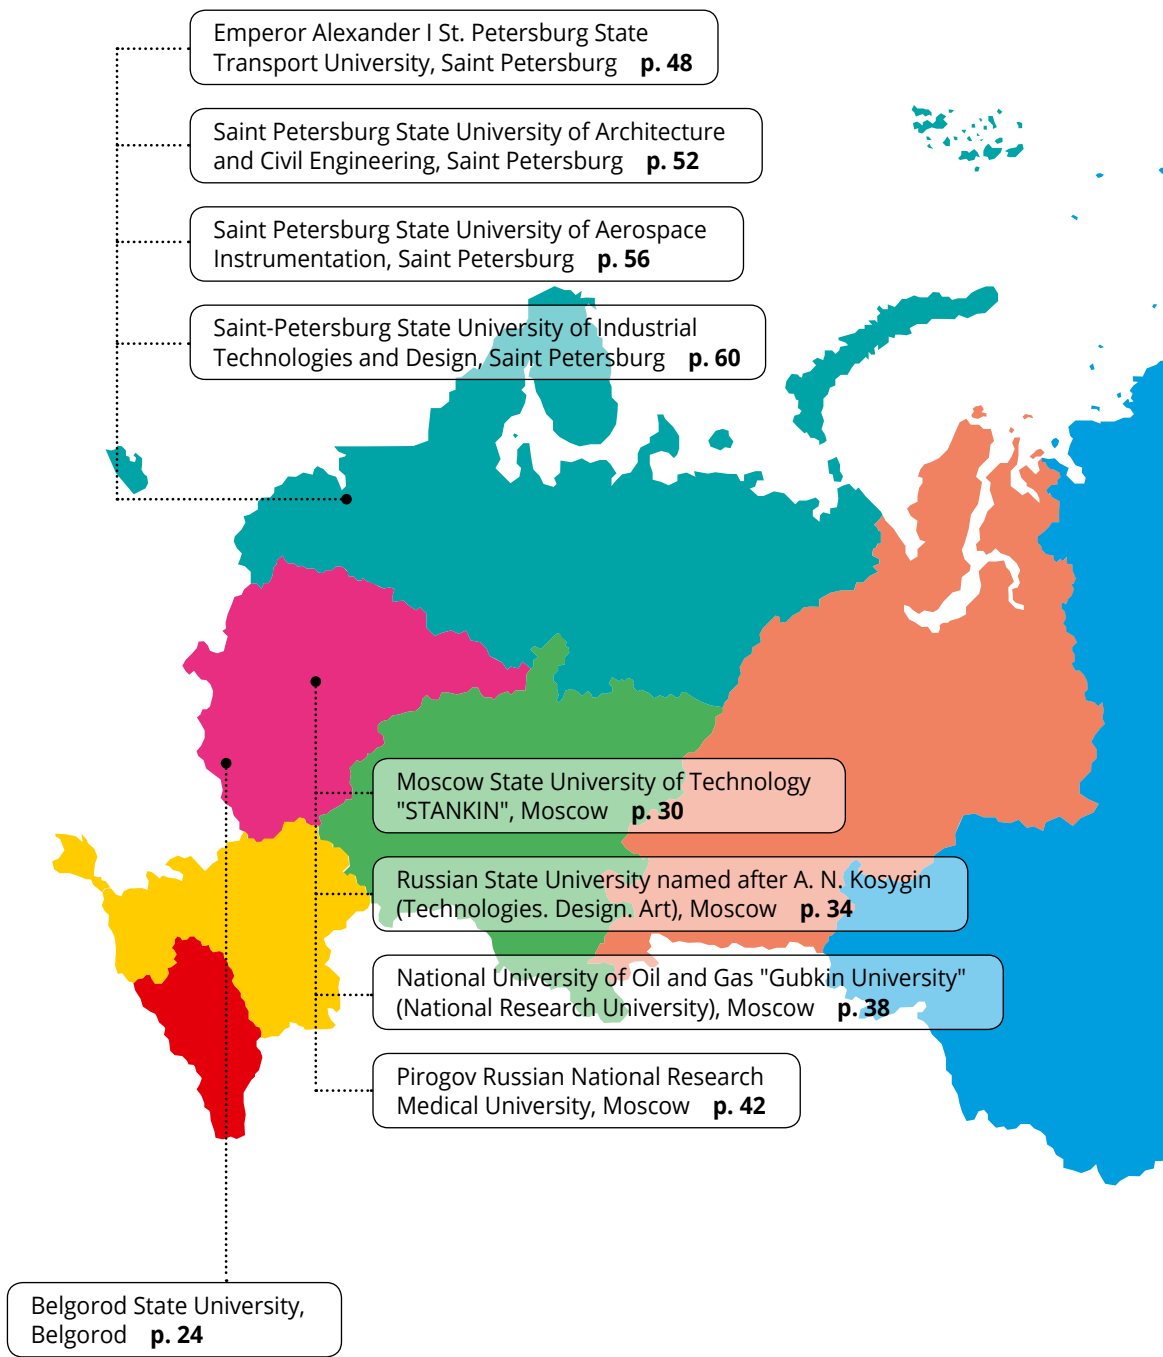

Peoples' Friendship University of Russia will count the grade average of the previous education result. Special focus will be on the subjects related to future majors, participation in major disciplines contests, recommendations from non-governmental organizations, unions, associations of Russian and foreign institutions. For Master's programs, the positions of the previous university in the world ranking will be taken into account.

Mongolian graduates of Russian universities come home after graduation with solid background and hold senior positions at the ministries, major enterprises, in the real sector of the economy.

BELGOROD

The Belgorod Region is a Russian region with one of the most thriving economies. Belgorod, the capital of the Belgorod Region, boasts abundant greenery and clean air.

In 2021, the Belgorod Region was ranked among the Top 5 regions with the best living standards

- Plenty of forests having a positive impact on ecology
- Affordable accommodation
- Very clean city
- High-standard medical services
- Low crime rate
- Tasty and clean water

AVERAGE EXPENSES

10,000 RUB per month – renting an apartment, exclusive of utilities

8,000 RUB per month – food expenses

200-250 RUB – a taxi trip

120-150 RUB – a cup of cappuccino at a cafe

AVERAGE TEMPERATURE

-8,5 °C

in January

+19,9 °C

in July

The climate is mild, autumn is rather warm and rainy. It usually starts snowing in October-November. Winters can be very cold – the temperature can drop below -30 °C in February.

TRANSFER

- The distance to Moscow is 700 km. This is one night by train or one hour by plane
- The international airport in Belgorod is located within the city limits – you can get there even by trolleybus
- You can fly away from Moscow to Belgorod ten times a day. The average ticket price is around 4,000 RUB
- There are scheduled flights to Saint Petersburg, Kazan, and other cities

POPULAR CAFÉ

Belgorod has its own fast food chain – Orange Island, with two kinds of fast food outlets. Orange stalls sell tea, coffee, and puff pastry at affordable prices. You can find mini cafés of the Orange Island in the parks and public gardens. The menu includes burgers, salads, soups, pasta. The bill is 300-500 RUB.

