THE REPUBLIC OF TATARSTAN

РӘХИМ ИТЕГЕЗ
WELCOME

Great scientific and technological potential, well-developed industry and massive sources of raw materials are the main competitive advantages of Tatarstan. The republic reconstructs a full-fledged system for developing research and engineering competencies throughout all continuing education stages

THE REPUBLIC OF TATARSTAN

Tatarstan is a region with a special mission. It preserves centuries-long experience of the multicultural and multi-confessional world. Tatarstan's strength lies in preserving the traditions and culture while making continuous progress.

According to the Ministry of Education and Science of the Republic of Tatarstan, more than 18,000 international students from 14 countries of the former USSR and 107 other foreign countries are studying at 39 universities of the republic today.

Applicants from various countries are attracted to Tatarstan by:

- diversity of education levels
- interesting educational programs
- inclusion of Kazan universities in global rankings
- professional development prospects
- well-equipped laboratory facilities
- highly qualified academic staff
- exciting student life
- non-governmental organizations and international student associations, compatriot associations
- comfortable urban environment for the intellectual life and leisure
- multicultural face of Kazan
- linguistic and religious affinity, especially for applicants from the countries of Central Asia

KAZAN

1,259,000

population

115+

nationalities

The capital of the Republic of Tatarstan is one of Russia's most beautiful and significant locations. It is a city with glorious historical and cultural heritage. Over 115 nationalities live here in friendship and tolerance. Kazan's religious objects are mosques, Christian Orthodox temples, other Christian churches, a synagogue as well as Bahai and Krishna prayer houses.

Kazan is a multinational city with a 1000-year-old history, well-developed infrastructure, rich and exciting campus life. It is one of the most worldwide famous, convenient and people-friendly cities of our country.

It is located on the left bank of the Volga River, 800 km from Moscow. It is the 8th most populated city in Russia.

TRADITIONAL CUISINE

- Echpochmak – pies with ground meat and potato filling
- Kazylyk – cured horsemeat sausage
- Gubadiya – a sweet or savory layered pie
- Cheburek – a flat deep-fried pie with meat and onion filling
- Shcherbet – sweet honey and fruit beverage
- Chak-chak – sweet pastry made from dough baked in honey

KAZAN KREMLIN

The Kazan Kremlin is the only remaining Tatar fortress in Russia which has a unique collection of mosques, churches and government buildings that reflect the diversity and cultural heritage of the region. The ancient fortress boasts such landmarks as the Annunciation Cathedral, the "falling" Söyembikä Tower, the Spasskaya Tower, and other ancient towers and cathedrals, the most famous mosque in Russia and Europe – Kul Sharif, historic and memorial buildings, museums and galleries, observation platforms.

There are zilants – dragon statues, symbols of the city, erected at the white stone walls of the Kazan fortress. Legend has it that this mythical creatures that was a prototype for the statues used to live on a hill near the Kazanka River. Nowadays Assumption Zilant Monastery stands there. During its construction, an ancient dungeon was found.

Since 2000, the Kazan Kremlin has been listed among UNESCO's World Heritage Sites. You can enter the territory through the Spasskaya and Taynitskaya Towers. You do not have to pay for a walk around the historic center, however, it is more interesting to book a tour where the guide will show you around the main attractions and tell you a lot of interesting facts.

The kremlin holds various events, for example, the Night of Museums with master classes, exhibitions, concerts, performances of creative groups, theatrical performances, coffee ceremonies. You can find out about upcoming events on the kremlin's official website.

KAZAN SPACES FOR CREATIVE PEOPLE

The national library of the RT comprises a repository, library departments, reading rooms, a lecture hall, an exhibition space, the MOÑ theater venue, a sound recording studio, a coffee shop, a bookstore, and a co-working space.

The MOÑ theater venue develops the community of artists and spectators through the cross-genre performances and educational program and works with national and urban identity. In 2022, it hosted some landmark performances and launched the City People Theater laboratory in cooperation with the Russian University of Theatre Arts.

URAM Indoor Extreme Park integrates skating areas, a sports equipment rental office, dance classrooms, a lecture hall, a photographic studio, a skateshop, a clothes store, and a café. The space has been a venue for the Youth Day for several years.

B. Rameev IT park has 3,000 office workplaces, a co-working space, a gym, a children's technology park, a startup hub, CyberPunk Arena, self-service stores, restaurants, a coffee shop, and a post office.

Under the roof of its building, the **Smena Contemporary Culture Center** comprises a gallery, a lecture hall, a publishing house, all types of stores selling book records, Slava Zaitsev's Art Gallery, a coffee shop, and a gastrobar.

The Smena Center makes contemporary art more popular and makes scientific achievements more understandable. It organizes dozens of events such as book festivals, exhibitions, lectures, independent film exhibitions.

Lobachevsky and Popov Technology Parks in Innopolis have offices, meeting and conference rooms, lecture halls, show rooms, cafés, coffee shops and canteens, postal, banking and courier services, and notary services.

In its 19th century interiors, **Demidov Mansion** hosts the theatrical performances allowing spectators to reflect on the modern problems. In 2022, it held three opening nights – about the end of childhood, complicated growing up and escaping the bonds of the state.

Higher education

for international students
in the Republic of Tatarstan

Every year a lot of international students come to study at Russian universities. Russian education is especially popular among students from the CIS countries – 85% of students come from Kazakhstan, Uzbekistan, Tajikistan, Turkmenistan, Kyrgyzstan. They quite often choose the universities in the Republic of Tatarstan as a place to get higher education.

High-quality training, living conditions, well-developed campus infrastructure, active international cooperation, exchange programs, opportunities for successful personal development in science, sports and Olympiad movement – all of this attracts talented young people to the universities in Tatarstan.

