ID: HEDmagazine

# 11

Students show great interest in Russian education, that's why the competition is high – 5-6 applicants per place last year.

# 52

One of the ways to get an invitation from a Russian university is to successfully undergo the selection process abroad.

# 54

The information about each application pursued is sent by the Ministry of Science and Higher Education of Russia to Rossotrudnichestvo.

# Educational opportunities for Turkish students

Russia and Turkey are partners in a wide variety of fields. They have been developing academic and cultural relationships for many years. Today Turkish citizens are increasingly considering obtaining a higher education degree in Russia. High quality, affordability and geographical proximity of our countries – all of this attracts more and more Turkish students to Russian universities.

## TRAINING OF PERSONNEL FOR TURKISH ECONOMY

Specialists in a wide variety of areas are extremely important for the development of Turkish economy. Today Russia and Turkey are strengthening partner relationships in civil engineering, agriculture, tourism, metallurgy, car manufacturing, and military engineering. Besides, preference is given to cooperation in aerospace engineering, pharmaceuticals and digital technologies.

For example, Russian universities have been training specialists for Akkuyu Nuclear Power Plant, the first NPP in Turkey, for many years. The engineering graduates who underwent solid training in atomic engineering work in their home country now and feel confident in their competence. The graduates say that they had no room for mistakes during their studies, and their teachers never let them forget anything, they had to know everything<sup>1</sup>.

The upward trend in Turkey's demand for Russian education has led to an increase in the number of quota places at universities. In 2022, the Russian Government allocated 250 tuition-free education quotas for Turkey, and State Atomic Energy Corporation Rosatom offered 50 more quotas.

Turkish citizens can also study at Russian universities on a fee-paying basis. The cost of educational programs is considerably lower compared to universities of Europe, America and Asian countries.

To learn more about admission to Russian universities, about adaptation and life in Russia, read other HED issues

<sup>1</sup> [news-turk.ru/2020/06/24/tureczkie-studenty-iz-rossii-net-prava-na-oshibku](https://news-turk.ru/2020/06/24/tureczkie-studenty-iz-rossii-net-prava-na-oshibku)

## AMPLE OPPORTUNITIES FOR YOUR FUTURE CAREER

You can gain sound knowledge and acquire practical skills if you choose the right field of study and take part in research at one of the Russian universities.

For example, you can become an engineer or a scientist, if you are a member of one of the five student design offices at MAI. They implement real research and design projects. Nine small satellites designed by one of them successfully do their tasks in Earth's orbit.

Graduates of Moscow State Linguistic University work for the ministries of foreign affairs in their countries, on radio and TV, for news agencies, publishing houses, international companies, successfully teach Russian and foreign languages at universities, colleges, schools.

Nizhny Novgorod State University of Architecture and Civil Engineering offers excellent education in architecture, urban development, construction sciences, environmental engineering. Many NNSUACE graduates work for administrative and governmental authorities, research institutes, design and production organizations.

Those dreaming of studying at a top transport university can join Emperor Alexander I St. Petersburg State Transport University. Railway Operation and Transport Business and Logistics are among the popular fields of study among international students.

Chelyabinsk State University offers a wide range of programs. Here you can study engineering, humanities and pedagogical sciences, become a specialist in agriculture and other fields.

The Bachelor's programs in Fundamental Informatics and Information Technologies; Applied Informatics and the Master's program in Nanoengineering are the most popular programs among the Turkish students of Southern Federal University.

---

**Every international graduate is not only highly qualified in their field but also has a good command of the Russian language. This fact can play a great role in building a career.**

