# Good opportunities for your future career

## For students from Central Asia

Every year a lot of international students come to study at Russian universities. Russian education is especially popular among students from the CIS countries – 85% of students come from Kazakhstan, Uzbekistan, Tajikistan, Turkmenistan, Kyrgyzstan.

High-quality training, living conditions, well-developed campus infrastructure, active international cooperation, exchange programs, opportunities for successful personal development in science, sports and Olympiad movement – all of this attracts talented students to Russian universities.

## PARTNERS AND FRIENDS

For many years, Russia and the countries of Central Asia have been united by the ties of friendship and traditions of mutual support, trust and respect. The Russian regions support the expansion of relations and exchanges with the partners from Asia in art and culture, through public associations, religious, economic or other associations, contribute to the development of cooperation among youth organizations and student exchange.

Our countries successfully implement large-scale joint projects. For example, Uzbekistan is building the first nuclear power plant in cooperation with the Russian specialists. Sangtudin Hydropower Plant-1 (it provides over 12% of electric power output in the republic) has been working in Tajikistan for over ten years. Last year Russia's largest automobile corporation KAMAZ supplied around 2,000 pieces of automotive equipment to Turkmenistan. Kyrgyzstan has launched the Talas gold ore plant. Mineral fertilizers are jointly produced in the Zhambyl region of Kazakhstan.

Cultural and humanitarian relations between our countries are also well-developed. Children have the opportunity to go to Russian schools. Central Asia has the Internet resource "Russian School Support System" supported by Rossotrudnichestvo. With its assistance, students and teachers have the opportunity to gain free access to thousands of e-books of diverse content and various purpose. Significantly, studying at Russian-language schools provides applicants from the CIS countries with the opportunity to apply to Russian universities on equal terms with Russian citizens.

Kazakhstan, Kyrgyzstan, Tajikistan, and Uzbekistan have Russian Houses, and Turkmenistan has the Embassy of Russia. In the absence of language barriers, Russian universities take an active part in educational platforms and fairs held in the CIS countries and organize various Olympiads.

According to the Ministry of Science and Higher Education of Russia, 85% of international students come to Russia from the CIS countries: 🇰🇿 Kazakhstan, 🇺🇿 Uzbekistan, 🇹🇲 Turkmenistan, 🇹🇯 Tajikistan, 🇰🇾 Kyrgyzstan. Every year around 160,000 citizens of the Central Asia states study in Russia, 60,000 of them studying within the quota.

## SOUGHT-AFTER SPECIALISTS IN THE COUNTRIES OF CENTRAL ASIA

The most popular fields of study among students from the CIS countries are:

- General Medicine
- Dentistry
- Economics
- Management
- Civil Engineering
- Electric Power Engineering and Electrical Engineering
- Information Security
- Energy Security

**These are general data. And now let's see what specialists are most sought-after in the countries of Central Asia.**

In **Kazakhstan** 🇰🇿, the shortage of qualified engineers is being felt in the construction and machine-building industries today. No less pressing is the issue of filling the vacancies in metallurgy, power engineering and oil and gas industries.

Today the most popular fields of study among the citizens of **Turkmenistan** 🇹🇲 are linguistics, economics, international relations, oil and gas engineering, informatics and computer engineering, architecture, psychology and dentistry. There is an interest in training engineering personnel as well as IT specialists.

The leading economic sector in **Kyrgyzstan** 🇰🇾 is agriculture. It mainly includes crop farming (growing grain, cotton, tobacco, oil-bearing crops, horticultural crops and gourds), beef and dairy cattle breeding, sheep breeding. It creates around 40% of the gross added value and employs more than half of able-bodied population. The share of farming lands is over 50% of the entire territory of the republic.

**Tajikistan** 🇹🇯, like any other CIS countries, has long been suffering a shortage of qualified personnel for the hi-tech industry, in particular, for creating IT parks. Besides, the country has huge hydropower potential, non-ferrous metal stocks, rare opportunities for agriculture, great prospects for the development of tourism.

Over the last twelve years, the number of students from **Uzbekistan** 🇺🇲 at Russian universities has increased more than threefold. Medicine and engineering and technology majors – especially metallurgy, mechanical engineering, geology and mineral exploration, informatics and computer engineering are most popular among those applying for full-time studies. At the same time, extramural students prefer economics and management.

In 2021, Russia ranked fifth in the world by the number of international students. The number of citizens of the CIS countries enrolled in Bachelor's, Specialist's and Master's programs within the Russian Government quota has increased by a quarter over the last two years.

**You can become an excellent specialist in these fields if you choose one of the Russian universities. The information on the universities in our magazine will help you decide on the most suitable university for your future career. Read in the issue!**

## WHY STUDY AT RUSSIAN UNIVERSITIES

- Russian universities and teachers take a unique approach to teaching
- Students come to Russia to get high-quality and sometimes more affordable education. Many of them even manage to earn a degree for free. Every year state-funded places for foreign citizens are allocated – 23,000 were allocated in 2022. Within the government quota they can enter more than 450 state Russian universities. For this purpose (in some cases), they must pass required exams\*. At regional universities the competition is low, and the minimum score is sufficient for admission
- The citizens of the country often underestimate the place they live in. To foreigners, Russia seems a territory with unique nature, architecture and a combination of two cultures – Asian and European. History lovers and erudite people will not remain indifferent. Citizens of Mongolia, China, Korea, Vietnam, and Serbia show special respect to Russia. The degree earned in our country is highly valued in students' home countries. A prestigious degree is a key to career success. Many people like the Russian mentality: sociability, hospitality, warm-heartedness, sincerity. This is especially attractive to people living in Asia
- Solid academic background provides the opportunity for personal development both in profession and research
- Foreigners are attracted by strong financial support during their studies: scholarships and bonuses for academic excellence and active efforts. Besides, those proving themselves during the semester are awarded various prizes such as tourist trips, movie or theater tickets

## FIRST-YEAR STUDENT ADAPTATION

To quickly familiarize international first-year students with the environment, society and local culture, Russian universities have developed and successfully apply various adaptation programs for international students.

For example, Volga State University of Water Transport has everything international students need for interesting and comfortable studies.

- The staff members of the International Relations Office keep in contact with applicants 24/7 using messengers and email. They help students in arriving in Russia, obtaining and extending visas, accommodating in the dormitory and provide assistance in obtaining health insurance and undergoing medical examination and dactyloscopy
- The student group advisors monitor the performance of international students, and monthly attestation allows them to track student progress, identify the problems in time and provide required assistance to students
- International students of Volga University take an active part in all cultural, entertainment and sports events held by the university

The issue of socio-cultural adaptation of international students at Nizhny Novgorod universities is supervised at the level of the Ministry of Education, Science and Youth Policy of the region. Every year the university holds the We are Together workshop for international students as part of which international students from different universities of the city meet, visit theaters and museums, go on tours, take part in festivals of national cultures and Spartakiads.

These events unite VSUWT students, provide them with an excellent opportunity to creatively tell others about themselves and their culture, learn a lot of interesting things about other peoples, prove themselves in sports, make friends with the representatives of other nationalities and countries.

# Russian Education

## for Students from Kazakhstan

Russia and Kazakhstan are bound not only by the common past but also by the promising common future. The prospect for relationships between our countries has been built for over the last 30 years. Today we can safely say that Kazakhstan remains the friendliest country for Russia.

Olga Filonova, Head of the Russian House in Astana, talks about what makes higher education in Russia attractive to students from Kazakhstan, about admission opportunities and assistance in choosing a university.

## POPULARITY OF RUSSIAN EDUCATION

Astana and Moscow have built strong ties at all levels. The presidents of the states often hold meetings. There are joint commissions of ministries and government agencies. The business and educational projects are developed. Russians and Kazakhstanis maintain multi-level horizontal relationships.

Students studying in Russia get high-quality education. As a rule, they go back home and contribute significantly to the development of their country. Now the borders are open, and young men or girls can go to any country in the world and acquire a profession there.

The competition among higher education institutions is high. But for all that, many Kazakhstanis strive to enter Russian universities. On the one hand, this is facilitated by geographical proximity of the countries, the language environment which continues to be Russian, and on the other hand, the level of Russian education which is on the rise. Kazakhstani students choose sought-after professions and fields of study such as IT, robotics, radio electronics, mining, engineering. However, we can notice that such professions as lawyers and financiers are losing popularity.

The Russian Culture Day as part of the Alem Saz International Festival

## **EDUCATION QUOTAS**

Today the number of Kazakhstanis is 25% of the total number of international students in Russia. The number of quota places allocated by the Russian Federation Government for applicants from Kazakhstan is trending upward. There were 500 places last year, and all of them were used. Seven hundred places have already been allocated for the academic year 2023/2024, and we can see prospective students' interest in Russian education. This is illustrated by the last year's competition which was three applicants per place.

According to the Embassy of the Republic Kazakhstan in the Russian Federation, there are 61,000 Kazakhstani students pursuing different educational programs in Russia at the moment. The educational grants to study are allocated as part of the intergovernmental agreements. These also include the quota places for students from Kazakhstan whose tuition costs are fully covered by the Russian budget. Most Kazakhstanis try to apply to Russian universities within the quota through Rossotrudnichestvo but there are people applying independently.

**I will reveal a secret to applicants - universities value not only your grades in your secondary school certificates but also your proactive attitude, your participation in public life, Olympiads, sports and your achievements. All of this increases your admission chances.**

### RUSSIAN HOUSE IN ASTANA

We realize that the most important thing for applicants is not to drown in the flow of information. And we help prospective students keep afloat. The Russian House holds education fairs. We try to tell applicants about the universities on the Internet. We have prepared a website with a step-by-step guide to registration and document submission at different admission stages.

*Olga Filonova*

[abitura2023.tilda.ws](https://abitura2023.tilda.ws)

The most important thing is that graduates of Russian universities, as a rule, do not have to apply for unemployment benefits. If people want to build a career and benefit themselves and society, they will do it. Surely, the diploma in their pocket and the contacts established during their studies are sure to help them. But, as I noted before, now students choose sought-after professions with decent salaries and the fields where they are really sought-after.

# Russian Education

## for Students from Kyrgyzstan

Throughout their centuries-old history, Russia and Kyrgyzstan have been maintaining reliable, friendly and strategic relationships. Education in Russia has always been in high and stable demand with Kyrgyz school leavers. High-quality and fundamental education obtained at Russian universities provides graduates with the opportunity to pursue career and research as well as find a job not only in Russia and Kyrgyzstan but also all over the world.

Albert Zulkharneev, Head of the Russian House in Bishkek, talks about Kyrgyz school students' interest in Russian higher education and training highly qualified specialists for Kyrgyzstan economy.

## **AFFORDABILITY OF RUSSIAN EDUCATION**

In Kyrgyzstan, Russian universities have proved themselves as leaders in such disciplines as mathematics, physics, chemistry, in training competent IT programmers, medical professionals, creative professionals.

For the academic year 2022-2023, the Russian Government allocated 500 quota places for citizens of Kyrgyzstan to study at Russian universities. Given the Kyrgyz school leavers' demand for Russian education which increases from year to year, it was decided to increase the number of state-funded places up to 700 for the academic year 2023-2024.