RUSSIA AND THE CIS COUNTRIES ARE PARTNERS AND FRIENDS

For many years, Russia and the countries of Central Asia have been united by the ties of friendship and traditions of mutual support, trust and respect. In particular, the Republic of Tatarstan supports the expansion of relations and exchanges with the partners from this region in art and culture, through public associations, religious, economic or other associations, contributes to the development of cooperation among youth organizations and student exchange. Tatarstan ranks sixth in Russia and first in the Volga Federal District (VFD) in the ranking of Russian regions by the number of university students.

Our countries successfully implement large-scale joint projects. For example, Uzbekistan is building the first nuclear power plant in cooperation with the Russian specialists. Sangtudin Hydropower Plant-1 (it provides over 12% of electric power output in the republic) has been working in Tajikistan for over ten years. Last year Russia's largest automobile corporation KAMAZ supplied around 2,000 pieces of automotive equipment to Turkmenistan. Kyrgyzstan has launched the Talas gold ore plant. Mineral fertilizers are jointly produced in the Zhambyl region of Kazakhstan.

Cultural and humanitarian relations between our countries are also well-developed. Children have the opportunity to go to Russian schools. Central Asia has the Internet resource "Russian School Support System" supported by Rossotrudnichestvo. With its assistance, students and teachers have the opportunity to gain free access to thousands of e-books of diverse content and various purpose. **Significantly, studying at Russian-language schools provides applicants from the countries of Central Asia with the opportunity to apply to the universities in Tatarstan and throughout Russia on equal terms with Russian citizens.**

The universities in Tatarstan have long-standing partnership agreements with some major employers from the countries of Central Asia. For example, KNRTU has concluded the agreements for targeted personnel training with major branch enterprises in the countries of Central Asia such as Turkmenhimiya and Turkmengaz.

In the absence of language barriers, Russian universities take an active part in educational platforms and exhibitions held in the CIS countries and organize various Olympiads.

Major Russian universities open their representative offices and branches in the macroregion. For example, at the end of October 2022 the branch of Kazan Federal University was established in the city of Dzhizak in Uzbekistan. It will train specialists in mechanical engineering, geology, software engineering, economics, information systems and technologies, management, linguistics, medical biochemistry, general medicine, pharmacy, and dentistry. Science lovers will be able to participate in innovative studies. There are 300 first-year students and 59 second-year students already.

According to the Ministry of Education and Science of the Republic of Tatarstan, today more than 18,000 international students from 14 former USSR countries and 107 other foreign countries are studying at 39 universities in the region.

High quality of educational services provided by our universities is annually confirmed by the results of university performance monitoring carried out by the Ministry of Science and Higher Education of Russia. One of our universities' performance indicators is demand for graduates in the job market. The employment analysis shows that more than 60% graduates work in their degree field.

AT WHAT UNIVERSITY CAN YOU GET A SUITABLE PROFESSION?

The most popular fields of study among students from the CIS countries are:

- General Medicine
- Dentistry
- Economics
- Management
- Civil Engineering
- Electric Power Engineering and Electrical Engineering
- Information Security
- Energy Security

You can become an excellent specialist in these fields if you choose to study at one of the universities in Tatarstan.

 **KAZAKHSTAN**

unsplash.com

In **Kazakhstan**, the shortage of qualified engineers is being felt in the construction and machine-building industries today. No less pressing is the issue of filling the vacancies in metallurgy, power engineering and oil and gas industries.

Depending on your major, you can become a specialist in these fields when you graduate from one of the universities in Tatarstan:

- Kazan (Volga Region) Federal University, p. 52
- Petroleum High School – Almetьевsk State Oil Institute, p. 56
- Kazan State University of Architecture and Engineering, p. 64
- Kazan State Power Engineering University, p. 76
- Kazan National Research Technical University named after A. N. Tupolev–KAI, p. 80

The leading economic sector in **Kyrgyzstan** is agriculture. It mainly includes crop farming (growing grain, cotton, tobacco, oil-bearing crops, horticultural crops and gourds), beef and dairy cattle breeding, sheep breeding. It creates around 40% of the gross added value and employs more than half of able-bodied population. The share of farming lands is over 50% of the entire territory of the republic.

The study programs related to the activities in this important economic sector of Kyrgyzstan are offered by:

- Kazan (Volga Region) Federal University, p. 52
- Petroleum High School – Almeteyevsk State Oil Institute, p. 56
- Kazan State Academy of Veterinary Medicine named after N. E. Bauman, p. 60
- Kazan State Power Engineering University, p. 76
- Kazan National Research Technical University named after A. N. Tupolev-KAI, p. 80

unsplash.com

 **KYRGYZSTAN**

Tajikistan, like any other CIS countries, has long been suffering a shortage of qualified personnel for the hi-tech industry, in particular, for creating IT parks. Besides, the country has huge hydropower potential, non-ferrous metal stocks, rare opportunities for agriculture, great prospects for the development of tourism.

To support the country's economy, you should get a solid background. Choose a suitable field of study and apply to one of the following universities:

- Kazan (Volga Region) Federal University, p. 52
- Kazan State Academy of Veterinary Medicine named after N. E. Bauman, p. 60
- Kazan State University of Architecture and Engineering, p. 64
- Kazan State Institute of Culture, p. 68
- Kazan State Power Engineering University, p. 76
- Kazan National Research Technical University named after A. N. Tupolev-KAI, p. 80
- Naberezhnye Chelny State Pedagogical University, p. 84
- University of Management "TISBI", p. 90

TURKMENISTAN

Today the most popular fields of study among the citizens of **Turkmenistan** are linguistics, economics, international relations, oil and gas engineering, informatics and computer engineering, architecture, psychology and dentistry. There is an interest in training engineering personnel as well as IT specialists – high demand for digitalization and cybersecurity personnel.