## ADMISSION TO RUSSIAN UNIVERSITIES

- 1 Foreign citizens can take entrance exams held by the university even if they have valid results of the Unified State Exams. The admission office will take into consideration a better result.
- 2 Foreign citizens have the right to combine the results of the Unified State Exam (USE) and entrance exams. For example, if the applicant passes the USE in the Russian language with high scores, they submit the result to the admission office. But if the applicant is dissatisfied with their USE score in mathematics, they can take the entrance exam to try to improve their result. Finally, the highest score is chosen.
- 3 Foreign citizens are eligible for state-funded places if they apply under the international education agreements or have compatriot status. Applicants applying within the Russian Government quotas apply to a university as part of a special competition for foreign nationals.
- 4 Those applying as compatriots cannot exercise special rights – neither social rights nor rights related to the applicant's achievements.
- 5 Some universities have reduced the number of entrance exams for international applicants applying for fee-paying places (on a contract basis) to one. Foreign citizens apply as part of a special competition without competing with Russian applicants. However, you should bear in mind that the number of entrance exams is determined by a university itself. You must get more specific information from the admission office.
- 6 The procedure for translating foreign documents into Russian is changed. Some universities undertook to perform this procedure.
- 7 The document recognition certificate (if necessary) is submitted not later than on the day of enrollment consent submission. So you should find out beforehand where you can undergo this procedure, how to pay the duty, and clarify other issues for yourself.
- 8 Foreign documents must be legalized, if necessary.

# Popularity of Russian Education in Turkey

The intensive development of relations between Russia and Turkey has led to the expansion of not only economic and political but also educational contacts. In 2019, the rectors of Russian and Turkish universities agreed upon closer and more meaningful cooperation.

Choosing Russian education, students are sure to get high-quality training and ample opportunities for their future career. That's why the number of applications from Turkey to study at Russian universities is on the rise.

Alexander Sotnichenko, Head of Russian House in Ankara, talks about how to pass the interview to get into a Russian university and why there is a growing demand for studying Russian in Turkey.

## DEMAND FOR RUSSIAN LANGUAGE PROFICIENCY

The interest in Russian education and demand for it is great, and it grows from year to year.

**Firstly**, this is because almost 60-70% of people in the tourist zone of the Mediterranean coast speak Russian. Most of them are immigrants from the CIS countries, citizens of the Russian Federation, among whom Russian is very popular. As the best way to learn a language is to immerse oneself in a relevant linguistic environment, children are sent to study in Russia.

**Secondly**, the industrial zone of the Sea of Marmara carries on foreign trade with the CIS countries. And Russian is the most spoken language here. Specialists need to learn Russian to develop a successful business. The construction of the nuclear power plant in the city of Silifke in the Mersin Province has had a positive impact on the development of the local infrastructure. Visiting specialists from Russia and other CIS countries, their families, specialists from the Turkish environment who work at the same sites also communicate in Russian. Consequently, those who already prepare their children for future work at this site are interested in learning Russian.

Due to the fact that Turkey is facing a great economic crisis now, and the dollar and Euro exchange rates have increased since last year, not all middle class representatives can afford to send their children to study in Europe. Those who are dissatisfied with Turkish education are in search of alternative ways now. More and more Turkish citizens consider the opportunities to obtain a higher education degree in Russia. That's more profitable, more practical, more convenient and more affordable.

## EDUCATION QUOTAS

The upward trends in the number of quota places are positive: if five years ago we had 15-20 quotas, now we have 250 + 50 offered by Rosatom. This is because Turkish quotas do not expire, all of them are used. Students show great interest, that's why the competition is high – 5-6 applicants per place last year. This year we expect more applications because even now we can observe an extraordinary demand.

If several years ago, when the number of quotas for Turkey was insufficient, and the ruble-lira exchange rate was rather affordable, students did not worry about the ways to get into Russian universities. Naturally, they tried to get a quota, but if they did not manage to, they were free to go and study on a fee-paying basis. But now, when the dollar and ruble-lira rate has increased, the interest in quotas has also gone sky-high. That's why almost each interested student tries to prove oneself.

Big Ethnographic Dictation – 2022 at the Russian House in Ankara

youtube.com

vk.com/rusevi  
t.me/s/ruseviankara

## **PROMOTION OF RUSSIAN EDUCATION**

Turkish citizens like any other international applicants apply to Russian universities within the quota, on a fee-paying basis, some of them use services of recruiting firms, someone fills in the application themselves contacting the university, someone gets information from their friends – students of Russian universities. Many Turkish bloggers living in Russia promote Russian education and help with application and execution of documents.

The Russian House in Ankara is actively involved in career guidance. We make personal visits to educational institutions such as schools, lyceums, universities, organize online conferences for them where we present the educational opportunities in Russia, keep our social media platforms active. Besides, word-of-mouth advertising does excellent work – happy students who already study in Russia talk about their experience. And our family grows from year to year.