**Thus, the trends of recent years show a gradual and stable increase in the number of quota places. The competition is three applicants per place. As of October 1, 2021 over 8,000 citizens of Kyrgyzstan pursue educational programs of higher education – Bachelor's, Specialist's, Master's programs in all modes of study at Russian universities, including foreign branches of Russian universities and joint educational organizations.**

According to the statistics, such fields of study such as medicine, economics, informatics and computer engineering as well as all engineering majors have been in high demand among Kyrgyz applicants over the last years.

Prospective applicants choose all available and alternative ways to get admitted to Russian universities. However, it should be noted that most school leavers apply within the Russian Federation Government quotas as this guarantees stability, security and scholarships while studying.

## **UNIVERSITY ADMISSION REQUIREMENTS**

Candidates to study at Russian universities within the Russian Government quotas are selected in the territory of Kyrgyzstan only by efforts of the representative office. This is stipulated by the bilateral agreements and eliminates all corruption risks to the greatest possible extent.

**Prospective applicants upload the required documents only online!** Applicants get all the detailed information on the documents through all the social media platforms of the representative office, through handouts at the meetings, and from mass media. The consultations are given in different formats.

If we do a quick recap of document requirements, candidates must register in the [education-in-russia.com](http://education-in-russia.com) system and attach to their application the scanned original documents, the list of which is posted on the official web pages of the representative office.

- 11th graders must upload their 10th grade transcript
- All candidates must upload the notarized translation of their regular passport (international passport) as well as documents confirming their individual achievements: certificates and diplomas, including those confirming their participation in volunteering, sports and cultural and educational contests, Olympiads

**Candidates can choose up to six universities in three federal districts of Russia at the same time. Applying for Bachelor's and Specialist's programs, applicants must take compulsory tests in major subjects. For other degree levels, the portfolio competition is held.**

According to the selection results, the lists are compiled, which are approved by the working group. The representative office does not conduct the interview, and candidates are selected according to the authorized procedure. All the procedures are extremely transparent for everyone interested.

We advise candidates to prepare all the required documents for application in the best possible way, meet all the technical requirements for filling in the application form and adhere to the document upload dates.

**The Rossotrudnichestvo representative office in Kyrgyzstan** makes extensive focused efforts to attract Kyrgyz school leavers to Russian universities. Twice a year, in recent years, the Russian education weeks are held with the participation of the top Russian universities. Specialists from the universities meet with school and university students of educational organizations in all the regions of the country.

Every week we publish the information on the Russian universities and their Olympiads. The online career guidance marathon "Russia is with You" took place in Kyrgyzstan in October-November. The school students asked the career guidance specialist their questions and got more detailed information on different fields and professions, on how to achieve career success and how to pay much attention to the secrets of successful communication and personal presentation that will help adapt to any team.

 The Russian House in Bishkek

## **DEMAND FOR GRADUATES**

Graduates of Russian universities work in all areas of life in Kyrgyzstan. Many modern public officials of the country, business leaders, university and school teachers, doctors, IT specialists, artists are graduates of Russian universities. Good high-quality and fundamental education allowed many of them to occupy leadership positions at government entities and various commercial organizations.

The country's economy needs top-notch specialists at the moment. We are talking about many sectors, be it mining engineering, pedagogy, medicine, or any other sought-after area of activity. In this regard, graduates of technical universities are promising specialists with expected high salaries in Kyrgyzstan.

*The meeting of Russian cosmonaut Salizhan Sharipov with the young journalists from the Russian House in Dushanbe*

# Russian Education

## for Students from Tajikistan

Russia and Tajikistan are strategic partners and allies in many areas. This is also supported by the number of allocated education quota places – it grows from year to year. If 750 quota places were allocated for the republic (around 5,000 people submitted their applications then) last year, around 1,000 places are expected in a new quota campaign for the academic year 2023/2024, as agreed by the heads of the two states – Vladimir Putin and Emomali Rahmon. Thus, one of the biggest education quotas in the world has consistently been allocated for Tajikistan.

Ivan Ivanov, Head of the Rossotrudnichestvo representative office in Tajikistan, talks about how the representative offices of Rossotrudnichestvo in Tajikistan help students prepare for admission to Russian universities and what applicants should know to successfully pass the competitive selection for quota places.

## **PREPARATION FOR ADMISSION**

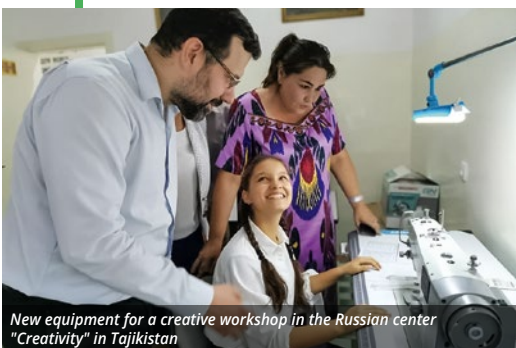

Today around 30,000 students from Tajikistan study at Russian universities at all education levels from Bachelor's degree to PhD degree. Russian higher education is rightfully sought after by local young people. So it comes as no surprise that we can observe a dynamic increase in applicants' interest every year.

The most ambitious 10-11th graders start preparing for the quota campaign of admission to Russian universities in advance, taking preparatory courses at the Russian Houses in Dushanbe and Khodzhent. The courses offer in-depth study of engineering, humanities, medicine, and economics subjects. Students are taught by the participants of the Russian Teacher Abroad project – subject teachers who work using Russian educational programs. This also gives an edge to those who apply to Russian universities directly and on equal terms with Russian citizens using the materials that they have already studied and meeting the requirements that are already familiar to them.

**The remarkable thing is that the level of training is so high that around 80% of students who completed our preparatory courses get successfully admitted to Russian higher education institutions within the quotas or as part of direct recruitment.**

*September 1 in the Shahsiyat gymnasium in Dushanbe*

*New equipment for a creative workshop in the Russian center "Creativity" in Tajikistan*

*Big ethnographic dictation in Dushanbe*

### HOW ARE CANDIDATES FOR QUOTA PLACES SELECTED?

The quota campaign starts when the electronic registration system is launched. All candidates create personal accounts where they upload their personal data, scanned documents, portfolios and specify their achievements. Then candidates are assigned identification numbers. Only applicants have access to personal accounts, and third party intervention is out of question.

Last year the procedure for testing and **selecting applicants for Bachelor's and Specialist's programs** was conducted online, in the system of so-called proctoring. On the appointed day, applicants took major subject tests online, with mandatory video surveillance – Russian specialists monitored the procedure integrity to prevent violations and fraud. After the results had been processed, the applicants got the total score through their Personal Accounts. Their current place in the ranking was also displayed there.

The Russian House  
in Tajikistan

**NB.** Taking into account that 93% of the country area are occupied by mountains, stable high-speed internet is not available everywhere, and this can affect the online testing procedure. That's why, to provide equal opportunities for applicants, we created the external testing center in cooperation with our partners – the MegaFon Tajikistan company and the cultural and educational center under Dushanbe eparchy. More than 100 computer workplaces with high-speed internet were allocated. Young men and girls managed to connect and take the test. This practice approved itself, and we will extend similar practices in the future.

Applicants for Master's, PhD and residency programs are selected as in the old times: in the format of oral in-person/ remote interviews. For this purpose, a special commission consisting of Russian universities' representatives is established– for example, last year more than 50 people from 24 universities made up the group. The commission works as part of four clusters: technology, medicine, humanities, and creativity.

The applicants' level of competence is assessed not only by the universities' representatives in the commissions but also by the representatives of the Ministry of Education and Science of Tajikistan, the Russian diplomatic mission, business entities and even doctors from the military hospital of the 201th Russian military base. As a result, we have a qualified group of specialists competent in all areas.

**The documents for everybody changing their status from applicant to student at the final stage are executed by our colleagues from the Ministry of Science and Higher Education of Russia.**

*The annual music festival held by MegaFon Tajikistan*

## **EDUCATION FAIRS AND MEETINGS**

Career guidance at the Russian Houses in Tajikistan comprises a broad range of activities. We place the information on the Internet, on social media platforms, in mass media, in the HED magazine. We openly participate in live radio and TV programs, answering applicants and their relatives' questions.

It is important to bear in mind that Tajikistan is a friendly country, and families take an active part in their children's life. That's why we always meet applicants halfway and give explanatory consultations both in the capital and in the regions.

Another area is offline meetings with the representatives of partner universities. They not only come to our platform with their career guidance activities but also conduct tests and hold Olympiads. We also work a lot with the universities as part of the traditional education exhibition fair. This summer the 10th anniversary exhibition of Russian education took place in Dushanbe and Khodzhen. The representatives of 34 universities came here, and the exhibition was visited by around 9,000 people – school students and their parents, university students and teachers during three days.

The exhibition aims to present universities' opportunities, fields of study, help young people decide on their future profession, familiarize them with the regional universities and cities of Russia. Local applicants traditionally choose Top 3: Moscow – Saint Petersburg – Kazan. However, there are a lot of decent universities and scientific centers in other regions of our country.

**And we want to get across this idea so that parents and children can ask the university representatives some questions themselves, get the information not only about studies and scholarships but also about living conditions, extracurricular activities, the city itself, climate and even about the Tajik compatriot association in the region (this aspect is also important to many).**

We consider the big annual event from our friend and partner, the MegaFon Tajikistan company – MegaFon Fest one of the mass events to keep the public informed. In 2022, this real festival for the city residents brought together over 20,000 people. The Rossotrudnichestvo information center was engaged in the event.

## **POPULAR PROFESSIONS**

The technology cluster is our unconditional priority. In particular, the **IT industry**. Russia is an apparent leader in this field, that's why a great number of universities with many years of tradition, with the constantly updating methodological framework and well-developed facilities and resources are sought after by applicants.

**Architecture, civil engineering, electric power engineering and electrical engineering** are also popular in our country. **Medicine: general medicine, dentistry, surgery** is a traditionally important field in the republic. **Humanities** are in great demand. The priorities change a little from year to year but **economics, international relations and law** are always in Top 3.

The top creative professions are **design, directing and TV, musical and instrumental arts**. Speaking from my own experience, being a judge in the cultural cluster is a right that should be deserved because students prepare, come with their instruments, someone plays scenes from stage performances, someone sings, someone dances – this is always a very decent performance. We have built close ties with Russian universities for culture and arts.

*The lyceum students from Tajikistan are prize-winners of the international ecological competition*

**We wish good luck to all of you this year!  
Don't be nervous, check your facts as we  
often say, take exams, try your hand.  
I wish you success! See you in Russia!**

# Russian Education

## for Students from Turkmenistan

Citizens of Turkmenistan apply to Russian universities in different ways. Many of them make significant efforts to get a coveted state-funded place within the quota. Some senior high school students take an active part in online international and university Olympiads, win prizes, get bonuses when applying. Russian education is in great demand in Turkmenistan, that's why many students are ready to study even on a fee-paying basis.

Yulia Zaytseva, a Rossotrudnichestvo representative in Turkmenistan, talks about how applicants are selected for Russian universities and how to prepare for an interview.

## **ADMISSION WITHIN EDUCATION QUOTAS**

In 2022, the Russian Government allocated 250 quota places for Turkmenistan for all study programs – from Specialist's degrees to PhD degrees. This is 50 places more than in 2020. Every year we can observe a significant increase in the number of those wishing to get into Russian universities, the competition is very high. So, over 2,000 applications were submitted in 2021, this is actually eight applicants per place.