Belgorod has a drama theater and a philharmonic which are regularly visited by famous musicians

“

Avetis Grigoryan, Uzbekistan. The second-year student at the Faculty of Foreign Languages of the Institute of Pedagogy, majoring in English and History

I entered BelSU on my acquaintances' recommendations, and I chose this faculty because I have a good command of English. It trains future teachers, translators and interpreters. We started studying major subjects in the first semester. We have professional and friendly teachers. As to technical facilities, we have everything we need.

I live in dormitory № 1. Living conditions are excellent. Student dormitories at BelSU are among the best in Russia.

The campus has various sports grounds, including a soccer field, a basketball and volleyball court, a sports ground with sports equipment and pull-up bars. BelSU always holds various sports competitions.

I'd advise future first-year students to progress in the areas they like. Don't follow other people's advice on where you should go and what you should do, if that's not interesting to you!

Batdelger Bulgantamir, Mongolia.
First-year Bachelor's student majoring
in Technological Machines and
Equipment

At STANKIN university, you can pursue a lot of various engineering degrees. If you don't speak Russian at all, that's not such a big deal, we have an intensive one-year Russian language course for international students.

Our university employs top-ranking specialists. Our teachers help us study the Russian language and diverse culture and history of Russia.

I got acquainted with students from all over the world. I really like studying at STANKIN University.

Maybat Oyumaa, Mongolia.
First-year Bachelor's student majoring
in Software Engineering

I've chosen MSUT "STANKIN" because this university is a leading university for engineering.

It provides us with solid background, starting from the Russian language. Our teachers help us find our purpose in life.

Thanks to the university and my efforts, I have a lot of new opportunities.

Nyamdorzh Khadzhimaa, Mongolia.
First-year Master's student majoring in
Human Resources Management

I've chosen STANKIN because it holds leading positions among Moscow universities.