To get education in these fields of studies relevant to Turkmenistan, choose your university:

- Kazan (Volga Region) Federal University, p. 52
- Petroleum High School – Almetyevsk State Oil Institute, p. 56
- Kazan State University of Architecture and Engineering, p. 64
- Kazan State Medical University, p. 72
- Kazan State Power Engineering University, p. 76
- Kazan National Research Technical University named after A. N. Tupolev-KAI, p. 80
- Naberezhnye Chelny State Pedagogical University, p. 84
- University of Management "TISBI", p. 90

Over the last twelve years, the number of students from **Uzbekistan** at Russian universities has increased more than threefold. Medicine and engineering and technology majors, especially metallurgy, mechanical engineering, geology and mineral exploration, informatics and computer engineering are most popular among those applying for full-time studies. At the same time, extramural students prefer economics and management.

The leader in full-time training of Uzbek specialists is Kazan (Volga Region) Federal University. Depending on the chosen profession, you can choose any university in the Republic of Tatarstan:

- Kazan (Volga Region) Federal University, p. 52
- Petroleum High School – Almeteyevsk State Oil Institute, p. 56
- Kazan State University of Architecture and Engineering, p. 64
- Kazan State Medical University, p. 72
- Kazan State Power Engineering University, p. 76
- Kazan National Research Technical University named after A. N. Tupolev–KAI, p. 80
- University of Management "TISBI", p. 90

Student testimonials

“

Medina Izenkova, Kazakhstan. The student at Kazan Federal University

I entered Kazan Federal University within the Rossotrudnichestvo quota. I chose the Institute of Fundamental Medicine and Biology. The classrooms and lecture hall, where we had our first classes, and our teachers greatly impressed me. I really liked my fellow students – all of them are motivated, well-bred and hardworking.

Everything in Kazan and the university itself is based on the desire to make progress and get better. The large library, well-developed infrastructure, museums, computers and equipment contribute to high-quality education and students' development into highly qualified specialists in their field.

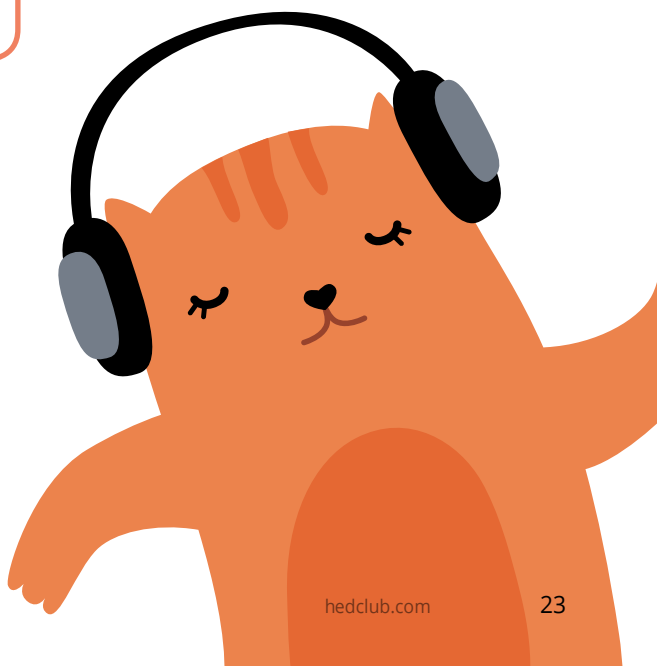

“

Asror Orifjanov, Uzbekistan. The third-year student at Kazan Federal University

I've chosen KFU because it provides plenty of opportunities to study, work and make new acquaintances. It offers high-quality training and gives invaluable knowledge.

Besides having classes, you can lead an eventful student life here. The university administrators, as well as other students, do their best to help international students adapt. If you come here, you will spend the most unforgettable years of your life full of joy, fun and studies. I am proud to be a student at this university!

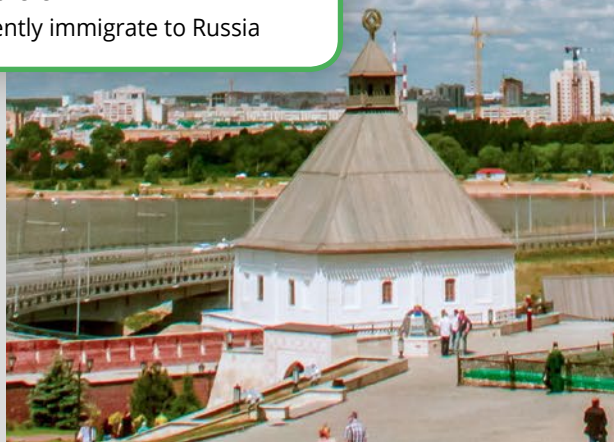

ADVANTAGES OF RUSSIAN EDUCATION FOR STUDENTS FROM THE CIS COUNTRIES

- High-quality training
- Good testimonials about Russian universities from students who used to study there
- The opportunity to subsequently immigrate to Russia

The magazine contains more detailed information on the study programs, admission and studying at the universities in Tatarstan.

To get a state-funded place at a Russian university, you must get a quota place from the Russian Government. The Ministry of Foreign Affairs of Russia, the Ministry of Science and Higher Education of Russia, and Rossotrudnichestvo are responsible for informing, organizing and selecting international applicants having compatriot status.

To participate in selection tests for the quota, you should contact the Rossotrudnichestvo representative office in your country of permanent residence. If there is no such office, you can always contact the Russian embassy. On the websites of these organizations you will find all the information on deadlines, selection criteria as well as the list of documents required to participate in selection tests. The magazine will give you more information on the activities of the Rossotrudnichestvo representative offices in the countries of Central Asia.