Russian universities recruit students to apply for Bachelor's, Specialist's, Master's, PhD programs. Besides applying within employer-sponsored education quotas, citizens of Turkmenistan can participate in entrance exams for various majors held by the universities offline and online. Fee-paying education is also available.

It is difficult to determine the specific number of students at Russian universities because many people contact educational organizations directly. But we think that thousands of students study in Russia.

### **THE RUSSIAN HOUSE'S ACTIVITIES**

This year the Russian House in Ashgabat took part in the major international exhibition "Healthcare, Education and Sports in the Era of Renaissance of a New Epoch of the Mighty State." The big exhibition stand displayed all the information on selection within the quota for the academic year 2022/2023, materials about top Russian universities every foreign citizen can apply to. The information was also available online.

**The Russian House actively cooperates with the Turkmen-Russian secondary school named after A.S. Pushkin where school students are taught according to Russian standards. This is one of the leading schools in the country with highly motivated school leavers - they score high in the Unified State Exams, get admitted to Russian universities within the quota, study in state-funded places.**

Besides, we make presentations, post the information on the Russian universities, enrollment campaign aspects, Olympiads and competitions on our social media platforms, talk about majors and living conditions. We try to give as much useful information as possible about the city and region where applicants plan to study.

## HOW APPLICANTS ARE SELECTED BY RUSSIAN UNIVERSITIES

The selection process has two stages.

**1 The first stage** – application submission: candidates fill in the application form, attach the required package of documents and wait for verification. All these steps are done online on the specially designed portal [education-in-russia.com](http://education-in-russia.com). This is a very convenient and modern way because you can do all the required steps from home.

Later, at the fixed time, applicants undergo selection tests: a test for prospective Bachelors and Specialists and an interview for Masters, PhD students and medical residents. This is the most difficult period for prospective candidates.

The portfolio competition is held, where bonus points for individual achievements are calculated, for example, for participation in international Olympiads, volunteering and sports victories. All the points are calculated exactly based on the fixed routine with categorization.

At the end of the first stage, the sheet with the selection tests results is attached to the application of each candidate who successfully passed the test or interview.

Yulia Zaytseva

**2 The second stage** – sending applications of candidates who successfully passed the selection tests for verification to the central office of Rossotrudnichestvo. Later, the applications are sent to the Ministry of Science and Higher Education of Russia for further distribution, referral and enrollment of applicants at the universities.

The Embassy of the Russian Federation  
in Turkmenistan

### **TIPS TO PREPARE FOR AN INTERVIEW**

You can successfully pass the selection tests if you study every day. Do not wait for your final year at school to start preparing anxiously for your exams. Learning new material, looking through the tasks of the Unified State Exams, doing all possible tests, reading imaginative and academic literature, participating in intellectual games, developing yourself – all of this should be done every day, and you should start doing it now and pursue your goal systematically. This is a key to success.

Definitely, the strongest piece of advice is to choose a major and future profession to your liking, as the saying goes. It is important for us not only to provide students with high-quality education but also to allow them to make constant progress, reveal their best character traits, intellectual abilities, become respected citizens and professionals.

### **POPULAR FIELDS AND UNIVERSITIES**

Applicants from Turkmenistan show the greatest interest in such fields of study as **medicine, law, pedagogy, and engineering**.

Among the top Russian universities candidates strive to get into are:

- Peoples' Friendship University of Russia
- Saint Petersburg State University
- Moscow Institute of Physics and Technology
- National Research Nuclear University MEPhI
- Bauman Moscow State Technical University
- The Russian Presidential Academy of National Economy and Public Administration
- Financial University under the Government of the Russian Federation

~~~~~

**After completing their studies in Russia, students go back home to confirm their diploma and find a job in Turkmenistan. As a rule, graduates are employed in their degree field without any difficulties. Russian higher education is highly respected and graduates of Russian universities are highly valued here.**

~~~~~

# International Student Admission and Adaptation

## at M. K. Ammosov North-Eastern Federal University

Foreign citizens and stateless persons have the right to apply to Russian universities for educational programs of higher, secondary and continuing professional education.

Today over 300,000 international students study in state-funded and fee-paying places at Russian universities. In the following years, Russia plans to increase the number of students up to 710,000. Russian education is especially popular among students from the CIS countries – around 30% of students enrolled through Rossotrudnichestvo are our nearest neighbors.

Let's look at the aspects of admission, studying and adaptation of international students at Russian universities considering an example of North-Eastern Federal University.

## **THE WAYS TO GET ADMITTED**

**The most popular ways to get admitted to Russian universities are to get a quota from the Russian Government and pass the universities' internal entrance exams.**

To apply for **quota** places, you must register in the education-in-russia.com system, fill in the application form, attach your documents and follow further instructions. You are to pass the competitive selection organized by Rossotrudnichestvo in your country and choose the university you want to apply to.

For example, you can specify North-Eastern Federal University in your application form as a priority university to apply to. Later you will get a referral to the university, and you can come and begin your studies after you obtain your visa.

If you want to apply for a state-funded place or a fee-paying place **on equal terms**, register on the NEFU website [postupi.s-vfu.ru](http://postupi.s-vfu.ru).

In Applicant's Personal Account on the NEFU website upload your documents, secondary school certificate or university diploma with the translation into Russian and your passport also translated into Russian. After you fill in the application form, your entrance exam date will be fixed. To apply on a contract basis, you must pass only one exam in your major subject. After you get the exam result, you must sign the enrollment consent and the agreement.

**Marat uulu Ulukbek, Kyrgyzstan. The first-year medical resident at the NEFU Institute of Medicine**

### **Why did you decide to study at NEFU?**

– After finishing school, I took part in the presentation of Russian universities in Bishkek, where NEFU was presented. We took the test, I passed it successfully and managed to enter NEFU.

### **Did you take a pre-university training course at the preparatory faculty?**

– No, I learned Russian quite well at school, and that's why I could join the university without studying at the preparatory department.

### **How did you imagine studying at the university you chose? Did it meet your expectations?**

– I was afraid that it would be very cold and I wouldn't be able to adapt. But now I have a lot of friends and a job in Yakutsk, and I've got used to the climate.

### **What is your field of study? Share your impressions of your studies.**

– Now I am pursuing a residency in Pediatrics and before that I had completed my Specialist's degree in this field at NEFU. Surely, studying is difficult but you can cope with it.

### **Do you have a favorite set of disciplines?**

– Topographic anatomy. It is interesting because we can study each human organ.

### **What difficulties do you have to face while studying? Who helps you overcome them?**

– Now the main difficulty is to handle patients, or rather their parents. We have a lot of difficult situations but we can cope with everything thanks to our senior colleagues.

Higher education in Russia is pursued by a great number of students from the countries of Central Asia:

-  **61,000** students from Kazakhstan
-  **48,700** students from Uzbekistan
-  **30,600** students from Turkmenistan
-  **23,100** students from Tajikistan
-  **8,600** students from Kyrgyzstan

### POPULAR FIELDS OF STUDY AMONG NEFU INTERNATIONAL STUDENTS

- General Medicine
- Dentistry
- Public Health
- Economics
- Management
- Human Resource Management
- Mining Engineering
- Oil and Gas Engineering
- Informatics and Computer Engineering
- Philology
- Tourism

### ADVANTAGES OF STUDYING AT NEFU

- A wide range of majors
- Affordable tuition fees for all fields of study
- The opportunity to get an increased academic scholarship
- The number of state-funded places
- Comfortable dormitories

## **TUITION DISCOUNTS**

**International students enrolled in fee-paying places have the opportunity to reimburse a considerable part of their expenses, getting a special grant.**

NEFU offers this grant for all international students. It covers up to 60% of the tuition fee. For example, if the Mining Engineering program costs 341,000 RUB\* for Russian students, international students will have to pay 130,000 RUB\*. You can pay reduced tuition fees at all degree levels – from Bachelor's degree to PhD degree and residency.

\* The tuition fee is specified for the academic year 2022/2023

## **ADMISSION TO NEFU**

### **Bachelor's and Specialist's programs**

#### **Application dates**

- June 20 – NEFU starts accepting documents
- July 15 – the deadline for accepting documents from persons applying based on the results of internal entrance exams
- If any extra places are available, enrollment in fee-paying places can be extended until October 15

#### **International entrance exams – July 16-25**

#### **Enrollment orders**

- July 30 – the stage of priority enrollment
- August 5 – the main stage of enrollment

### **Master's programs**

- July 3-31 – acceptance of documents
- August 1-28 – entrance exams
- August 17-18 –enrollment orders (state-funded places)

Admission to Bachelor's, Specialist's and Master's programs

### **Dovletnazar Seytnazarov, Tajikistan. The first-year Master's student at the NEFU Institute of Physics and Technologies**

I chose NEFU for several reasons. Firstly, I wondered what Yakutia was like. Secondly, my attention was caught by the modern comfortable dormitories located close to the educational buildings. Thirdly, my friends who entered NEFU earlier advised me to choose this university.

I didn't study at the NEFU Preparatory Faculty as I was well prepared in Dushanbe, my home city. But I'd advise applicants planning to apply to NEFU to undergo pre-university training on a compulsory basis and not to regret spending one year there.

At the moment, I am a first-year Master's student majoring in Radio Engineering at the Institute of Physics and Technologies. I adapted quickly, and the university fully met all my expectations. Our institute employs highly qualified teachers with many years' experience. The training and laboratory centers are fitted with state-of-the-art technical equipment.

It is very interesting for me to study and take elective courses. My favorite subject is physics. I am passionate about radioelectronic devices, I like fixing them. My fellow students help me overcome the difficulties related to the theoretical part of the Programming Languages discipline.

I like everything in my student life. I have a lot of friends of different nationalities.

**Hojiakbar Murojon ugli Ganibaev,  
Uzbekistan. The second-year student at  
the NEFU Institute of Medicine**

I found out about NEFU on the Internet. I familiarized myself with the educational programs and extracurricular activities of students and decided to apply to this university.

NEFU turned out to be exactly what I thought it would be. If we have any difficulties, the International Relations Office and the teachers who treat us very well help us. I didn't study at the NEFU Preparatory Department, but my friends studied there and passed their exams with honors.

The university has everything international students need for useful, merry and interesting life. The university has various student associations such as the student trade union, NEFU International, medical volunteers, and others. In our learning process I like anatomy most because we study the organisms at the lessons.

After completing my Specialist's degree, I plan to pursue a residency at NEFU.

Winter in Yakutsk is very cold. But if you dress warmly, you won't be cold. People are friendly and nice here. I've made a lot of friends. It is very interesting and funny to live and study with them.

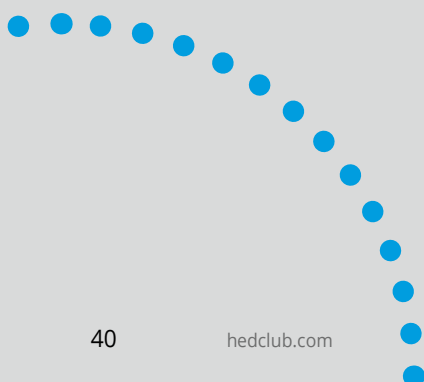

**NEFU TODAY**

- 17 institutes and faculties
- 2 colleges
- 11 secondary vocational education programs
- 228 Bachelor's programs
- 55 Specialist's programs
- 126 Master's programs
- 49 PhD programs
- 39 residency programs
- 204 continuing professional education programs
- 5 research institutes
- 100+ research and education centers and laboratories
- ≈19,000 students
- 1,000+ international students

▶ NEFU video

## ACCOMMODATION AND ADAPTATION

Russian universities are always happy to accept international students. To help yesterday's school students to quickly adapt to a new environment, NEFU holds a great number of various events such as orientation weeks, the annual friendship festival NEFU-EXPO, tours around the region, sports events, roundtable discussions, conferences.