I studied Russian this year. And I am very grateful to our highly qualified teachers.

A lot of my friends who join me in perfecting our knowledge are studying here.

ADMISSION

1. Fee-paying places

2. State-funded places

- based on the results of the Unified State Exams, the university's internal exams, Olympiads (on equal terms with Russian citizens)
- within the Russian Government quotas

State-funded places are available for citizens of  Belarus,  Kazakhstan,  Kyrgyzstan, and  Tajikistan. Applicants from other countries can qualify for free tuition according to the documents confirming their compatriot status as well as within the quota.

Foreign citizens staying outside Russia may be allowed to take entrance exams online according to the decision of the admission office.

All documents (identity documents, academic credentials, and others) must be translated into Russian in accordance with the established procedure. If necessary, the document must be apostilled, undergo consular legalization, or have an education level recognition certificate.

ADMISSION OFFICE

-  vk.com/prkommgudt

FIELDS OF STUDY

- Creative disciplines – Design and Art
- Engineering and Industrial Sciences
- Social Sciences and Humanities
- Pharmacy – starting from 2021

PREPARATORY FACULTY

Study areas: humanities, economics, engineering and technology, medicine and biology, natural sciences

Duration 10 months

Classes are conducted offline and online

Groups include 8-12 students

The course program is suitable for foreign nationals with any level of Russian language proficiency.

Attendees immerse themselves in the Russian language, culture and traditions and prepare for the state certification exam TORFL-1.

Upon completion of the Preparatory Faculty, students continue their education at Russian universities.

Tuition fees 160,000 RUB

INTERNATIONAL COOPERATION

over 70 agreements and contracts with universities and organizations of other countries

- Teacher and student exchange programs
- Research cooperation
- Joint educational programs

OPPORTUNITIES

Students pursue education, innovations, research and art, take an active part in research conferences, fashion shows, design original products, set up their own art exhibitions.

The university holds annual creative events such as the all-Russian design festival "Point RU," international competition for footwear and accessory designers "Shoes-Style," and others.

Among the university teachers are world-famous designers such as Vyacheslav Zaytsev, Valentin Yudashkin, Elena Teplitskaya, Alexander Vasilyev.

“

Odgerel Undram, Mongolia

I am pursuing the Bachelor's degree in Design at RSU named after A. N. Kosygin.

I consider that success in research can be achieved thanks to the optimal learning environment arousing passion and a sense of responsibility towards research. RSU named after A. N. Kosygin has provided me with all the good conditions that helped me, as a foreigner, to interact and integrate into the student community.

RSU has offered me a wide range of opportunities in the research culture with the most optimal and up-to-date educational technologies.

I think that all these subtle details have helped me to feel loyalty and confidence which, in its turn, develops responsibility for the achievement of the best results.

“

Gankhuyag Ganchimeg, Mongolia

I am 23 years old. I've completed my studies at RSU named after A. N. Kosygin. Unfortunately, this was a period of the coronavirus pandemic, but this didn't ruin my impression of the university.

Thanks to my teachers, I learned a lot. In addition to the lessons, I learned how to become better and happier. Although I have many drawbacks, I did my best day by day.

Studying far from home, I was gaining new impressions. Although I didn't have my family beside me, I could count on support from my new friends. It was great to study here!

POPULAR FIELDS OF STUDY

- Oil and Gas Engineering
- Chemical Engineering
- Economics
- Management
- Informatics and Computer Engineering
- Cybersecurity

International students on an internship

A tour around the university's oil and gas facilities

Self-instruction

OIL AND GAS ENGINEERING

Bachelor's programs

- Drilling of Oil and Gas Wells (full-time)
- Operation and Maintenance of Oil Production Facilities (full-time)
- Operation and Maintenance of Gas and Gas Condensate Production Facilities and Underground Storages (full-time, part-time)
- Construction and Repair of Gas and Oil Pipelines and Storage Facilities (full-time, part-time)
- Operation and Maintenance of Transport and Storage Facilities for Oil, Gas and Refined Products (full-time, part-time)

- ✓ Experimental work at the department laboratories
- ✓ Work on onshore and offshore drilling simulators

Career prospects

- Drilling supervisor, process engineer
- Manager
- Assistant driller, driller, well service operator, oil and gas production operator, operator of booster and cluster pump stations, water and oil pretreatment plants
- Production submanager at oil and gas companies
- Positions at design, engineering and research organizations

Most international students are sought after by oil and gas companies all over the world.