Meeting with the Beştepe College students

## **POPULAR MAJORS**

Medicine and aviation are the most popular fields of study chosen by Turkish students studying at Russian universities. Why? Because these majors are scarce at Turkish universities. Besides, it is rather difficult to pass the exam. That's why students venture abroad.

**Philology majors such as the Russian language itself, literature as well as construction and IT majors are very popular.**

Moreover, the popularity of subspecialties increases from year to year. For example, the demand for criminal medicine becomes unexpected for us. But, nevertheless, such things happen.

### HOW IS AN INTERVIEW CONDUCTED?

We invite all and any students, applicants, candidates who filled in the application forms on the Education in Russia website to take part in the interview. **It is conducted only in the Russian House in Ankara.**

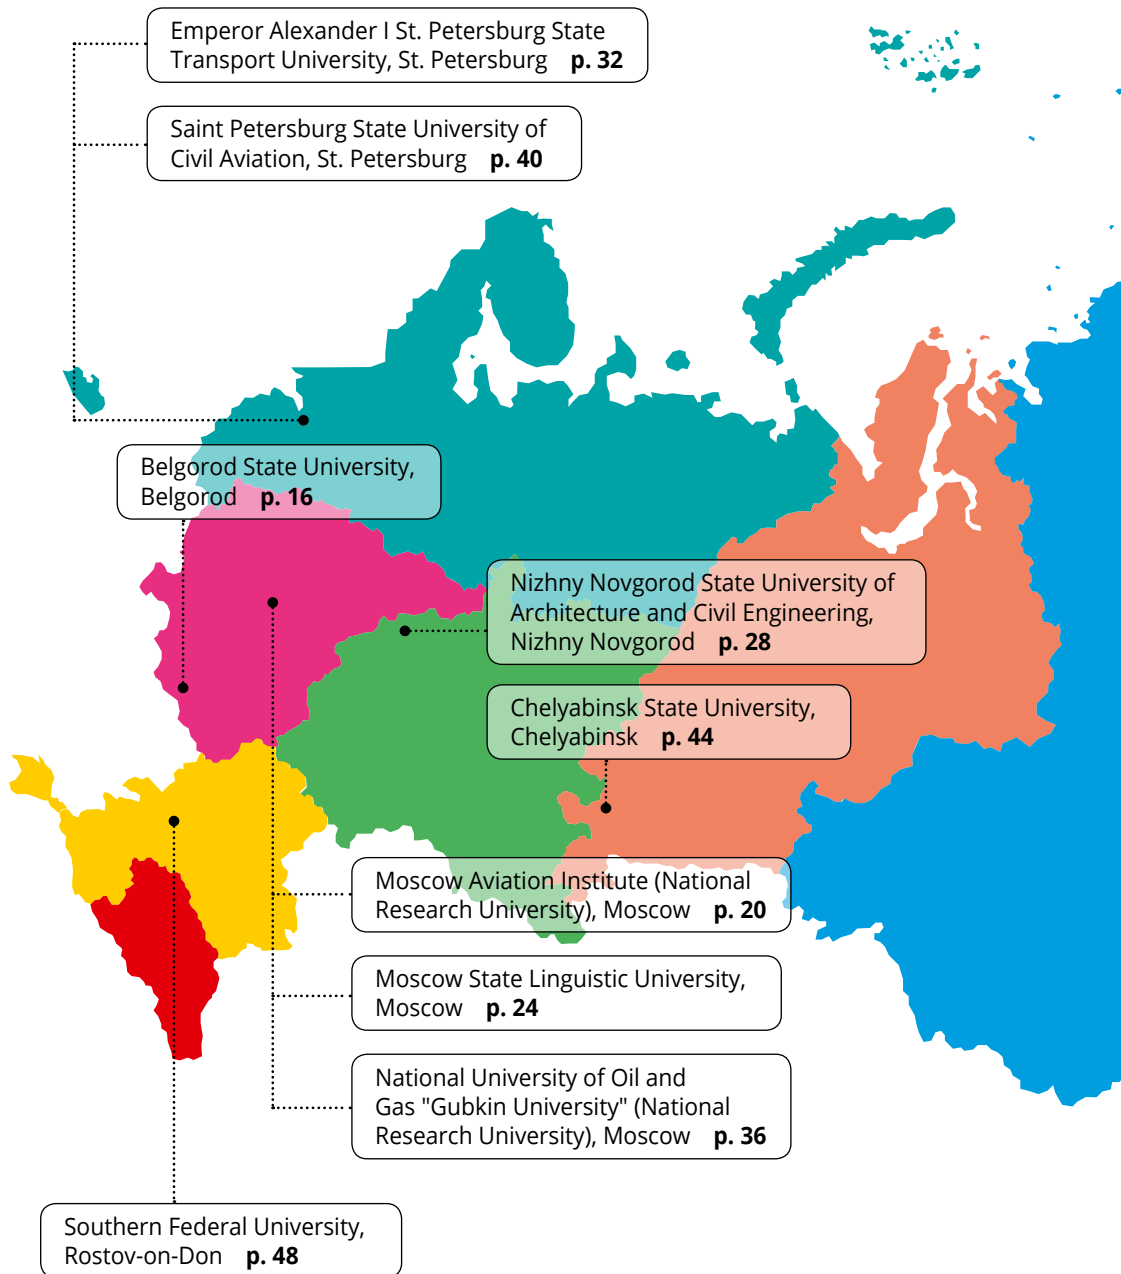

However, we provide the opportunity to connect for an **online interview** for students studying at the preparatory faculty or in their last years at Russian universities or universities of other countries. The online interviews are conducted on special days.

**The interview is conducted in the format of negotiations.** We ask students why they chose Russia as a study destination, what prospects they see there for themselves, what universities they choose and by what criteria, what their plans are for the future after completing their studies in Russia, where they want to stay. We ask what help they can offer to Russia and Turkey – they may want to be a bridge between the two countries and strengthen our friendly relations. That's how we learn about students and applicants' motives. We also ask questions about their personal achievements at the moment and over the last three years. These can be participation in Olympiads and competitions, volunteering and other activities, sport awards. **All the documents attached by applicants to their application forms add bonus points for admission.**

## ADVANTAGES

- Plenty of fields of study and educational programs, highly highly qualified teachers, excellent materials and resources
- Unique world-class research in physics, mathematics, chemistry, biology, medicine, geography, geology, mineralogy, and engineering sciences
- Practice-oriented training, an opportunity to participate in commercial projects
- In-depth study of foreign languages, internships abroad
- Additional rector's scholarships for the best students
- Outstanding sports, creativity, leisure and recreation facilities