Find out about all the ways to get admitted to Russian universities at hedclub.com

Russian Education

for Students from Kazakhstan

Russia and Kazakhstan are bound not only by the common past but also by the promising common future. The prospect for relationships between our countries has been built for over the last 30 years. Today we can safely say that Kazakhstan remains the friendliest country for Russia.

Olga Filonova, Head of the Russian House in Astana, talks about what makes higher education in Russia attractive to students from Kazakhstan, about admission opportunities and assistance in choosing a university.

POPULARITY OF RUSSIAN EDUCATION

Astana and Moscow have built strong ties at all levels. The presidents of the states often hold meetings. There are joint commissions of ministries and government agencies. The business and educational projects are developed. Russians and Kazakhstanis maintain multi-level horizontal relationships.

Students studying in Russia get high-quality education. As a rule, they go back home and contribute significantly to the development of their country. Now the borders are open, and young men or girls can go to any country in the world and acquire a profession there.

The competition among higher education institutions is high. But for all that, many Kazakhstanis strive to enter Russian universities. On the one hand, this is facilitated by geographical proximity of the countries, the language environment which continues to be Russian, and on the other hand, the level of Russian education which is on the rise. Kazakhstani students choose sought-after professions and fields of study such as IT, robotics, radio electronics, mining, engineering. However, we can note that such professions as lawyers and financiers are losing popularity.

The Russian Culture Day as part of the Alem Saz International Festival

EDUCATION QUOTAS

Today the number of Kazakhstanis is 25% of the total number of international students in Russia. The number of quota places allocated by the Russian Federation Government for applicants from Kazakhstan is trending upward. There were 500 places last year, and all of them were used. Seven hundred places have already been allocated for the academic year 2023/2024, and we can see prospective students' interest in Russian education. This is illustrated by the last year's competition which was three applicants per place.

According to the Embassy of the Republic Kazakhstan in the Russian Federation, there are 61,000 Kazakhstani students pursuing different educational programs in Russia at the moment. The educational grants to study are allocated as part of the intergovernmental agreements. These also include the quota places for students from Kazakhstan whose tuition costs are fully covered by the Russian budget. Most Kazakhstanis try to apply to Russian universities within the quota through Rossotrudnichestvo but there are people applying independently.

I will reveal a secret to applicants - universities value not only your grades in your secondary school certificates but also your proactive attitude, your participation in public life, Olympiads, sports and your achievements. All of this increases your admission chances.

RUSSIAN HOUSE IN ASTANA

We realize that the most important thing for applicants is not to drown in the flow of information. And we help prospective students keep afloat. The Russian House holds education fairs. We try to tell applicants about the universities on the Internet. We have prepared a website with a step-by-step guide to registration and document submission at different admission stages.

Olga Filonova

abitura2023.tilda.ws

The most important thing is that graduates of Russian universities, as a rule, do not have to apply for unemployment benefits. If people want to build a career and benefit themselves and society, they will do it. Surely, the diploma in their pocket and the contacts established during their studies are sure to help them. But, as I noted before, now students choose sought-after professions with decent salaries and the fields where they are really sought-after.

Russian Education

for Students from Kyrgyzstan

Throughout their centuries-old history, Russia and Kyrgyzstan have been maintaining reliable, friendly and strategic relationships. Education in Russia has always been in high and stable demand with Kyrgyz school leavers. High-quality and fundamental education obtained at Russian universities provides graduates with the opportunity to pursue career and research as well as find a job not only in Russia and Kyrgyzstan but also all over the world.

Albert Zulkharneev, Head of the Russian House in Bishkek, talks about Kyrgyz school students' interest in Russian higher education and training highly qualified specialists for Kyrgyzstan economy.

AFFORDABILITY OF RUSSIAN EDUCATION

In Kyrgyzstan, Russian universities have proved themselves as leaders in such disciplines as mathematics, physics, chemistry, in training competent IT programmers, medical professionals, creative professionals.

For the academic year 2022-2023, the Russian Government allocated 500 quota places for citizens of Kyrgyzstan to study at Russian universities. Given the Kyrgyz school leavers' demand for Russian education which increases from year to year, it was decided to increase the number of state-funded places up to 700 for the academic year 2023-2024.

Thus, the trends of recent years show a gradual and stable increase in the number of quota places. The competition is three applicants per place. As of October 1, 2021 over 8,000 citizens of Kyrgyzstan pursue educational programs of higher education – Bachelor's, Specialist's, Master's programs in all modes of study at Russian universities, including foreign branches of Russian universities and joint educational organizations.

According to the statistics, such fields of study such as medicine, economics, informatics and computer engineering as well as all engineering majors have been in high demand among Kyrgyz applicants over the last years.

Prospective applicants choose all available and alternative ways to get admitted to Russian universities. However, it should be noted that most school leavers apply within the Russian Federation Government quotas as this guarantees stability, security and scholarships while studying.

UNIVERSITY ADMISSION REQUIREMENTS

Candidates to study at Russian universities within the Russian Government quotas are selected in the territory of Kyrgyzstan only by efforts of the representative office. This is stipulated by the bilateral agreements and eliminates all corruption risks to the greatest possible extent.

Prospective applicants upload the required documents only online! Applicants get all the detailed information on the documents through all the social media platforms of the representative office, through handouts at the meetings, and from mass media. The consultations are given in different formats.

If we do a quick recap of document requirements, candidates must register in the education-in-russia.com system and attach to their application the scanned original documents, the list of which is posted on the official web pages of the representative office.

- 11th graders must upload their 10th grade transcript
- All candidates must upload the notarized translation of their regular passport (international passport) as well as documents confirming their individual achievements: certificates and diplomas, including those confirming their participation in volunteering, sports and cultural and educational contests, Olympiads

Candidates can choose up to six universities in three federal districts of Russia at the same time. Applying for Bachelor's and Specialist's programs, applicants must take compulsory tests in major subjects. For other degree levels, the portfolio competition is held.