ARRIVAL

Visitors are taken from the airport to the city by

 **Aeroexpress trains** 300 – 400 RUB

 **Taxi** – 900 RUB

Metro is the fastest and the most comfortable transport in the city. The fare is 60 RUB per trip.

It is easy to get to the university, so students arriving in Moscow are met at the university at the address: **65, Leninsky Prospekt, bld. 1, Moscow**. The Akademicheskaya metro station.

Upon arrival, foreign citizens receive comprehensive visa support, but they must get health insurance themselves.

All foreign students are accommodated in the university campus – the comfortable dormitories. Each room accommodates 2-3 persons. The accommodation fee is around 20,000 RUB per year.

The Week of National Cultures is an annual event aiming to improve the relationship between the university's ethnic groups. The program includes a photo show of the unique sights of various nations, a quest game, the Guess a Movie contest, an exhibition of national costumes, national cuisines, and a gala concert.

CAMPUS

- 5 dormitory buildings, over 4,000 places
- A gym, a skiing center, a football field with workout areas, basketball and volleyball courts
- Dance, instrumental, drama studios, a chess club, a movie club, an art studio and a recording studio

INTERNATIONAL FRIENDSHIP CLUB

The social youth organization familiarizes students with the culture and creativity of various peoples in Russia and foreign countries. The Club works with 22 fellow countrymen associations established at the university. At the beginning of an academic year, they find "their" guys on the list of enrollees and help first-year students adapt to the university and Russia.

UNIVERSITY ENTRANCE EXAMS

- **The open bank of tasks on the university website** gives you an opportunity to prepare for the tests individually and take a sample test as many times as you seem fit
- **Tests** are taken in Russian. Students planning to study in a mediator language can take exams in English
- **Major subjects** are Chemistry, Biology, Russian
- **Minimum score** for each subject is 50-56 points

Modes of study

- Offline learning
- Distance learning (in case of an unfavorable epidemiological situation)

Working at the simulation center

Advanced training courses

PREPARATORY COURSES FOR FOREIGN CITIZENS

Russian language, physics, chemistry, and biology.

Complete course

Duration – 10 months

Application August 17 – September 28

Tuition fee **290,000 RUB**

Crash course

Duration – 4 months

Application December 15 – January 30

Tuition fee **145,000 RUB**

After students successfully complete their studies, they get a certificate in Russian and English. The document can be taken into account while admitting first-year students to medical and pharmaceutical universities in Russia.

REQUIRED DOCUMENTS

- Original passport
- Certified translation of passport into Russian
- Original academic credentials with transcripts
- Medical documentation: certificates, vaccination certificate, tests, including HIV and hepatitis tests, X-ray fluorography
- Certified translation of academic credentials and transcripts into Russian

NOTA BENE!

If necessary, original academic credentials must be legalized in the applicant's native country (consular legalization/apostille).

Besides, you should submit an education level equivalence certificate.

These requirements depend on the country issuing academic credentials.

Applicants winning Russian Olympiads from the list of the Ministry of Science and Higher Education of Russia get extra points.

STUDYING

Senior students (4 and above) having an average score of 5.0 can be eligible for the Gaaz Prize, which provides a 100% university tuition discount.

Educational laboratory

Gerelchimeg Uranchimeg, Mongolia

I've chosen to study in Russia because my mother and younger brother live here. My mother has a private business related to selling wool products. I've decided to join them to take care of my brother.

I decided to enter the Second medical university because I was satisfied with the conditions offered by the university. To get a state-funded place, I only passed an exam in chemistry.

I was never afraid of the language barrier. I really like the Russian language and consider it unbelievably beautiful. In my home country, I studied Russian at school for a year, and then took two-year preparatory courses in Moscow and Rostov-on-Don.

I had no difficulties except studies. I didn't realize that studying at our university could be so difficult. But I've been coping with everything so far. Only the first year was very hard for me. The second year seems to be easier.

Russia is a very beautiful country. When I was a child, I visited it many times with my mother, and I don't regret having come to study here.

Roman Poleshchuk, PGUPS student

I am a student at the Faculty of Railway Operation and Logistics. My major is Commerce. When I found out about the double degree program implemented by PGUPS in cooperation with the Finnish university LAB University of Applied Sciences, I went to Finland to undertake a one-year study placement as part of the International Business program. This program gave me the opportunity to study abroad, get acquainted with the education system, gain more knowledge, practice English, and meet people from all over the world. After I come back, I will earn two degrees – from PGUPS and LAB. And it only takes five years to complete all of this.