## STRUCTURE

- Institute of Engineering and Digital Technologies
- Institute of Pharmacy, Chemistry and Biology
- Institute of Law
- Institute of Medicine
- Institute of Pedagogy
- Institute of Cross-cultural Communications and International Relations

### ADMISSION TO STATE-FUNDED PLACES

- Within the Russian Government quota
- According to the international agreements with the Russian Federation
- According to the compatriots living abroad support program

### DOCUMENTS

- Passport and its copy with certified translation into Russian
- Original academic credentials and their copies with certified translation into Russian
- Foreign education recognition certificate
- Medical certificate 086-Y (for applicants applying for some specialties)
- Two 3x4 cm photos

**If necessary, academic credentials must be legalized in accordance with the established procedure.**

Applying to the university, international students can have their academic credentials recognized at the regional resource center "Expert Center for Evaluation of Foreign Academic Credentials" of NRU "BelSU."

Fee **3,800 RUB**

“

**Avetis Grigoryan, Uzbekistan. The second-year student at the Faculty of Foreign Languages of the Institute of Pedagogy, majoring in English and History**

I entered BelSU on my acquaintances' recommendations, and I chose this faculty because I have a good command of English. It trains future teachers, translators and interpreters. We started studying major subjects in the first semester. We have professional and friendly teachers. As to technical facilities, we have everything we need.

I live in dormitory № 1. Living conditions are excellent. Student dormitories at BelSU are among the best in Russia.

The campus has various sports grounds, including a soccer field, a basketball and volleyball court, a sports ground with sports equipment and pull-up bars. BelSU always holds various sports competitions.

I'd advise future first-year students to progress in the areas they like. Don't follow other people's advice on where you should go and what you should do, if that's not interesting to you!

### PRE-UNIVERSITY TRAINING

#### Pre-university Foundation Program in Russian-medium

**Subjects:** Russian language, mathematics, physics

**Tuition fee 3,000 USD**

#### Pre-university Foundation Program in English-medium

**Subjects:** mathematics, physics, computer science, technical drawing, technical English, Russian language

**Tuition fee 3,500 USD**

MAI is a leading high-tech Russian university creating technologies that determine its tomorrow's image and training leaders able to work with them today.