According to the selection results, the lists are compiled, which are approved by the working group. The representative office does not conduct the interview, and candidates are selected according to the authorized procedure. All the procedures are extremely transparent for everyone interested.

We advise candidates to prepare all the required documents for application in the best possible way, meet all the technical requirements for filling in the application form and adhere to the document upload dates.

Albert Zulkharneev

The Rossotrudnichestvo representative office in Kyrgyzstan makes extensive focused efforts to attract Kyrgyz school leavers to Russian universities. Twice a year, in recent years, the Russian education weeks are held with the participation of the top Russian universities. Specialists from the universities meet with school and university students of educational organizations in all the regions of the country.

Every week we publish the information on the Russian universities and their Olympiads. The online career guidance marathon "Russia is with You" took place in Kyrgyzstan in October-November. The school students asked the career guidance specialist their questions and got more detailed information on different fields and professions, on how to achieve career success and how to pay much attention to the secrets of successful communication and personal presentation that will help adapt to any team.

 The Russian House in Bishkek

DEMAND FOR GRADUATES

Graduates of Russian universities work in all areas of life in Kyrgyzstan. Many modern public officials of the country, business leaders, university and school teachers, doctors, IT specialists, artists are graduates of Russian universities. Good high-quality and fundamental education allowed many of them to occupy leadership positions at government entities and various commercial organizations.

The country's economy needs top-notch specialists at the moment. We are talking about many sectors, be it mining engineering, pedagogy, medicine, or any other sought-after area of activity. In this regard, graduates of technical universities are promising specialists with expected high salaries in Kyrgyzstan.

The meeting of Russian cosmonaut Salizhan Sharipov with the young journalists from the Russian House in Dushanbe

Russian Education

for Students from Tajikistan

Russia and Tajikistan are strategic partners and allies in many areas. This is also supported by the number of allocated education quota places – it grows from year to year. If 750 quota places were allocated for the republic (around 5,000 people submitted their applications then) last year, around 1,000 places are expected in a new quota campaign for the academic year 2023/2024, as agreed by the heads of the two states – Vladimir Putin and Emomali Rahmon. Thus, one of the biggest education quotas in the world has consistently been allocated for Tajikistan.

Ivan Ivanov, Head of the Rossotrudnichestvo representative office in Tajikistan, talks about how the representative offices of Rossotrudnichestvo in Tajikistan help students prepare for admission to Russian universities and what applicants should know to successfully pass the competitive selection for quota places.

PREPARATION FOR ADMISSION

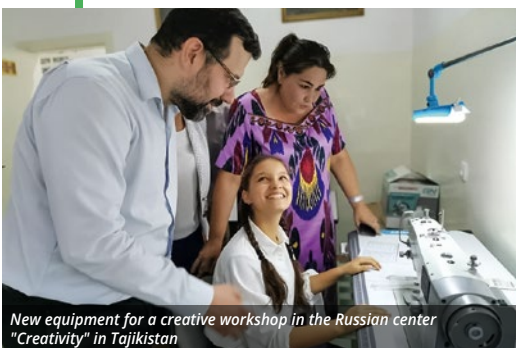

Today around 30,000 students from Tajikistan study at Russian universities at all education levels from Bachelor's degree to PhD degree. Russian higher education is rightfully sought after by local young people. So it comes as no surprise that we can observe a dynamic increase in applicants' interest every year.

The most ambitious 10-11th graders start preparing for the quota campaign of admission to Russian universities in advance, taking preparatory courses at the Russian Houses in Dushanbe and Khodzhen. The courses offer in-depth study of engineering, humanities, medicine, and economics subjects. Students are taught by the participants of the Russian Teacher Abroad project – subject teachers who work using Russian educational programs. This also gives an edge to those who apply to Russian universities directly and on equal terms with Russian citizens using the materials that they have already studied and meeting the requirements that are already familiar to them.

The remarkable thing is that the level of training is so high that around 80% of students who completed our preparatory courses get successfully admitted to Russian higher education institutions within the quotas or as part of direct recruitment.

September 1 in the Shahsiyat gymnasium in Dushanbe

New equipment for a creative workshop in the Russian center "Creativity" in Tajikistan

Big ethnographic dictation in Dushanbe

HOW ARE CANDIDATES FOR QUOTA PLACES SELECTED?

The quota campaign starts when the electronic registration system is launched. All candidates create personal accounts where they upload their personal data, scanned documents, portfolios and specify their achievements. Then candidates are assigned identification numbers. Only applicants have access to personal accounts, and third party intervention is out of question.

Last year the procedure for testing and **selecting applicants for Bachelor's and Specialist's programs** was conducted online, in the system of so-called proctoring. On the appointed day, applicants took major subject tests online, with mandatory video surveillance – Russian specialists monitored the procedure integrity to prevent violations and fraud. After the results had been processed, the applicants got the total score through their Personal Accounts. Their current place in the ranking was also displayed there.

**The Russian House
in Tajikistan**

NB. Taking into account that 93% of the country area are occupied by mountains, stable high-speed internet is not available everywhere, and this can affect the online testing procedure. That's why, to provide equal opportunities for applicants, we created the external testing center in cooperation with our partners – the MegaFon Tajikistan company and the cultural and educational center under Dushanbe eparchy. More than 100 computer workplaces with high-speed internet were allocated. Young men and girls managed to connect and take the test. This practice approved itself, and we will extend similar practices in the future.

Applicants for Master's, PhD and residency programs are selected as in the old times: in the format of oral in-person/ remote interviews. For this purpose, a special commission consisting of Russian universities' representatives is established– for example, last year more than 50 people from 24 universities made up the group. The commission works as part of four clusters: technology, medicine, humanities, and creativity.