EMBEDDED DATA PROCESSING AND CONTROL SYSTEMS

Master's program in English 

Two-year research

Exchange semester

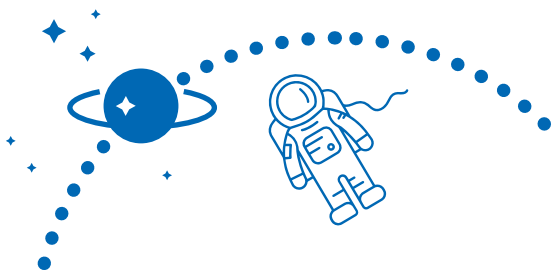

Summer internship

Embedded computer systems are a mass high-technology market of information and computer technologies, the most competitive area of cutting-edge R&D.

You can find embedded systems everywhere: from smartphones to cars, from aircraft and spacecraft to medical equipment, from smart house to intelligent transportation systems.

Students usually choose project themes in the following research areas:

- Communications protocols of airborne equipment
- System modeling and checking
- Embedded systems design
- Embedded systems software development
- Airborne equipment analysis and upgrade
- Video processing
- Heterogeneous computing

“

Azizbek Matniyazov, Turkmenistan

Studying at Saint Petersburg State University of Aerospace Instrumentation made only good impressions on me. The standards of teaching all the subjects, both major and basic, were very high. Our teachers are not only highly qualified specialists in their fields but also interesting people ready to share their life experience. Also, I'd like to mention the attitude of the international department staff members who treated us like their children, solving all our problems and loving us without condition.

The university held plenty of extracurricular activities such as sports events, intellectual competitions, talent shows, Mister and Missis SUAI, visits to museums and theaters, and many others.

I've never regretted having traveled over 5,000 km and joining SUAI. I feel infinite gratitude and have warm memories!

“

Ibrahim Caba, Côte d'Ivoire

Studying at Saint Petersburg State University of Aerospace Instrumentation was the best experience in my university life. I earned a Bachelor's degree in technical operation of aircraft electrical systems and attitude and heading reference systems.

After graduation from SUAI, I entered École nationale de l'aviation civile (Toulouse, France), the first aviation school in Europe. It's where I undertake a study placement to earn a degree in civil aviation engineering in the field of avionics.

SUAI gave me the skills and knowledge I needed to progress in the field of international aeronautics. The university teachers and administration get on very well with students. The university does its best to help students succeed!

I can recommend SUAI, and this major, in particular, to everyone who wants to build an aeronautics career.

ACCOMMODATION

The university offers all full-time students accommodation in the student dormitory.

The campus comprises six 15-story high-rise buildings in the city districts with well-developed infrastructure. One room accommodates 2-3 persons.

Accommodation fee per month:

2,800 RUB – for fee-paying students

900 RUB – for state-funded students

SECURITY

All university facilities provide:

- strict access control
- video surveillance aiming to prevent offenses
- security posts, on duty 24/7
- regular inspections

To prevent the spread of Covid-19 all facilities are fitted with sanitizing and air recirculation equipment.

ADAPTATION

Adapters is a program that helps first-year students adapt to a new learning environment and new people.

International Student Center holds round table discussions and organizes speaking clubs and tours. It collaborates with other student associations of the university, assists students in complying with the migration and visa regulations in Russia, helps them with language adaptation.

Psychosocial and Acmeological Support Center offers students counseling services, if necessary.

Student brigades include pedagogical, archaeological, agricultural, ecological, volunteer brigades, and the train hosts brigade.

SPORTS

The university takes part in over 70 student championships in the city.

Needles Cheerleading Team ranks among Top 5 student cheerleading teams in the world. The male and female basketball teams rank among the best university teams in Russia.

PROJECTS OF THE FUTURE

In 2020, the university launched a high-technology platform for teamwork on the Projects of the Future. The platform is called "Boiling Point – IndTech Design." It aims to develop the sector of the creative economy, digital design, and technologies. Here students can find like-minded people, hear experts' opinions, use state-of-the-art equipment, and implement their ideas.

SELF-DEVELOPMENT

SPbSUITD students have access to advanced library systems, including exclusive paid resources. They can use them from anywhere in the world, including the university campus.