Over 3,000 students are engaged in the university research.

### **PRIORITY RESEARCH AREAS**

- Integrated Design
- Unmanned Aerial Vehicles
- Composite Materials
- Mathematical Modeling
- Artificial Intelligence, Big Data, Machine Learning, Internet of Things
- Space Systems
- Advanced Propulsion Power Plants
- Avionics
- Electric Power Engineering and Electrification of Engineering Systems
- Robotization
- Telecommunications
- Additive Technologies
- High-technology Products Service

**Training for international students from more than 80 non-CIS foreign countries**

### **STUDENT ACHIEVEMENTS**

- Successful participation in various engineering and professional competitions
- Prizes in international Olympiads, student congresses, champion's titles in aeromodeling, medals of the Academy of Sciences, and many other awards
- Multiple gold medalists in the WorldSkills Russia championship in the Space Systems Engineering competency, winners in the Unmanned Aircraft Systems category

### **STUDENT DESIGN BUREAUS**

MAI has five student design bureaus that implement real-life research and design projects. Nine small satellites designed by one of them successfully do their tasks in Earth's orbit.

### **UNIQUE ENVIRONMENT**

- 140+ research laboratories, centers and student design bureaus
- MAI airdrome
- Mission control center
- IT center and supercomputer
- Wind tunnel
- Flight simulators
- Full-scale equipment samples
- State-of-the-art testing facilities
- Experimental pilot plant

## ACCOMMODATION

- MAI campus is a uniquely dynamic environment that has everything you need for professional, creative and sports development
- MAI campus has nine comfortable dormitories and life amenities
- MAI dormitory fee is 90 USD per month
- Students live in 2-3 person dormitory rooms with a shared bathroom. The kitchen is on the floor
- There are over 20 cafés, canteens and buffets on campus
- Health insurance is 150 USD
- Arriving students are met at the airport. They are offered a shuttle to the dormitory

Moscow Aviation Institute enrolls more and more talented and motivated young people from all over the world.

*The team of the Russian Language Center students is the winner of the Like in Saint Petersburg quest for international students*

For over two centuries, the university has been a leading research and education center. Today our university is one of the major higher polytechnic education institutions of the transport industry.

### **DOUBLE DEGREE PROGRAMS**

They are implemented jointly with the leading CIS universities in the following fields of study: Civil Engineering; Management; Economics; Land Transportation and Technological Complexes; Business Informatics; Electric Power and Electrical Engineering, and others.

in Chinese 🇨🇳

- **Construction of Railways, Bridges and Transport Tunnels; Railway Operation; Railway Rolling Stock; Railway Traffic Control Systems; Management; Commerce; Technosphere Safety; Electric Power and Electrical Engineering** implemented jointly with Beijing JiaoTong University and other Chinese universities 🇨🇳

### PARTNERS

### INTERNATIONAL RELATIONS DEPARTMENT

Provides migration and visa support to international students, and helps them handle organizational problems.

☎ +7 812 457-80-39

✉ inter@pgups.ru

### Ivan Kornilaev, Kazakhstan

I entered PGUPS in 2018. At that time, many of my acquaintances and friends from Aktau were going to apply for studies in Saint Petersburg, and I decided to go with them.

At that time, I didn't know yet what university I would apply to. After walking around many universities, I decided on PGUPS. The Yusupov Palace made me fall in love with itself and gave no chances to other universities.

I am a fourth-year student now. I am writing my graduation thesis. Besides studying, I am involved in extracurricular activities, I entered the Top 100 students of the university, which didn't go unnoticed by the teachers.

### PARENTS BRIDGE

Parent's Account for getting the information on attendance, academic progress, academic, scientific, sports, and other achievements of a student.

International students on a tour at Peter-and-Paul Fortress

Dormitory

### INFRASTRUCTURE

- 15 buildings, 8 dormitories
- Geology and geodesy facility
- Physical Culture House. The sports center with a swimming pool, a gym, halls for team sports, wrestling
- The clinic
- Culture and Recreation Center including a theater studio, a video studio, a vocal studio, KVN team (a famous Russian team comedy competition), fine arts studio, various style dance studios, etc.
- Volunteering center

### SECURITY

PGUPS cares about student security. All university buildings, including the dormitories, are guarded by the security team 24/7 and equipped with video surveillance systems.