The applicants' level of competence is assessed not only by the universities' representatives in the commissions but also by the representatives of the Ministry of Education and Science of Tajikistan, the Russian diplomatic mission, business entities and even doctors from the military hospital of the 201th Russian military base. As a result, we have a qualified group of specialists competent in all areas.

The documents for everybody changing their status from applicant to student at the final stage are executed by our colleagues from the Ministry of Science and Higher Education of Russia.

EDUCATION FAIRS AND MEETINGS

Career guidance at the Russian Houses in Tajikistan comprises a broad range of activities. We place the information on the Internet, on social media platforms, in mass media, in the HED magazine. We openly participate in live radio and TV programs, answering applicants and their relatives' questions.

It is important to bear in mind that Tajikistan is a friendly country, and families take an active part in their children's life. That's why we always meet applicants halfway and give explanatory consultations both in the capital and in the regions.

Another area is offline meetings with the representatives of partner universities. They not only come to our platform with their career guidance activities but also conduct tests and hold Olympiads. We also work a lot with the universities as part of the traditional education exhibition fair. This summer the 10th anniversary exhibition of Russian education took place in Dushanbe and Khodzhen. The representatives of 34 universities came here, and the exhibition was visited by around 9,000 people – school students and their parents, university students and teachers during three days.

The exhibition aims to present universities' opportunities, fields of study, help young people decide on their future profession, familiarize them with the regional universities and cities of Russia. Local applicants traditionally choose Top 3: Moscow – Saint Petersburg – Kazan. However, there are a lot of decent universities and scientific centers in other regions of our country.

And we want to get across this idea so that parents and children can ask the university representatives some questions themselves, get the information not only about studies and scholarships but also about living conditions, extracurricular activities, the city itself, climate and even about the Tajik compatriot association in the region (this aspect is also important to many).

We consider the big annual event from our friend and partner, the MegaFon Tajikistan company – MegaFon Fest one of the mass events to keep the public informed. In 2022, this real festival for the city residents brought together over 20,000 people. The Rossotrudnichestvo information center was engaged in the event.

POPULAR PROFESSIONS

The technology cluster is our unconditional priority. In particular, the **IT industry**. Russia is an apparent leader in this field, that's why a great number of universities with many years of tradition, with the constantly updating methodological framework and well-developed facilities and resources are sought after by applicants.

Architecture, civil engineering, electric power engineering and electrical engineering are also popular in our country. **Medicine: general medicine, dentistry, surgery** is a traditionally important field in the republic. **Humanities** are in great demand. The priorities change a little from year to year but **economics, international relations and law** are always in Top 3.

The top creative professions are **design, directing and TV, musical and instrumental arts**. Speaking from my own experience, being a judge in the cultural cluster is a right that should be deserved because students prepare, come with their instruments, someone plays scenes from stage performances, someone sings, someone dances – this is always a very decent performance. We have built close ties with Russian universities for culture and arts.

The lyceum students from Tajikistan are prize-winners of the international ecological competition

**We wish good luck to all of you this year!
Don't be nervous, check your facts as we
often say, take exams, try your hand.
I wish you success! See you in Russia!**

Russian Education

for Students from Turkmenistan

Citizens of Turkmenistan apply to Russian universities in different ways. Many of them make significant efforts to get a coveted state-funded place within the quota. Some senior high school students take an active part in online international and university Olympiads, win prizes, get bonuses when applying. Russian education is in great demand in Turkmenistan, that's why many students are ready to study even on a fee-paying basis.

Yulia Zaytseva, a Rossotrudnichestvo representative in Turkmenistan, talks about how applicants are selected for Russian universities and how to prepare for an interview.

ADMISSION WITHIN EDUCATION QUOTAS

In 2022, the Russian Government allocated 250 quota places for Turkmenistan for all study programs – from Specialist's degrees to PhD degrees. This is 50 places more than in 2020. Every year we can observe a significant increase in the number of those wishing to get into Russian universities, the competition is very high. So, over 2,000 applications were submitted in 2021, this is actually eight applicants per place.

Russian universities recruit students to apply for Bachelor's, Specialist's, Master's, PhD programs. Besides applying within employer-sponsored education quotas, citizens of Turkmenistan can participate in entrance exams for various majors held by the universities offline and online. Fee-paying education is also available.

It is difficult to determine the specific number of students at Russian universities because many people contact educational organizations directly. But we think that thousands of students study in Russia.

THE RUSSIAN HOUSE'S ACTIVITIES

This year the Russian House in Ashgabat took part in the major international exhibition "Healthcare, Education and Sports in the Era of Renaissance of a New Epoch of the Mighty State." The big exhibition stand displayed all the information on selection within the quota for the academic year 2022/2023, materials about top Russian universities every foreign citizen can apply to. The information was also available online.

The Russian House actively cooperates with the Turkmen-Russian secondary school named after A. S. Pushkin where school students are taught according to Russian standards. This is one of the leading schools in the country with highly motivated school leavers - they score high in the Unified State Exams, get admitted to Russian universities within the quota, study in state-funded places.

Besides, we make presentations, post the information on the Russian universities, enrollment campaign aspects, Olympiads and competitions on our social media platforms, talk about majors and living conditions. We try to give as much useful information as possible about the city and region where applicants plan to study.

HOW APPLICANTS ARE SELECTED BY RUSSIAN UNIVERSITIES

The selection process has two stages.

1 The first stage – application submission: candidates fill in the application form, attach the required package of documents and wait for verification. All these steps are done online on the specially designed portal education-in-russia.com. This is a very convenient and modern way because you can do all the required steps from home.

Later, at the fixed time, applicants undergo selection tests: a test for prospective Bachelors and Specialists and an interview for Masters, PhD students and medical residents. This is the most difficult period for prospective candidates.