ENTERTAINMENTS

The university holds a lot of bright major events aiming to quickly adapt international students to new cultural traditions. Among them are:

- Cultural project "Ball in the Best Traditions"
- The first-year student festival "Mom! I am on the Stage"
- The Beauty and Talent contest "Miss SPbSUITD"
- Classical music concerts

“

Xavier Francois Habinshuti, Rwanda

In my native country, I worked as a computer technology teacher at a polytechnic college. I got an offer to take part in a PhD scholarship program. I applied for it, and Pacific National University chose me.

In the beginning, I took a preparatory course in an engineering group. I studied Russian, speech styles, mathematics, physics, and Russian geography. Russian was the most difficult subject.

In Rwanda, we know little about Russia, only that it is a country with super technology, which ranks among the top five best countries in the world. When I was coming to Russia, I wasn't worried. I read about the country and knew that the police work well here. And if you come legally, everyone will be happy to see you.

The education system in Russia is more developed than that in Rwanda, as it exists for a longer time. Teachers have more opportunities for enhancement in Russia. There are libraries and laboratories. That's great.

“

Ahmadi Ali Reiza, Afghanistan. School of Economics and Management

Choosing a university, I visited many Russian cities and decided on PNU in Khabarovsk. I was the only student from Afghanistan here, and this motivated me to get acquainted with guys from other countries.

During the first year, I studied Russian because I didn't speak it at all. I didn't even know how to greet people. Now I can easily go to the city center and communicate effectively.

Now we are studying mathematics, economic theory, philosophy, but somehow we are not studying computer science, which I will need in my future profession. That's why I read and study a lot by myself.

Competition for quotas to study at Russian universities

Every year the Ministry of Science and Higher Education of Russia and Rossotrudnichestvo announce admission of foreign citizens, stateless persons and compatriots living abroad to study at Russian universities in state-funded places within the quota. One of the ways to get an invitation from a Russian university is to successfully undergo the selection process abroad – in the foreign citizen's country of residence. Let us look at this stage in detail.

APPLYING WITHIN THE QUOTA

1

Candidates to study are selected in their countries by Rossotrudnichestvo with the participation of state education authorities' representatives in the country of stay, Russian embassies and foreign representative offices.

1. Register at [🌐 edu.rs.gov.ru](https://edu.rs.gov.ru)
2. Attach all the requested documents. If you have no one or another document as of the moment of registration, you can upload it later as you get it
3. Specify from one to six universities, but not more than two universities in each federal district, prioritizing them – the first university on the list is the most desired one
4. After registration the candidates' portfolios are reviewed by the representative office of Russia in their country. The document review and interview dates can vary from country to country. You should get more specific information from the representative office of Russia in your country
5. Wait for the invitation to take part in selection competitions in your country of residence
6. Find yourself in the list of candidates recommended for participation in the second selection stage

The first selection stage in other countries can be held in the format of testing, competition of documents confirming education or qualification, creativity exam, portfolio competition, interview (it can be conducted online) as well as Olympiads.

Following the selection, the rankings of international applicants will be compiled for each country, with their files attached. The file will comprise an impressive package of documents, including medical certificates, lists of published papers. In their files, prospective students also specify the universities they would like to join. The list of candidates selected following the Olympiads will be compiled for each test separately.

2

The information about each application pursued is sent by the Ministry of Science and Higher Education of Russia to Rossotrudnichestvo that brings it to the notice of Russian and foreign embassies and its representative offices abroad. The documents of approved candidates are sent to the universities.

The university must compile the list of international applicants until July 1. If future majors require creative abilities, special physical or psychological characteristics, foreign nationals will be invited to take an additional exam – it must take place until August 5. The university may decide to conduct this test online but only if the person taking the test is accurately identified.

What about applicants who were not admitted to the universities they chose? In this case, their documents will be submitted for review to the two universities that have the smallest number of international students and offer the same study program.

4

Right after your arrival at the university, you should contact the International Relations Department or International Office to execute all the documents required in the territory of Russia. For this purpose, bring your passport and migration card which was issued at the border when entering Russia. Health insurance policies are executed separately.

Upon arrival, applicants submit their original documents.

3

After applicants are notified by Russian and foreign representative offices that they have been admitted to the university, they must contact the university's International Relations Department or the International Office by email or phone and inform them about the date of their arrival.

Students from some countries must undergo the process of recognition of their foreign education document before they arrive at a Russian university to study. The legalization procedure was covered in HED Issue 6.

Universities will not accept foreign candidates' documents not translated into Russian, translations that are not certified, and documents that are not completed according to the requirements as well as documents independently submitted by the citizens of the country of stay.