### PGUPS INTERNATIONAL

It provides up-to-date information about PGUPS's international activities: study abroad, double degree programs, short-term internships, lectures of foreign professors, and many other things.

International students on an internship

A tour around the university's oil and gas facilities

Self-instruction

## OIL AND GAS ENGINEERING

### Bachelor's programs

- Drilling of Oil and Gas Wells (full-time)
- Operation and Maintenance of Oil Production Facilities (full-time)
- Operation and Maintenance of Gas and Gas Condensate Production Facilities and Underground Storages (full-time, part-time)
- Construction and Repair of Gas and Oil Pipelines and Storage Facilities (full-time, part-time)
- Operation and Maintenance of Transport and Storage Facilities for Oil, Gas and Refined Products (full-time, part-time)

- ✓ Experimental work at the department laboratories
- ✓ Work on onshore and offshore drilling simulators

### Career prospects

- Drilling supervisor, process engineer
- Manager
- Assistant driller, driller, well service operator, oil and gas production operator, operator of booster and cluster pump stations, water and oil pretreatment plants
- Production submanager at oil and gas companies
- Positions at design, engineering and research organizations

**Most international students are sought after by oil and gas companies all over the world.**

## ARRIVAL

Visitors are taken from the airport to the city by

 **Aeroexpress trains** 300 – 400 RUB

 **Taxi** – 900 RUB

Metro is the fastest and the most comfortable transport in the city. The fare is 60 RUB per trip.

It is easy to get to the university, so students arriving in Moscow are met at the university at the address: **65, Leninsky Prospekt, bld. 1, Moscow**. The Akademicheskaya metro station.

Upon arrival, foreign citizens receive comprehensive visa support, but they must get health insurance themselves.

All foreign students are accommodated in the university campus – the comfortable dormitories. Each room accommodates 2-3 persons. The accommodation fee is around 20,000 RUB per year.

**The Week of National Cultures** is an annual event aiming to improve the relationship between the university's ethnic groups. The program includes a photo show of the unique sights of various nations, a quest game, the Guess a Movie contest, an exhibition of national costumes, national cuisines, and a gala concert.

## CAMPUS

- 5 dormitory buildings, over 4,000 places
- A gym, a skiing center, a football field with workout areas, basketball and volleyball courts
- Dance, instrumental, drama studios, a chess club, a movie club, an art studio and a recording studio

## INTERNATIONAL FRIENDSHIP CLUB

The social youth organization familiarizes students with the culture and creativity of various peoples in Russia and foreign countries. The Club works with 22 fellow countrymen associations established at the university. At the beginning of an academic year, they find "their" guys on the list of enrollees and help first-year students adapt to the university and Russia.

## SAINT PETERSBURG STATE UNIVERSITY OF CIVIL AVIATION

Founded in 1955

**4,354**

students pursue  
higher education  
programs

**3,973**

cadets pursue  
secondary  
vocational  
education  
programs

**100**

management staff  
members and flight  
instructors

**120**

PhD students

**268**

university teachers

**200+**

international  
students

The University of Civil Aviation is the largest Russian aviation education center with a well-developed branch network in Khabarovsk, Yakutsk, Krasnoyarsk, Buguruslan, Vyborg.

The educational programs developed by the university and its modern infrastructure allow it to provide ongoing professional training of top-class specialists for Russia's aviation industry, including pilots, air traffic controllers, engineers, managers, economists, lawyers.

**Tuition fees per year,  
full-time study, 2022-2023**

**Bachelor's programs  
225,000 – 300,000 RUB**

**Specialist's programs 470,000 RUB**

**Master's programs 347,000 RUB**

**PhD programs 290,000 – 330,700 RUB**

 [spbguga.ru](http://spbguga.ru)

 [vk.com/spbguga\\_ga](https://vk.com/spbguga_ga)

Motor testing station

📍 Saint Petersburg, Russia

### **ADVANTAGES**

- The university's modern facilities and resources
- Quality and continuity of training of air transport specialists based on modernization of educational programs, introduction of digital technologies, intensification of integration of the learning process, research and production
- Highly qualified academic staff and instructors
- Development of existing and new priority areas of air transport research, efficient use and building of research capacity
- Expansion of international cooperation in implementation of educational programs and research

### **INTERNSHIP AND CAREER OPPORTUNITIES**

The university organizes and provides all kinds of internships and employment opportunities at enterprises of various economic sectors.