One of the priority areas of NEFU's activity is the social sector. **The university comprises:**

- 9 educational and laboratory buildings
- The Sergelyakh Lights cultural center
- The Yunost indoor track
- Swimming pool
- Skiing center
- Museums
- Greenhouse
- Cafeterias

All the dormitories are located within walking distance of the educational buildings. The accommodation fee is **1,128 RUB per month**.

NEFU campus

A tour to the Tekhtyur sports and entertainment center (Adylbek uulu Kayratbek, the sixth-year student at the Mining Institute)

Besides studying at NEFU, you can easily find an occupation to your liking. The university has created a favorable environment for developing students and teachers' creative and managerial abilities. For example, there are experimental platforms, a business incubator, music workshops, gyms, coworking centers such as the Boiling Point, the Youth Initiative Center, the Sever design center. **To find new friends and adapt to the university life more quickly, you can join the international student club NEFU International.**

For international students who show themselves in their studies and the university life, the university holds sightseeing tours and free tours around Yakutia every year. For example, it holds a tour to Oimyakon – the Cold Pole which has very beautiful landscapes, lofty mountains and clean air! In spring you can visit the sports and entertainment center where you can go skiing and snowboarding and slide down an ice chute.

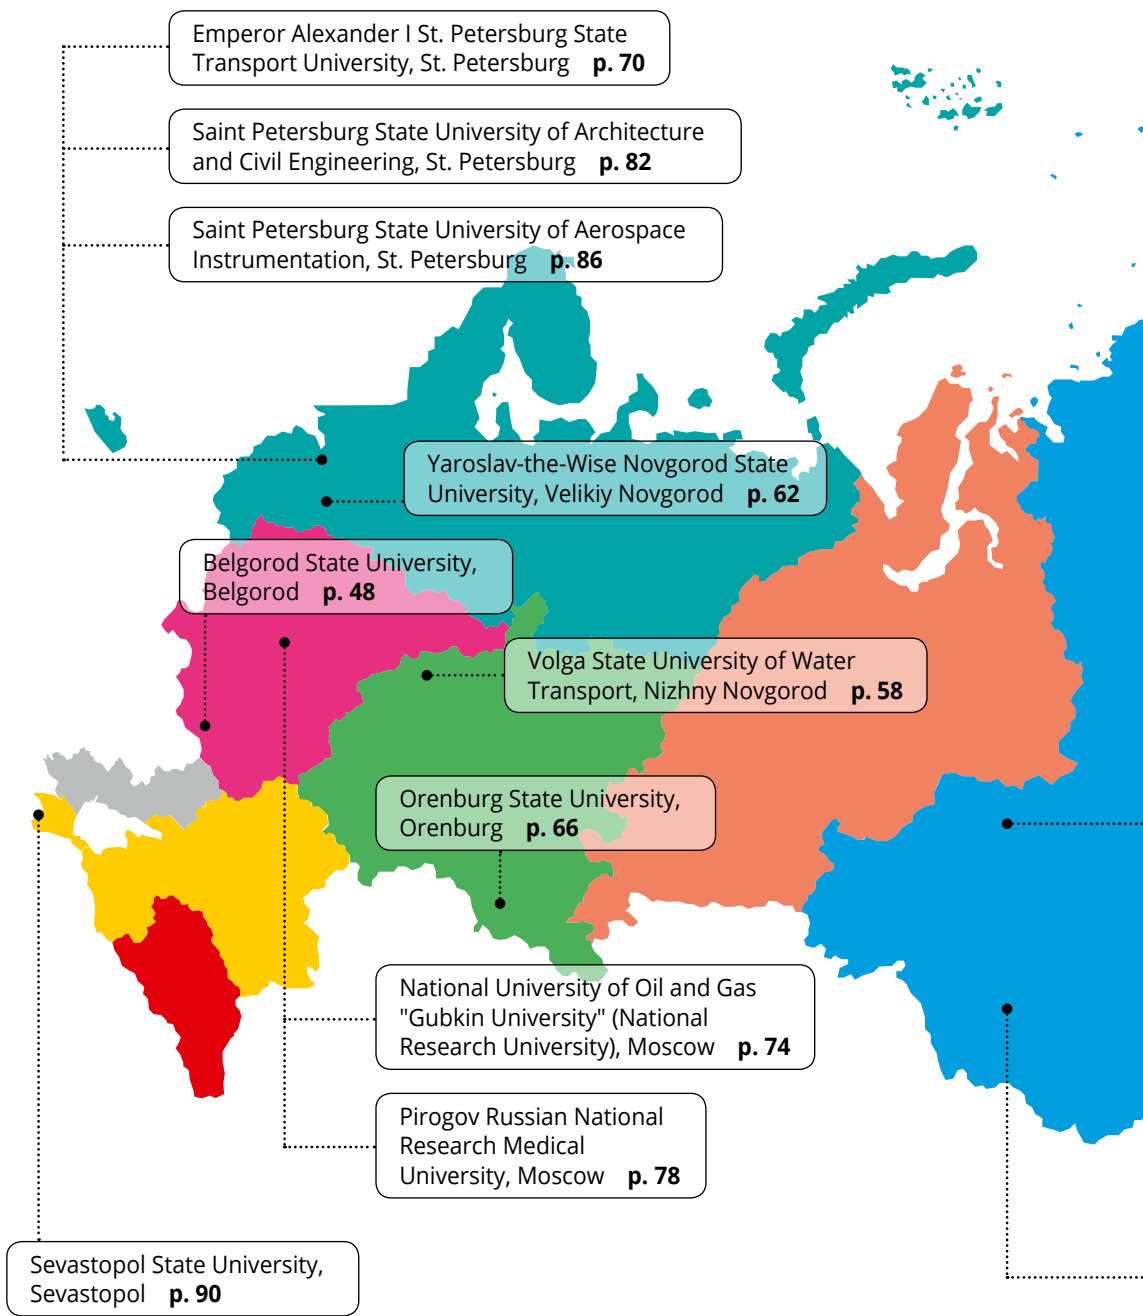

In summer you can see all the beauty of the Lena River, admire the Lena Pillars which are around 400,000 years old and enjoy the view from a height of 220 meters.

## RESEARCH

The university conducts advanced research and develops scientific schools in a number of areas:

- archeology
- chemistry
- biodiversity, and others

The ASU scientific schools enjoy well-deserved recognition with the scientific community.

### The university is the youth policy management leader in the region.

The university students are members of numerous public, scientific, creative and athletic associations, clubs and groups, participate in exciting student festivals, regional, all-Russian and international forums and conferences, contests and competitions.

## INTERNATIONAL STUDENT OFFICE

ASU enrolls students from all over the world. The Center advisors help international students adapt to the university and join in the eventful educational, social and cultural life of the university.

### INTERNATIONAL STUDENT ASSOCIATION

It supports and helps students from other countries.

The university solemnly celebrates national holidays. Thus, every spring the university organizes a ceremony dedicated to Nowruz, the national holiday of Persian and Turkic peoples.

### PREPARATORY DEPARTMENT OF RUSSIAN AS A FOREIGN LANGUAGE

In 2022, the preparatory department for international students of the ASU Institute of Humanities set a record in the number of enrolled students from the CIS countries and other foreign countries.

Thanks to almost eight years of effective work with students, the preparatory department annually expands the geography of countries representatives of which wish to study Russian at Altai State University.

## ASU INSTITUTES

### # INSTITUTE OF BIOLOGY AND BIOTECHNOLOGY

The institute students do a lot of laboratory research, undertake summer field internships, educational internships and work placements in expeditions, at the university laboratories, research institutes of Russia. Graduates are in demand in healthcare, education, forestry, agriculture and fishery, chemical engineering and biotechnology.

### # INSTITUTE OF HISTORY AND INTERNATIONAL RELATIONS

It is one of the leaders in higher classical history education in Russia. This is over 700 students, 2 specialized departments, 8 educational and scientific centers and laboratories, international mobility and internship programs in Europe and Asia. Students effectively pursue Master's, PhD and doctoral degrees.

### # INSTITUTE OF GEOGRAPHY

It trains specialists in Earth sciences, service, tourism, hospitality, landscape design as well as land planning and cadastre, capable of responding to the global challenges of modernity and contributing to the sustainable development of nature and society.

The institute graduates work in the system of environmental protection and natural resource management, at higher education institutions and research institutes, design organizations, in the field of leisure services and the travel industry as well as at the schools in the city and territory.

### # INSTITUTE OF MATHEMATICS AND INFORMATION TECHNOLOGIES

It trains elite professionals in information technology, programming and mathematical methods who are capable of developing new methods and algorithms, innovative software products as well as implementing research projects, self-learning and adapting to the rapidly changing world of big data and smart technologies.

### # INSTITUTE OF LAW

It is one of the legal education leaders in the Siberian Federal District. For more than 50 years, it has been training specialists in law who successfully work throughout Russia and far beyond its borders. The institute has its own legal clinic "Themis" and the Legal Assistance Center, unique teaching staff.

### # INSTITUTE OF DIGITAL TECHNOLOGY, ELECTRONICS AND PHYSICS

It trains highly qualified specialists in high technology areas of natural sciences and information and communication technologies. The university implements the model of continuing practice-oriented education "Bachelor's degree-Master's degree-PhD degree" in all the fields of study – information security, Informatics and computer engineering, radio physics, physics.

**# INSTITUTE OF HUMANITIES**

It trains specialists in humanities, social sciences, art and design, capable of responding to the global challenges of modernity and developing the national and international humanitarian agenda.

**# INTERNATIONAL INSTITUTE OF ECONOMICS, MANAGEMENT AND INFORMATION SYSTEMS**

It is the region's largest institute for economics that provides fundamental training for bright and competent specialists in economics, management and information systems. Our graduates are socially responsible leaders in business, government authorities, local and international communities who are capable of solving big problems and leading any company to success.

**# INSTITUTE OF CHEMISTRY AND PHARMACEUTICAL TECHNOLOGIES**

It trains specialists in chemistry, pharmacy, biotechnology, chemical engineering, and technosphere safety. The institute graduates are professionals capable of solving research and production tasks and holding managerial positions at organizations and enterprises.

“

**Avetis Grigoryan, Uzbekistan. The second-year student majoring in English and History at the Faculty of Foreign Languages of the Institute of Pedagogy**

I entered BeISU on my acquaintances' recommendations, and I chose this faculty because I have a good command of English. It trains future teachers, translators and interpreters. We started studying major subjects in the first semester. We have professional and friendly teachers. As to technical facilities, we have everything we need.

I live in dormitory № 1. The living conditions are excellent. Student dormitories at BeISU are among the best in Russia.

The campus has various sports grounds, including a soccer field, a basketball and volleyball court, a sports ground with sports equipment and pull-up bars. BeISU always holds various sports competitions.

I'd advise future first-year students to progress in the areas they like. Don't follow other people's advice on where you should go and what you should do, if that's not interesting to you!

“

**Vlada Gotsak, Kazakhstan. The first-year Master's student majoring in Oriental and African Studies at the BSU Institute of Oriental Studies**

Studying at the Institute of Oriental Studies of Banzarov Buryat State University, I not only gained excellent knowledge but also had an infinite number of warm memories and positive emotions. The teaching staff, university administration, and especially the International Relations Department – all of them were sympathetic to us and always met us halfway, never refusing to help.

After earning my Bachelor's degree, I decided to continue my education at my favorite university. And I keep saying proudly that I am a student at Buryat State University!

“

**Zahriddin Rahmatov, Tajikistan. The sixth-year student at the BSU Institute of Medicine**

I had been dreaming of becoming a doctor since childhood. And I decided to come to Russia, namely the city of Ulan-Ude, literally in summer, before applying.

Our university employs out-and-out professionals and provides high-quality training! And I really like studying here and living in such a beautiful city.

I'd like to express my deepest gratitude to all the staff members of the International Relations Department not only as an international student but also as an ordinary person – for a warm welcome and conscientious attitude to all international students. Thank you for everything!

“

**Maksat Hemraev, Turkmenistan. The first-year Master's student majoring in Digital Technologies in Economics at the Institute of Economics and Management**

I have the warmest memories of our university. Inside the university, you become at once a part of one big family where you will be taken care of and supported in difficult situations, especially if you are a citizen of a foreign country. The university's inner culture allows you to blend into the student life and make new friends and acquaintances at once starting from the first year of study. We have student councils, and the university always holds events we should participate in. You'll just not be able to keep out of it.

I am thankful to Banzarov BSU and all the teaching staff for the knowledge which I gained at the Faculty of Economics and Management and successfully apply now at the Department of Planning and Finance. It employs cool and friendly teachers, entrepreneurs, Professors and Doctors of Sciences.

Also, I am grateful for the opportunity to live in comfortable conditions. There is a football field near the dormitory, and the dormitory comprises a reading room where you can not only read but also watch movies with your friends.

Looking back, I can safely say that student years are the best years of human life.

## POPULAR STUDY PROGRAMS

Students pursuing engineering fields of study undertake work placements at real enterprises-the university partners where students learn the subtle details of their profession and often get a job as early as this stage. Most graduating Bachelors are fully-fledged specialists in their field already!

Many of our graduates pursue Master's degrees combining the learning process with their work activities. This is facilitated by a flexible study schedule.

### GENERAL MEDICINE

There is a traditionally high demand for places for training medical specialists. When you apply to the Institute of Medicine, you are not required to take the Unified State Exam in chemistry – you must pass the Internal entrance exam – the professional chemistry test.

Students undertake internships at the medical institutions in the city of Ulan-Ude where they acquire skills and abilities required for such a demanding and important profession under the supervision of experienced tutors

### LINGUISTICS. TRANSLATION AND TRANSLATION STUDIES

The Institute of Philology, Foreign Languages and Mass Communications is known far beyond the university. It is here that graduates acquire the very same "London" accent which is highly rated among professional interpreters.

### ORIENTAL AND AFRICAN STUDIES

At the Institute of Oriental Studies, you can study not only Oriental languages and literature but also such fields of study as History of Asian and African Countries; Socio-Economic Development of Asian and African Countries, Foreign Studies, and Tourism.

You can also study popular languages – Korean, Japanese, Chinese, Mongolian languages as part of the exchange program using network modes of study.

While studying, students have a unique opportunity not only to visit the target-language country but also to undertake study placement there and then embark on a Master's degree, if desired.

### MATHEMATICAL SUPPORT AND ADMINISTRATION OF INFORMATION SYSTEMS

#### Information Systems and Databases major

The region's best IT specialists are trained here. Based on the results of the finals of the World Programming Championship in Northern Eurasia – 2022, it can be said without prejudice that BSU programmers are the best in Eastern Siberia!

### LAW

The competition is high, even for fee-paying places. This is not surprising as BSU lawyers are rightfully considered the region's best! Bachelor graduates can pursue Master's programs later.

## **INTERNATIONAL COOPERATION**

- Student, PhD student, teacher exchange
- Research
- Joint scientific papers
- Holding international symposia and conferences
- Inviting international professors, researchers and practitioners from foreign partner universities

Every year BSU participates in education fairs in  Mongolia,  Uzbekistan,  Kyrgyzstan,  Tajikistan.

## **STRONG CORPORATE CULTURE**

The university students are members of various university associations, hold the top spot in regional and all-Russian scientific, sports and creative contests, participate in international competitions.

The **Imagine International Student Association** successfully works at the university.

The Department of Russian as a Foreign Language in cooperation with the International Relations Department holds **traveling summer and winter schools on the shore of Lake Baikal** with an eventful academic (Russian language classes, master classes) and sightseeing and entertainment program.

Peoples' Friendship Festival

## **UNIQUE UNIVERSITY LOCATION**

The university is located in the sunny capital of the Republic of Buryatia – Ulan-Ude, two hours' drive from Lake Baikal, one of the world's oldest water bodies, which contains the fifth part of the world's freshwater resources.

Both Baikal and the coastal areas are notable for their unmatched flora and fauna, which makes these places really unique and always attractive to scientific minds and numerous travel enthusiasts and real adventure seekers.

Lake Baikal, Turtle Stone

## **ACCOMMODATION**

The university provides accommodation for all full-time students in the student dormitory.

**Fee 850 – 3,100 RUB per month**

**Average expenses:**

- One-room apartment rental cost – 12,000 RUB and more per month
- Lunch in a canteen – 100 RUB and more
- Lunch in a café – 250 RUB and more

### **THE UNIVERSITY COMPRISES**

- Institute "Maritime Academy"
- Institute of Shipbuilding and Water Transport Infrastructure
- Institute of Economics, Management and Law
- **Branches in the cities:** Astrakhan, Kazan, Perm, Rybinsk, Samara, Ufa

### Tuition fees per year

Full-time studies  
118,000 – 300,000 RUB

Extramural studies  
50,000 – 65,000 RUB

📍 Nizhny Novgorod, Nizhny Novgorod Region, Russia

## **CAREER GUIDANCE**

Recruitment of international students to study at VSUWT is one of the priority areas of the university's international activity.

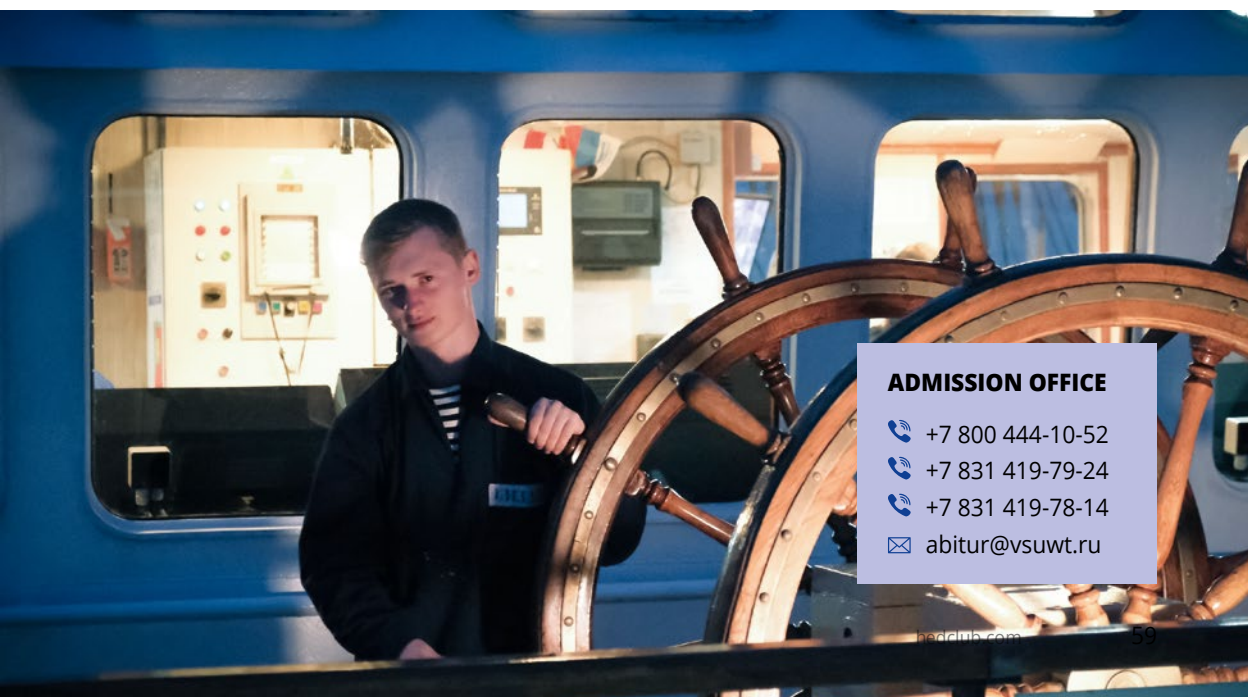

The Volga University team conducts consistent career guidance activities for international applicants. The staff members of the Admission Office participate in education fairs and recruiting events, both offline, with country visits, and online.

- Participation in the international education fair "Education and Career" in Minsk, Belarus 🇧🇪
- Doors Open Day for cadets and students of Kyrgyz Aviation Institute named after I. Abdraimov 🇰🇾
- Cooperation with the WORLDUZ recruiting company, Uzbekistan 🇺🇿
- VSUWT online presentation for applicants from Nukus, Uzbekistan 🇺🇿
- Participation in the education fair in the city of Uralsk, Kazakhstan 🇰🇿
- Participation in the conference held by the Chinese-Russian Technology Park in the city of Yantai, China 🇨🇳

## **VSUWT ADVANTAGES**

Today the university is rightfully considered a leading transport university in the Volga region. It is ranked so high thanks to both highly qualified academic staff and modern facilities and resources.

The university boasts a number of **unique simulators** for future navigators, mechanics, electromechanical technicians, radio officers and ecologists to hone their practical skills: virtual reality simulator for ship damage control, TRANSAS NPro-5000, ERS-5000, MARLIB-SNPro-500, NT-6000.