#### **EMPLOYER PARTNERS**

**International graduates of the University of Civil Aviation from Angola, Cameroon, Uzbekistan, Tajikistan, and other countries are successfully employed by air transport enterprises all over the world.**

*Practical training at the Department of Flight Simulators*

# OPERATION OF AIRCRAFT AND AIR TRAFFIC MANAGEMENT

## Popular fields of study

### FLIGHT OPERATIONS MANAGEMENT

#### Faculty of Flight Operation

**Civil aircraft pilot** has a set of knowledge, including knowledge of rules and procedures for flight control and aircraft navigation, air traffic management, skills of calculating flight parameters and maximum permissible aircraft loading, evaluating the meteorological and aeronautical situation, aircraft technical condition, an ability to control threat and error factors during the flight of a manned aircraft, control the performance of aircraft systems and equipment at all flight stages, execute special and emergency procedures and maneuvers related to failures and faults of aircraft equipment.

**Civil aircraft pilot** is an engineer who has hard skills of using flight technique, can use navigation methods, knows how to operate state-of-the-art functional aircraft systems and power plants.

After graduation from the university, **our graduates** are ready to operate modern aircraft equipped with the most complex electronic and hydraulic/mechanical control systems, electronic and computer technology, automatic control systems and navigation systems, performance monitoring systems for functional systems and equipment.

### AIR TRAFFIC MANAGEMENT

#### Faculty of Flight Operation

**Air traffic controller** is knowledgeable about the airspace structure, air traffic service, rules and procedures for operating air traffic service equipment, can act in emergency and search and rescue operations.

**Our graduates** are professionally trained for completing a whole range of works related air traffic service at a particular control point (sector) of air traffic service. Students have the opportunities to show themselves at manufacturing site and get references for further employment as early as during training while undertaking an internship.

**Modern flight and navigation procedure trainers and full flight simulators of training aircraft are used to maintain students' aviation skills during theoretical classes and to undergo practical navigation and flight training with the participation of instructors of the simulation center and flight and engineering center.**

## AIRCRAFT MAINTENANCE AND REPAIR MANAGEMENT

### Faculty of Airports and Flight Engineering Support

**Aircraft maintenance and repair engineer** is knowledgeable about the structure of aircraft and helicopters of various types, aircraft operation, skills of using technical documentation and aircraft equipment maintenance regulations.

**University graduates** are able to carry out maintenance and repair of aircraft equipment, in particular, to follow aircraft airworthiness maintenance guidelines, record the resource and technical condition of aircraft equipment, plan aircraft maintenance and repair, control the completeness and quality of work.

**All our graduates are sought after by aviation enterprises and in other economic sectors, have stable high income and good career prospects!**

**The university has 121 training aircraft and its own training aerodrome for safe and efficient operation of training aircraft in the daytime and at night.**

## THE UNIVERSITY'S SIMULATION FACILITIES

- Simulators such as Diamond DA 40NG, Cessna 172S, Diamond DA 42NG for initial training of commercial civil aviation pilots, An-148, B-737, A-320, CRJ-200 for continuing professional education
- Air traffic control simulators such as Sintez, Navigator, Expert

Practical training at the Department of Air Traffic Control Simulators

## UNIVERSITY SCIENCE

Science at CSU is an integral part of the learning process. Students are engaged in research by their teachers starting from the first year. Our scientists discovered Arkaim (a Bronze Age settlement), were the first to study the Chelyabinsk Meteor in greater detail. They also succeeded in other things in world science.

Arkaim and its surroundings are a unique cultural and natural area attracting thousands of people every year.

## STRATEGIC PARTNERS

## HOW TO GET INTO SFEDU?

### ENTRANCE EXAMS

To enroll on a fee-paying basis, you must pass internal entrance exams.

Take online entrance exams [exams.sfedu.ru](https://exams.sfedu.ru)

### QUOTAS

- Foreign citizens from any country apply for state-funded places at [education-in-russia.com](https://education-in-russia.com)
- Applications are reviewed and candidates are selected by the foreign representative offices of Rossotrudnichestvo

### PORTFOLIO COMPETITION

The competition allows foreign citizens to start a Master's degree at SFedU on a fee-paying basis without exams. Applicants who get the highest scores will get a 50% tuition discount.