### Specialization

#### OPERATION OF SHIP ELECTRICAL EQUIPMENT AND AUTOMATION FACILITIES

**Qualification:** Electrical Engineer

**Full-time – 5 years 6 months**

**Extramural – 6 years**

**Professional activities:**

- operation of electrical equipment and automation facilities of cargo and technical fleet vessels
- command positions in electrical engineering at onshore enterprises and basin boards of waterways

### Specialization

#### NAVIGATION

**Qualification:** Navigation Engineer

**Full-time – 5 years 6 months**

**Extramural – 6 years**

**Professional sphere:**

- marine vessels and inland navigation vessels – positions of deck officers, chief mates, captains
- state, commercial, crewing, insurance companies and firms engaged in merchant shipping and inland navigation

### Specialization

#### DESIGN AND CONSTRUCTION OF SHIPS, VESSELS AND OCEAN ENGINEERING FACILITIES

**Qualification:** Engineer

**Full-time – 5 years**

**Extramural – 5 years 6 months**

**Professional activities:**

- study, design and construction of ships, vessels, ocean engineering facilities

### Specialization

#### OPERATION OF SHIP POWER PLANTS

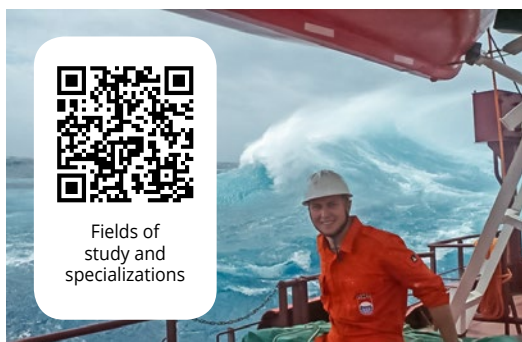

**Qualification:** Mechanical Engineer

**Full-time – 5 years 6 months**

**Extramural – 6 years**

**Professional activities:**

- inland and mixed (river-sea) navigation vessels
- positions of group and line mechanics at the services of shipping companies, ports and administration of inland waterway basins
- engineering positions at machine-building plants and ship repair yards that manufacture and repair ship machinery and mechanisms
- foremen and mechanics at plant floors and divisions

## **CAREER PROSPECTS**

The third-year students of the Maritime Academy obtain an international certificate of able-bodied seaman, a certificate of seaman, motorman, river fleet steersman. These certificates allow them to serve as ratings on marine vessels of Russian and foreign companies.

Senior students can undertake internships in any region of the world. The salary for seaman students pursuing internships and especially the salary for graduates – deck officers is several times higher than onshore personnel's salaries.

**After completing their studies, VSUWT graduates obtain a full package of international documents allowing them to work on vessels of Russian and foreign companies, with subsequent promotion to captain inclusive.**

 VSUWT Career Guidance Page

## **ADAPTATION AT THE UNIVERSITY**

- International students can participate in a wide variety of cultural and sports events held at the university
- The annual rowing and sailing festival YalFest – Welcome to the Rowing Club of the Volga University!
- The annual Congress of Young Scientists is waiting for its guests in a cozy summer camp in the pine forest on the bank of the Volga river
- The festival of maritime and river careers
- The job fair – interesting proposals from the most prestigious employers for senior and final-year students
- Student project fair
- Sports clubs: basketball, volleyball, judo, table tennis, power lifting, etc.

The VSUWT dormitory is located in the heart of the city and only ten minutes' walk from the university.

## CAREER GUIDANCE FOR APPLICANTS ABROAD

The university representatives give admission consultations in applicants' countries of residence and hold online/offline meetings. The specialists, including the staff members of the university's Admission Office with many years of career guidance experience, help applicants make up their mind about their inclinations and interests to choose a future career.

- Registration of applicants and their parents
- Participants follow the Telegram channel to better familiarize themselves with NovSU, are informed about all the university news and events, view the university video presentations on the web portal and YouTube channel

### We provide applicants with the consistent information on:

- professions and fields of study/majors
- a seamless development and personal growth path
- guaranteed employment

At the meetings, the university provides exhaustive information on the majors pursued at the university, training conditions and admission requirements. Interested students are provided with a booklet with detailed information on majors and admission requirements and invited to take part in Doors Open Days.

## WHY INTERNATIONAL APPLICANTS CHOOSE NOVSU

- Dynamically developing university
- Fields of study/majors with unique educational programs
- Convenient geographical location with an opportunity to visit two capitals – Moscow and Saint Petersburg
- A wide range of fields of study
- Modern technical facilities
- Strong academic community
- Eventful student life
- Broad geography of international students

## ADAPTATION

NovSU has the adaptation system.

The adapter is a senior student helping yesterday's applicants seamlessly blend into the student environment. The adapter familiarizes the first-year student with the university structure, helps them solve their problems and tells them about the opportunities offered by the university.

“

**Natalya Daneykina. Head of the Recruiting and International Students Office. Assistant Professor at the Department of Foreign Languages, Translation and Cross-Cultural Communication**

Choosing a future profession, follow your heart. Don't chase prestige and the desire to get rich quickly. Choose the way that will allow you to deal with the challenges you are interested in and will make you an out-and-out professional.

## INTERNATIONAL STUDENT RECRUITMENT AND CAREER GUIDANCE

- Cooperation with recruiting agencies in the field of recruitment of foreign citizens to study at the university and with the Federal Agency for the Commonwealth of Independent States Affairs, Compatriots Living Abroad, and International Humanitarian Cooperation (Rossotrudnichestvo)
- Active participation in offline and online education fairs in some countries of Central, Southeast, Southwest Asia and Africa
- Quarterly teleconference bridges with parents of international students and prospective applicants; webinars and presentations / online doors open days
- Publication of the information on OSU in foreign mass media, communities and public pages on social media platforms
- Maintenance of contacts and promotion of the university opportunities through international students and graduates of OSU
- Translation of the official website into English, Arabic and French languages
- Preparation of a series of student video testimonials for different segments of the target audience (by country)
- Creation of the information channel on the Telegram platform for international applicants (with foreign languages support)

“

### **Gurbanaly Dathudaev, Turkmenistan**

OSU brings together the most talented, active and outstanding students. Each of them is unique in their own way. At OSU, students study, create, embody their ideas, in a word, live for real! And everyone can feel that they are a part of this fascinating life. The university gave me an invaluable experience and knowledge. I changed myself a lot during my studies and I am happy that I've graduated from this university.

There was a time when Orenburg was a distant and unknown city for me. Today this is my second home, nice and cozy. Since my first days in Orenburg I've been captured by its remarkable atmosphere, this is a city with rich culture and its own mentality. I've spent the happiest years of my life in this unbelievable city– the brightest events, the most interesting books and the most important meetings. I am mad about this city, and it will stay with me forever.

“

### **Begimay Anarbaeva, Kyrgyzstan**

OSU made positive impressions on me. From the very moment of our arrival, we received a very warm welcome. First of all, we were accommodated in the dormitory. It is new, and the room has all the living amenities, which makes me very happy.

The university itself is very large, it is very warm here, the classrooms are light and cozy. The teachers provide high-quality education. I am happy that I have come to study at OSU.

inter@pgups.ru

### Ivan Kornilaev, Kazakhstan

I entered PGUPS in 2018. At that time, many of my acquaintances and friends from Aktau were going to apply for studies in Saint Petersburg, and I decided to go with them.

At that time, I didn't know yet what university I would apply to. After walking around many universities, I decided on PGUPS. The Yusupov Palace made me fall in love with itself and gave no chances to other universities.

I am a fourth-year student now. I am writing my graduation thesis. Besides studying, I am involved in extracurricular activities, I entered the Top 100 students of the university, which didn't go unnoticed by the teachers.

### **PARENTS BRIDGE**

Parent's Account for getting the information on attendance, academic progress, academic, scientific, sports, and other achievements of a student.

International students on a tour at Peter-and-Paul Fortress

Dormitory

### **INFRASTRUCTURE**

- 15 buildings, 8 dormitories
- Geology and geodesy facility
- Physical Culture House. The sports center with a swimming pool, a gym, halls for team sports, wrestling
- The clinic
- Culture and Recreation Center including a theater studio, a video studio, a vocal studio, KVN team (a famous Russian team comedy competition), fine arts studio, various style dance studios, etc.
- Volunteering center

### **SECURITY**

PGUPS cares about student security. All university buildings, including the dormitories, are guarded by the security team 24/7 and equipped with video surveillance systems.

### **PGUPS INTERNATIONAL**

It provides up-to-date information about PGUPS's international activities: study abroad, double degree programs, short-term internships, lectures of foreign professors, and many other things.

International students on an internship

A tour around the university's oil and gas facilities

Self-instruction

## OIL AND GAS ENGINEERING

### Bachelor's programs

- Drilling of Oil and Gas Wells (full-time)
- Operation and Maintenance of Oil Production Facilities (full-time)
- Operation and Maintenance of Gas and Gas Condensate Production Facilities and Underground Storages (full-time, part-time)
- Construction and Repair of Gas and Oil Pipelines and Storage Facilities (full-time, part-time)
- Operation and Maintenance of Transport and Storage Facilities for Oil, Gas and Refined Products (full-time, part-time)

- ✓ Experimental work at the department laboratories
- ✓ Work on onshore and offshore drilling simulators

### Career prospects

- Drilling supervisor, process engineer
- Manager
- Assistant driller, driller, well service operator, oil and gas production operator, operator of booster and cluster pump stations, water and oil pretreatment plants
- Production submanager at oil and gas companies
- Positions at design, engineering and research organizations

**Most international students are sought after by oil and gas companies all over the world.**

## ARRIVAL

Visitors are taken from the airport to the city by

 **Aeroexpress trains** 300 – 400 RUB

 **Taxi** – 900 RUB

Metro is the fastest and the most comfortable transport in the city. The fare is 60 RUB per trip.

It is easy to get to the university, so students arriving in Moscow are met at the university at the address: **65, Leninsky Prospekt, bld. 1, Moscow**. The Akademicheskaya metro station.

Upon arrival, foreign citizens receive comprehensive visa support, but they must get health insurance themselves.

All foreign students are accommodated in the university campus – the comfortable dormitories. Each room accommodates 2-3 persons. The accommodation fee is around 20,000 RUB per year.

**The Week of National Cultures** is an annual event aiming to improve the relationship between the university's ethnic groups. The program includes a photo show of the unique sights of various nations, a quest game, the Guess a Movie contest, an exhibition of national costumes, national cuisines, and a gala concert.

## CAMPUS

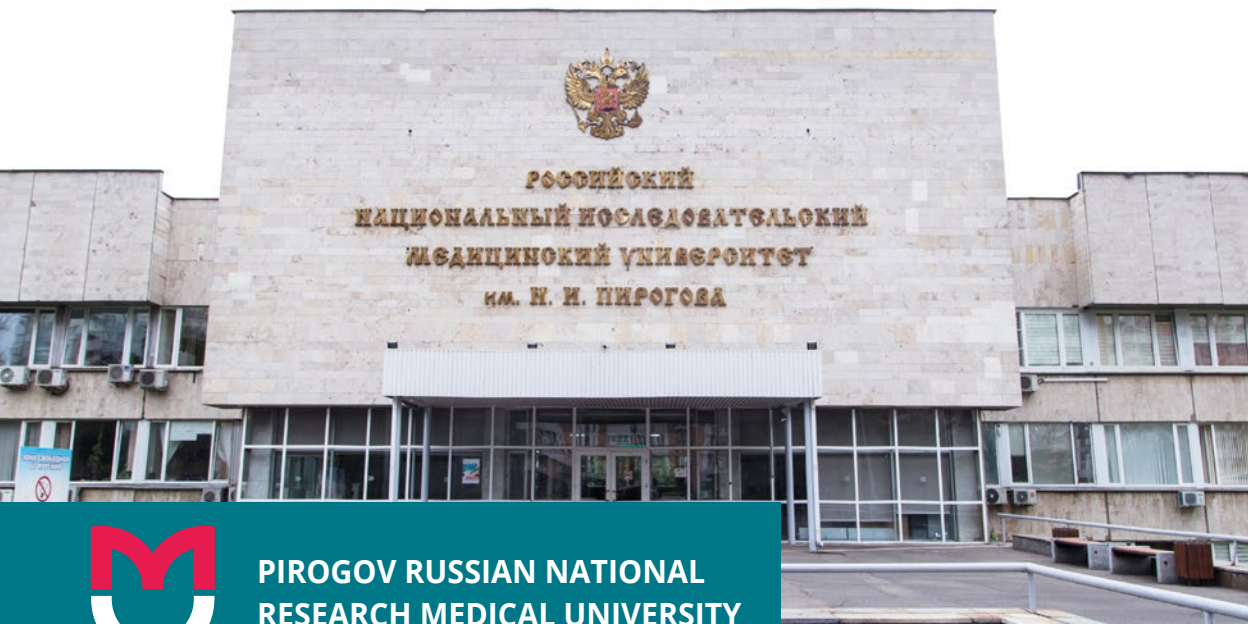

- 5 dormitory buildings, over 4,000 places
- A gym, a skiing center, a football field with workout areas, basketball and volleyball courts
- Dance, instrumental, drama studios, a chess club, a movie club, an art studio and a recording studio

### INTERNATIONAL FRIENDSHIP CLUB

The social youth organization familiarizes students with the culture and creativity of various peoples in Russia and foreign countries. The Club works with 22 fellow countrymen associations established at the university. At the beginning of an academic year, they find "their" guys on the list of enrollees and help first-year students adapt to the university and Russia.

## APPLICANT GUIDE

### Application dates for the academic year 2023-2024

Degree level	Admission start date	Admission end date	Exams	Academic year start date
Bachelor's, Specialist's degree  Russian-taught programs	June 20	July 10	July 11-25	September 1
Bachelor's, Specialist's degree  English-taught programs	June 20	July 15	not earlier than July 11	November 1
Master's degree	June 20	July 20	July 21-25	September 1
Residency	July 4	August 6	August 10-15	September 1
PhD degree	June 20	August 26	August 30 - September 15	October 1

### LIST OF DOCUMENTS REQUIRED FOR ADMISSION

- Application
- Passport or any other document confirming identity
- Visa (for citizens of countries that maintain a visa regime of entry and stay in the territory of the Russian Federation)
- Academic credential. The foreign academic credential is:
  - for admission to the first year of study – the document confirming at least secondary general education or secondary vocational education
  - for admission to Master's programs – the document confirming a higher education degree of any level) recognized in the Russian Federation
  - for admission to Residency programs – the document confirming at least higher education (Specialist's degree, Master's degree) recognized in the Russian Federation
- Certificate of foreign education recognition in the territory of the Russian Federation if such a certificate is required when submitting the document issued in a foreign state
- Referral from the Ministry of Science and Higher Education to study within the quota established by the Russian Federation Government (if any)
- Copy of medical certificate confirming the absence of medical contraindications to studying, Fluorography picture, HIV, HBs, HCV tests
- Voluntary health insurance policy which is valid in the territory of the Russian Federation
- Notarized translation of all foreign documents into Russian

## **ARRIVAL AND STAY**

Moscow is the largest transport interchange hub of Russia. You can get to the city in different ways. International students usually come by plane.

You can get from the airport to the university by bus, commuter train, metro, or taxi. The taxi fare is **1,000 – 2,000 RUB**.

## **CLIMATE**

**The climate** in Moscow is mid-continent.

- Summer is warm and rainy. The average temperature is +22-24 °C in the daytime and +12-14 °C at night
- In winter, Moscow has a rather high snow cover. The average temperature is -5 °C in the daytime and -10 °C at night

However, extreme warm and cold spells also occur. In summer, the air warms up to +30 °C. In winter, the temperature reaches -30 °C, though rarely.

## **AVERAGE EXPENSES**

- Accommodation costs **25,000 – 30,000 RUB** per month
- Travel using a student's social card costs **850 RUB** per month
- The dormitory fee is around **1,900 RUB** per month

## **ACCOMMODATION**

International students live together in one dormitory building. It is located within walking distance of the main university building and the nearest metro station.

The comfortable dormitory has everything you need, including an ensuite bathroom, a kitchen, and self-study rooms.

## **ADAPTATION**

**Tutor movement** helps first-year students adapt.

- **Group tutors** always keep in touch with students and help them solve any problems that arise
- **Academic tutors** help master academic disciplines

**Council of communities** is the largest international student association at Pirogov RNRMU

- 20 national associations such as compatriot associations, clubs and communities
- The main aim is to popularize various countries' cultures and strengthen international friendship

## SAINT PETERSBURG STATE UNIVERSITY OF ARCHITECTURE AND CIVIL ENGINEERING

Founded in 1832

47

bachelor's programs

13

specialist's programs

41

master's programs

16

PhD programs

6

faculties

40

departments

6

research and engineering centers

12,000

students

800

international students from 70 countries

SPbGASU is the only university in the North-West Federal District that trains specialists in civil engineering, architecture, the housing and utilities sector, and the automobile and road industry.

### Tuition fees per year

full-time studies 138,000 – 360,000 RUB  
 part-time studies 80,000 – 90,000 RUB  
 extramural studies 70,000 – 90,000 RUB

## THE UNIVERSITY COMPRISES

- Institute of Part-Time Studies
- Institute of Continuing Education and Professional Retraining

The language of instruction is Russian 

### POPULAR FIELDS OF STUDY

#### Bachelor's programs

- Architecture
- Reconstruction and Restoration of Architectural Heritage
- Architectural Space Design
- Applied Mathematics and Informatics
- Information Systems and Technologies
- Urban Planning
- Civil Engineering (majors: Automobile Roads; Industrial and Civil Engineering; Engineering Life-Support Systems in Construction)

#### Specialist's programs

- Construction of Unique Buildings and Structures (specializations: Construction of High-Rise and Long-Span Buildings and Structures; Construction of Underground Structures; Construction of Bridges and Tunnels)
- Land Transport Technology (specialization: Hoisting, Transportation, Construction and Road Machines and Equipment)
- Economics (major: Construction Economics)
- Management (majors: Corporate Management in Investment and Construction; Construction Logistics)
- Law

All international students enrolled in state-funded places get academic scholarships

### PREPARATORY DEPARTMENT

It enrolls foreign citizens who do not speak Russian or do not speak it well enough to study at the university.

**Duration** October – July

After completing the preparatory course, international attendees take exams in the following subjects:

- Russian language, Mathematics, Informatics, Physics **for engineering majors**
- Russian language, Mathematics **for economics majors**
- Russian language, Mathematics, Drawing **for architecture majors**

### Admission **STATE-FUNDED PLACES**

Applicants are admitted on a competitive basis:

- **to Bachelor's and Specialist's programs** – based on the results of the Unified State Exams and (or) the results of SPbGASU's internal exams:
  - for fields of study such as Architecture; Reconstruction and Restoration of Architectural Heritage; Architectural Space Design; Urban Planning ; Restoration
  - in general subjects for particular categories of students
- **to Master's programs** – based on the results of entrance exams held by SPbGASU in a special subject

The winners and prize-winners of the final stage of the All-Russian School Olympiad, members of Russian select teams who took part in the international Olympiads on general subjects are granted **the right to be admitted without entrance exams.**

### STATE-FUNDED PLACES

Bachelor's and Specialist's programs

Master's programs

PhD programs

### ADMISSION OFFICE

+7 812 316-20-26

+7 812 316-11-23

prc@spbgasu.ru

### Admission **FEE-PAYING PLACES**

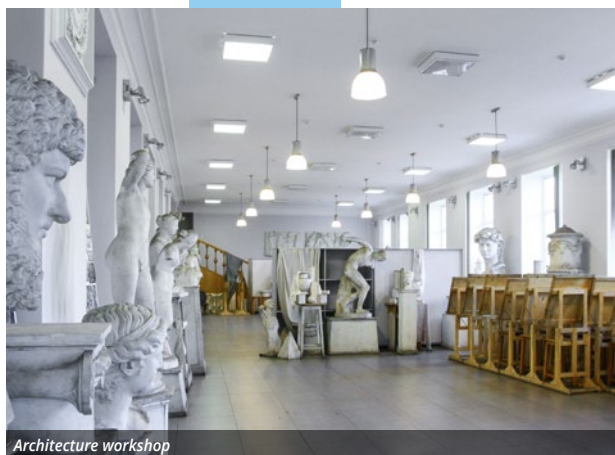

#### Bachelor's and Specialist's programs

- SPbGASU determines a separate list of entrance exams, independently allocates the number of places for admission based on the results of entrance exams and holds a separate competition for these places

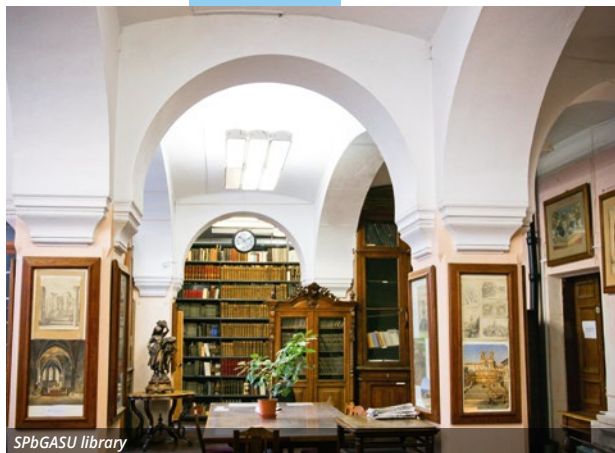

#### Master's programs

- The university holds an entrance exam – an interview in a corresponding field of study

**International applicants take entrance exams on equal terms with other applicants on August 5-20.**

Architecture workshop

SPbGASU library

Student's project

## **STAY AND ADAPTATION**

If necessary, newly enrolled international students are met, supported and assisted in obtaining a health insurance policy and accommodation in the dormitories.

**International Student Council (ISC) is actively engaged in adaptation and socialization.**

Senior students help and support newly enrolled students in their studies, communication, and everyday life, make student life more interesting and eventful.

## **ISC PROJECTS AND ACTIVITIES**

- Russian speaking club
- Public activity (waste paper collection)
- Sightseeing tours around the Leningrad Region, out-of-town trips
- Workshops
- Sports events
- Photo sessions
- Creative evenings (song evenings, poetry evenings)
- Movie nights
- Celebration of national and international festivals (Shrovetide, Halloween)
- Visits to concerts and festivals, participation in competitions, championships and forums
- Computer software training and master classes (Revit, Photoshop)

## **DORMITORY**

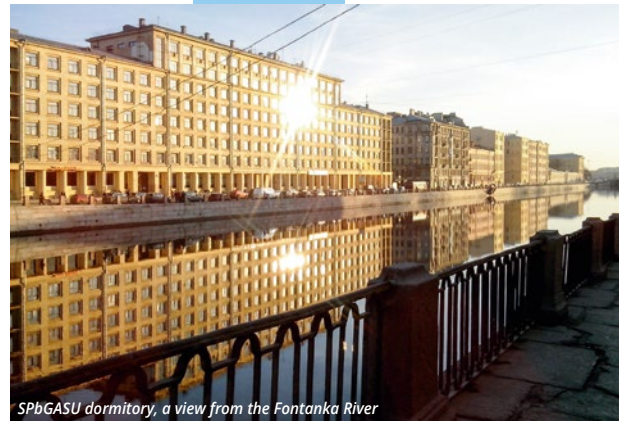

All foreign citizens enrolled in full-time programs and at the preparatory department are accommodated in the dormitory with comfortable living conditions. The dormitory is located in the historic center of Saint Petersburg. It is 10-15 minutes' walk from the university.