Apply for participation at [master.sfedu.ru](https://master.sfedu.ru)

### THE OLYMPIAD

The Olympiad of Federal Universities **for Master's degree applicants**. Successful participation entitles foreign citizens to tuition-free education at SFedU within the Russian Government quotas. The terms and conditions are available on the website [магистратураолимпиада.рф](https://magistraturaolimpiada.rf)

116

state-funded places for Master's studies are allocated for the 2023 Olympiad winners

# Competition for Quotas to Study at Russian Universities

Every year the Ministry of Science and Higher Education of Russia and Rossotrudnichestvo announce admission of foreign citizens, stateless persons and compatriots living abroad to study at Russian universities in state-funded places within the quota. One of the ways to get an invitation from a Russian university is to successfully undergo the selection process abroad – in the foreign citizen's country of residence. Let us look at this stage in detail.

## APPLYING WITHIN THE QUOTA

### 1

Candidates to study are selected in their countries by Rossotrudnichestvo with the participation of state education authorities' representatives in the country of stay, Russian embassies and foreign representative offices.

1. Register at [edu.rs.gov.ru](https://edu.rs.gov.ru)
2. Attach all the requested documents. If you have no one or another document as of the moment of registration, you can upload it later, as you get them
3. Specify from one to six universities, but no more than two universities in each federal district, prioritizing them– the first university on the list is the most desired one
4. After registration the candidates' portfolios are reviewed by the representative office of Russia in your country. The document review and interview dates can vary from country to country. You should get more specific information from the representative office of Russia in your country
5. Wait for the invitation to take part in selection competitions in your country of residence
6. Find yourself in the list of candidates recommended for participation in the second selection stage

The first selection stage in other countries can be held in the format of testing, competition of documents confirming education or qualification, creativity exam, portfolio competition, interview (it can be conducted online), as well as Olympiads.

Following the selection, the rankings of international applicants will be compiled for each country, with their files attached. The file will comprise an impressive package of documents, including medical certificates and lists of published papers. In their files, prospective students also specify the universities they would like to join. The list of candidates selected following the Olympiads will be compiled for each test separately.

## 2

The information about each application pursued is sent by the Ministry of Science and Higher Education of Russia to Rossotrudnichestvo that brings it to the notice of Russian and foreign embassies and its representative offices abroad. The documents of approved candidates are sent to the universities.

The university must compile the list of international applicants until July 1. If future majors require creative abilities, special physical and psychological characteristics, foreign nationals will be invited to take an additional exam – it must take place until August 5. The university may decide to conduct this test online but only if the person taking the test is accurately identified.

What about applicants who were not admitted to the universities they chose? In this case, their documents will be submitted for review to the two universities that have the smallest number of international students and offer the same study program.

## 3

After applicants are notified by Russian and foreign representative offices that they have been admitted to the university, they must contact the International Relations Department or the International Office by email or phone and inform them about the date of their arrival.

Students from some countries must undergo the process of recognition of their foreign education document before they arrive at a Russian university to study.

Universities will not accept foreign candidates' documents not translated into Russian, translations that are not certified, and documents that are not completed according to the requirements as well as documents independently submitted by the citizens of the country of stay.

## 4

Right after your arrival at the university, you should contact the International Relations Department or the International Office to execute all the documents required in the territory of Russia. For this purpose, bring your passport and migration card which was issued at the border when entering Russia. Health insurance policies are executed separately.

Upon arrival, applicants submit their original documents.

### **LEARNING RUSSIAN**

Foreign citizens whose Russian is not very good have the right to learn the language at preparatory departments and faculties of educational institutions. Attendees get the scholarship throughout the period of study regardless of their academic performance.

The period of study at the preparatory faculty or department can last for up to 1 academic year. This period is not included in the period of study in main professional educational programs.

Foreign citizens' costs of travel to their place of study are paid by foreign citizens themselves and (or) sponsors.

**As a rule, the selection start announcements are published on the websites of the Rossotrudnichestvo representative office or Russian embassies in your country.**

For all questions about admission within the Russian Federation Government quota, you can call the hotline of **the Ministry of Science and Higher Education of Russia:**