The dormitory district has a well-developed **infrastructure**:

- shopping centers
- sports facilities
- restaurants and cafés of different cuisines of the world

Some **Saint Petersburg landmarks** are within walking distance, too:

- The Trinity, St. Isaac's and St. Nicholas Cathedrals
- The Mariinsky Theatre, and many others

### **EMBEDDED DATA PROCESSING AND CONTROL SYSTEMS**

Master's program in English 

Two-year research

Exchange semester

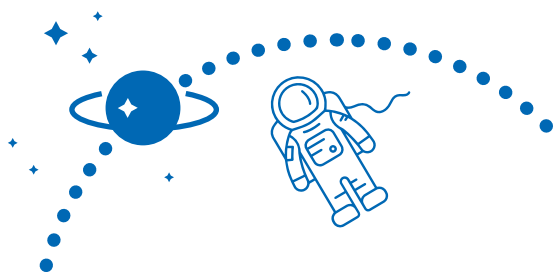

Summer internship

Embedded computer systems are a mass high-technology market of information and computer technologies, the most competitive area of cutting-edge R&D.

You can find embedded systems everywhere: from smartphones to cars, from aircraft and spacecraft to medical equipment, from smart house to intelligent transportation systems.

**Students usually choose project themes in the following research areas:**

- Communications protocols of airborne equipment
- System modeling and checking
- Embedded systems design
- Embedded systems software development
- Airborne equipment analysis and upgrade
- Video processing
- Heterogeneous computing

“

### **Azizbek Matniyazov, Turkmenistan**

Studying at Saint Petersburg State University of Aerospace Instrumentation made only good impressions on me. The standards of teaching all the subjects, both major and basic, were very high. Our teachers are not only highly qualified specialists in their fields but also interesting people ready to share their life experience. Also, I'd like to mention the attitude of the international department staff members who treated us like their children, solving all our problems and loving us without condition.

The university held plenty of extracurricular activities such as sports events, intellectual competitions, talent shows, Mister and Missis SUAI, visits to museums and theaters, and many others.

I've never regretted having traveled over 5,000 km and joining SUAI. I feel infinite gratitude and have warm memories!

“

### **Ilya Artyushkin, Kazakhstan**

When I had to choose a university, my only goal was to pursue aviation. Coincidentally, I had the opportunity to choose a great university – SUAI through Rossotrudnichestvo.

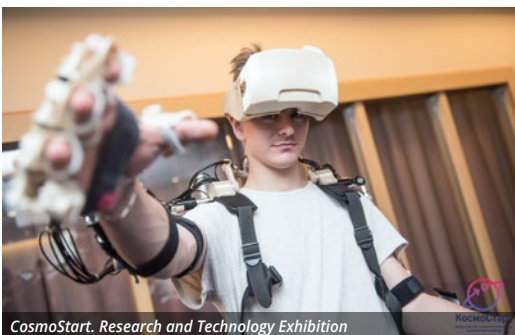

I came to Saint Petersburg in August 2017. My first acquaintance with the university made the warmest and the most positive impressions on me. The nice girls at the International Office gave me a warm welcome, told me about everything, showed me everything and helped me.

Concerning the learning process, there were good and not very good moments. Learning shouldn't be easy, but the aspiration to achieve my goal helped me move forward.

I want to say that SUAI is an excellent place for active students who want to show themselves. Such people are valued and loved. The university has excellent student councils, a trade union committee, and research is conducted. That's why you always have a chance to participate somewhere, show yourself and get an increased scholarship.

I'll specially focus on the dormitories, especially № 3, at 8, Varshavskaya Street. To my mind, it is the best one, with great staff members. It was a pleasure to live there for 4.5 years.

During my university years, I experienced a lot of positive emotions and achieved all my goals.

## приоритет2030^

лидерами становятся

### 5 strategic projects:

- Development and Transfer of High Technologies in the Maritime Industry
- Breakthrough Research and Development in Liquid Breathing
- Digital Twin of the Seaside Territory Geosystem
- "Living Laboratory" for New Industries in Sevastopol
- Archeonet

As part of the program, students have the opportunity to take online advanced training courses and obtain an advanced training certificate **after completing the degree program.**

SevSU not only offers a profession but also prepares students for their future life, taking into account new realities. For example, the Personal Development Technology discipline helps students build their career paths starting from the first year of study.

### International Network Anti-Money Laundering and Combating the Financing of Terrorism (AML/CFT) Institute

SevSU is a member of the research and education consortium uniting universities and research and education centers of Russia, member states of the CIS and the Eurasian Group on Combating Money Laundering and Financing of Terrorism.

### DOCUMENTS REQUIRED FOR ADMISSION

- Proof of identity and citizenship
- The academic credential issued in a foreign state with a foreign education recognition certificate, except where and to the extent that foreign education recognition is not required according to the Russian legislation or international agreement
- Photo – for persons applying for studies following the results of the university's internal entrance exams

- ✓ Applicants may submit either original documents or copies of documents without submitting their originals.
- ✓ The documents executed in a foreign language must be translated into Russian, unless otherwise provided by the international agreement.
- ✓ The documents obtained in a foreign state must be legalized, unless otherwise provided by the international agreement.

Students majoring in Mechatronics and Robotics present their invention

## STUDY BY THE SEA!

### **MARITIME START**

#### **Annual Olympiad for school students**

- International students have the opportunity to spend a few days in Sevastopol to get acquainted with the city
- If international participants successfully pass the tests, they get bonus points for admission

#### **Two stages of tests:**

- 1. The qualifying stage** – an online tour where applicants visit the university website and choose the fields of study they are interested in. Their number is not limited. After that, ranked lists are published. 10% of leaders of the total number of the qualifying stage participants are invited to take part in the final stage
- 2. The final stage** is conducted offline at SevSU

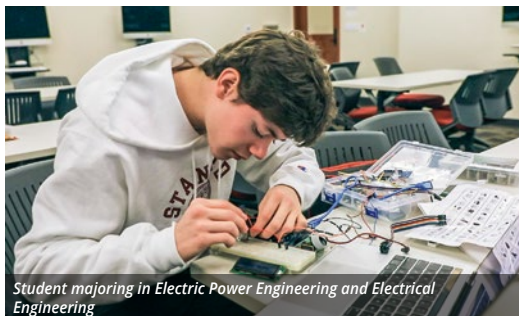

### **ARRIVAL AND ADAPTATION**

SevSU staff members meet international students in the city of Sevastopol and help them have the required documents executed and get health insurance.

The university has six dormitories. Foreign citizens are sure to be accommodated in the dormitory by the seaside.

For coordination of students, the university has established the Interclub student association. SevSU students and staff members help students adapt to a new environment. Entertainment and edutainment events are regularly held for organizing leisure time.

There is an opportunity to do various sports.

## SIBMED TODAY

The large research and education center: over 8,000 students from 61 regions of Russia and 28 foreign countries (the CIS countries and other countries)

945 state-funded places for admission to Specialist's and Bachelor's programs for applicants from Russia and the CIS countries

Unique academic staff: 80% of teachers hold academic degrees and titles

### ADVANTAGES

#### SibMed leading teachers

The university successfully develops famous scientific schools. Among them is the Therapists school founded by Professor M. Kurlov who developed the tuberculosis prevention and treatment system. The founder of the Siberian Pharmacology School was the Academician of the Academy of Medical Sciences of the USSR N. Vershinin who created the medicinal products that were superior to the best world-class products. Among the alumni are a lot of famous doctors and scientists who contributed to the development of medical science: Academician D. Yablokov, Academician A. Savinykh, Professor A. Kulyabko, and others.

#### SibMed Modern Simulation Center

The university has one of the two Russia's centers accredited by the Society for Simulation in Europe (SESAM). The center allows students to acquire practical skills and master the methods for providing medical care on state-of-the-art equipment.

Students have the opportunity to pursue science and research. The university offers grants in the amount of up to **500,000 RUB** to students for the implementation of their own projects. In 2019-2021, more than 70 SibMed students got such payments.

#### Research

SibMed comprises seven world-class laboratories implementing special projects on bionic digital platforms, targeted theranostics, education, precision medicine.

#### SibMed's multidisciplinary clinics

SibMed students have a unique opportunity to study and undertake internships at ten multidisciplinary clinics of the university fitted with state-of-the-art expert-class equipment. Every year over 20,000 patients from Russia and the CIS countries receive medical care here.

**SibMed has ten specialized clinics:** the Obstetrics and Gynecology Clinic, the Urology Clinic, the Surgery Clinic, the Ophthalmology Clinic, the Endocrinology Clinic, the Neurology Clinic, the Children's Clinic, the General Medicine Clinic, the Infectious Disease Clinic, and the Rheumatology Clinic.

International students can undergo practical training both at the SibMed clinics and other medical organizations, including the organizations in the CIS countries and other foreign countries.

### **INTERNATIONAL COOPERATION**

**Among the partners** are leading universities of China 🇨🇳, India 🇮🇳, Brazil 🇧🇷, CIS countries, and others.

In cooperation with Tashkent Medical Academy in Uzbekistan 🇺🇿, the university is preparing to launch the **Master's program in Management**.

### **STUDENT COMMUNITY**

As a SibMed student, everybody can develop their talents and find themselves not only in studies but also in music, sports, volunteering, and many other areas. The university has over 20 creative associations, a scientific community, teams of the Club of the Funny and Inventive, a theater, and other clubs.

### **ACCOMMODATION**

- 6 dormitories
- The university administration is understanding and careful about providing comfortable living conditions for students. Students are accommodated in the comfortable dormitories with modern infrastructure
- The medical university campus is located in the historic center of the city which is replete with the cultural facilities, public catering facilities, leisure destinations

## **SIBMED IS THE RIGHT CHOICE!**

**SimMed is the only Russian medical university that has a license from the Ministry of Industry and Trade of the Russian Federation to manufacture medicinal products**

### HOW TO INCREASE YOUR CHANCES TO GET A STATE-FUNDED PLACE?

- **Take part in the SibMed Homo novus Olympiad.** The Olympiad subjects are chemistry, biology, mathematics, physics. The Olympiad winners and prize-winners get ten bonus points added to the total score in their entrance exams. Every year the Olympiad brings together over 1,000 participants. The Olympiad is held annually from November till April
- **Connect to the free educational platform "MedClass."** The project is intended for 8-11th graders from Russia, the CIS countries, and other foreign countries. At the platform, prospective students can study independently or together with their classmates in five academic tracks such as Doctor, IT, Medicines, Leadership, Laboratories. The MedClass allows students to prepare for the Homo novus Olympiad and the SibMed All-Russian conference contest of school students' research papers and projects, for which bonus points are awarded
- **Be actively engaged in volunteering.** The points are taken into account when you submit the supporting document

Homo novus Olympiad

Go to MedClass

Individual achievements

### SCHOLARSHIPS FOR INTERNATIONAL STUDENTS

In 2022, the minimum basic scholarship is 2,477 RUB for first-year students and 2,800 RUB for second-year students.

The university provides increased scholarships for academic and research excellence and outstanding achievements in cultural and public life or sports. The increased scholarship is 12,000 RUB and more.

### APPLICATION DATES

#### Application for state-funded places

June 15-July 20 based on the results of entrance exams

#### Application for fee-paying places

June 15-August 17 based on the results of entrance exams

Admission requirements for residency programs

Admission requirements for PhD programs