The portfolio competition is held, where bonus points for individual achievements are calculated, for example, for participation in international Olympiads, volunteering and sports victories. All the points are calculated exactly based on the fixed routine with categorization.

At the end of the first stage, the sheet with the selection tests results is attached to the application of each candidate who successfully passed the test or interview.

Yulia Zaytseva

2 The second stage – sending applications of candidates who successfully passed the selection tests for verification to the central office of Rossotrudnichestvo. Later, the applications are sent to the Ministry of Science and Higher Education of Russia for further distribution, referral and enrollment of applicants at the universities.

The Embassy of the Russian Federation
in Turkmenistan

TIPS TO PREPARE FOR AN INTERVIEW

You can successfully pass the selection tests if you study every day. Do not wait for your final year at school to start preparing anxiously for your exams. Learning new material, looking through the tasks of the Unified State Exams, doing all possible tests, reading imaginative and academic literature, participating in intellectual games, developing yourself – all of this should be done every day, and you should start doing it now and pursue your goal systematically. This is a key to success.

Definitely, the strongest piece of advice is to choose a major and future profession to your liking, as the saying goes. It is important for us not only to provide students with high-quality education but also to allow them to make constant progress, reveal their best character traits, intellectual abilities, become respected citizens and professionals.

POPULAR FIELDS AND UNIVERSITIES

Applicants from Turkmenistan show the greatest interest in such fields of study as **medicine, law, pedagogy, and engineering**.

Among the top Russian universities candidates strive to get into are:

- Peoples' Friendship University of Russia
- Saint Petersburg State University
- Moscow Institute of Physics and Technology
- National Research Nuclear University MEPhI
- Bauman Moscow State Technical University
- The Russian Presidential Academy of National Economy and Public Administration
- Financial University under the Government of the Russian Federation

~~~~~

**After completing their studies in Russia, students go back home to confirm their diploma and find a job in Turkmenistan. As a rule, graduates are employed in their degree field without any difficulties. Russian higher education is highly respected and graduates of Russian universities are highly valued here.**

EMPLOYMENT

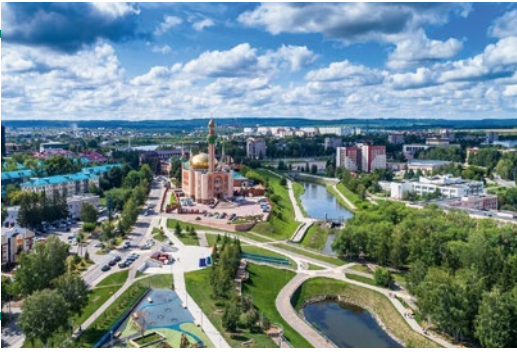

65-75% of graduates every year start their career at Tatarstan enterprises such as Tatneft, Gazprom Transgaz Kazan, the ALNAS plant, service companies.

15-20% of graduates find employment at oil and gas enterprises outside Tatarstan in over 25 regions of Russia.

10% of graduates pursue their Master's and PhD degrees.

Almetyevsk State Oil Institute boasts state-of-the-art laboratories fitted with high-tech equipment manufactured in Russia and abroad

ALMETYEVSK

- The petroleum capital of Tatarstan. The fourth place in Tatarstan in terms of population
- The multicultural environment: mosques and churches
- Plenty of sights, including museums, theaters, cultural centers, parks
- The sport environment: Olympic-size swimming pools, ice palaces, and the mountain ski resort 10 km from the city
- The cycling capital of Russia: unique cycling transport infrastructure

ASOI CAMPUS

It is one of the best campuses in Russia. It is the embodiment of synergy of university, sectoral and academic science. The campus is located in the production and innovation center, and it has incorporated the best international campus practices:

- Laboratory research building fitted with required top-class equipment
- Modern gym on campus
- 712 places in two dormitories
- Two-person student rooms have everything you need for comfortable living
- Each block has a kitchen equipped with a microwave oven, a kettle, a multicooker
- Separate shower rooms, private laundry rooms, a buffet

“

Sultanbek Timerbaev, Kyrgyzstan

It was my father who told me about Almetyevsk State Oil Institute. I didn't plan to go to a foreign country, but my parents wanted me to study in Russia. I followed their advice and decided to send my documents to ASOI. I successfully passed my entrance exams and got a state-funded place.

I like the city and ASOI dormitories very much. I feel safe in Almetyevsk!

“

Jumanazar Kuliev, Kyrgyzstan

People often ask me why I chose Almetyevsk from all Russian cities. To be honest, the choice was obvious for me, because my friends studied in Almetyevsk. They spoke well of this city and ASOI. Local people are communicative. Besides, the region has a very convenient location for travel enthusiasts. It's the heart of Russia.

WHY IS KSUAE AN EXCELLENT CHOICE?

1. High-quality field-specific education
2. Fields of study which are in demand on a long-term horizon
3. The university teachers are leading scientists and scholars successfully combining practical, teaching and research activity
4. The graduate employment rate is 100%
5. The excellent study and living environment: the cozy campus in the city center meeting the highest quality standards
6. Interesting and exciting extracurricular student life
7. A special spirit of corporate relations between students and teachers

GRADUATES AND STUDENTS' WORKS

- Kul Sharif Mosque
- The Lazurnye Nebesa (Blue Skies) residential estate
- The Korston hotel, shopping and entertainment Center
- The Basket Hall sports center
- The GUM shopping center in Kazan
- Improvement of the garden square near the Civil Acts Registration Office in the Kirovsky District as part of the 100 Garden Squares program
- Examination of the Kazan Arena stadium foundation
- Designing building structures of the Kazan international airport terminal
- Designing reinforced concrete rings for building the Kazan metro
- Designing the Mordovia Arena stadium stands for the FIFA World Cup
- Design of the temporary roof of the Kazan Arena stadium for the 16th FINA World Championships
- Installation of polymer composite reinforcement at the Kazan airport ramp
- Restoration of Merchant Sergei Zemlyanov House
- Restoration of the Pentecost Church in Sukonnaya Sloboda (Cloth Settlement) in Kazan

CAMPUS

Cozy European-style campus in the city center

- Comfortable dormitories: rooms accommodate two or three persons, shower and toilet rooms are located in blocks, the kitchen is on the floor
- Modern research and education centers for all fields of study
- The KSUAE multifaceted sports center is the 2013 Summer Universiade facility
- The Mesha sports and recreation camp
- The canteen is one of the coziest places in the university, where you can have tasty and cheap meal
- A comfortable, light, and spacious assembly hall for student events
- A parking lot for students and staff

SPORTS

- KSUAE students are winners of the University Spartakiad that includes 31 sports, international competitions
- The Tozuche sports center includes a hall for sports games, a wrestling hall, a strength sports gym, a boxing hall, an aerobics hall, a table tennis hall

The first round of the rugby sevens competition

KSUAE offers the opportunity to work out and play sports for both professional athletes and those wishing to improve their health.

20 professional coaches, over 30 sports, first-rate equipment confirm a high level of physical education and sport development at the university.

INTERNSHIPS AND EMPLOYMENT

- Students undertake internships and work placement with subsequent employment at theaters, museums, philharmonics, libraries, archives, children's music schools and art schools, youth centers, culture and leisure centers, travel agencies, TV and radio companies, motion picture companies, creative unions of theater workers, composers, artists, film makers of the Republic of Tatarstan
- Every year, the institute holds a single career day with the participation of employers from Tatarstan, the Volga region, Russia
- Employers take part in the learning process, final state certification, exams

ENGINEERING CENTER

- There are three research laboratories:
 - fashion design
 - artistic wood processing
 - art pottery
- Focus areas
 - designing and automating industry-specific business processes
 - conducting research and developing a database
 - creating new designs and manufacturing technologies for modern clothing with national elements
 - developing and introducing intellectual products
 - providing engineering services using a virtual simulator

DEPARTMENT OF CREATIVE, PROJECT AND INTERNATIONAL ACTIVITY

Nusratillo Juraev

+7 843 277-53-50

artotd@kazgik.ru

Graduates of Kazan State Institute of Culture

work in various areas of culture, professional art, at social and government agencies, libraries and museums, theaters and clubs of Tatarstan, the Volga region, and Russia. Many of them have prestigious awards for their professional achievements. Among them are honored members of the creative community, People's Artists, scientists, educators, and eminent figures in other important areas of humanities, laureates of Russian and international contests.

Karina Nazhimova, a second-year student at Kazan State Institute of Culture, won the first place in her category in the republican interuniversity contest "International Student Day" in 2022

ADAPTATION

The Psychosocial Service offers successful workshops to adapt students to a new learning environment at the institute, develop their communication and confidence behavior skills, and ensure students' unity and their closer interaction. The meetings are dedicated to a wide variety of topics, for example, Preparation for a session; How to pass an interview; Self-fulfillment in creativity, and others.

Kazan State Institute of Culture is the winner of the qualifying round of the First-Year Student Day festival in 2022. This annual event is one of the most popular city festivals among young people of Kazan

EVENTS

- International, all-Russian contests and festivals
- Research and practice conferences, webinars, intellectual competitions
- Concert programs and programs adapted for the stage, exhibitions of the degree-granting art departments' creative works
- Film festivals, photo exhibitions
- Science education lectures "Famous Scientists for Young People"
- Meet-the-Artist Events as part of the Life of Outstanding People project

Akhmajon Oev, Tajikistan

Was it difficult for me to enter a Russian university? I didn't have a lot of difficulties, but I was scared. After all, Russia was quite a different country. I was very nervous about whether I'll be able to live and study here. I had come two months before the exams started, and I almost didn't know Russian. My adaptation went well, but I had a language barrier. Russians differ from my compatriots. They are very serious. I think it's because of the cold.

Now I am studying at the Faculty of Theater, Cinema, and Television. My major is Television Producing. I take part in international film festivals, events held by the Assembly and Tatarstan Peoples' Friendship Center.

POSTGRADUATE AND CONTINUING EDUCATION

Kazan SMU offers postgraduate and continuing education programs for medical and pharmaceutical professionals and social workers:

- residency programs in 48 specialties
- PhD programs in 35 specialties
- professional retraining, advanced training, internships

The university students and graduates can get continuing education by pursuing programs such as **Translator in the Sphere of Professional Communication; Medical Psychology; Digital Technologies in Healthcare**, acquire the necessary skills in plastic and reconstructive surgery, fitness medical support, therapeutic massage, cosmetology.

ADMISSION OF FOREIGN CITIZENS

Citizens of foreign states, including citizens of the former USSR republics are admitted:

- in accordance with the international agreements
- within the quotas
- based on the individual contract (on a fee-paying basis)

Start October 1

Duration 10 months

Tuition fee 135,200 RUB

EDUCATIONAL PROGRAMS

- General Medicine, RU , EN 
- Pediatrics
- Dentistry, RU , EN 
- Preventive Medicine
- Pharmacy, RU , EN 
- Medical Biochemistry
- Medical Biophysics
- Nursing Care
- Social Work

SCIENCE AND INNOVATION

Kazan SMU boasts the leading scientific schools of Russia and conducts up-to-date research. Heart and liver are transplanted in Kazan under the supervision of world-renowned scientists. The university has **58 scientific schools:**

- molecular genetics
- molecular physiology
- cell and tissue technologies
- oncology
- cardiovascular diseases
- preventive environment
- endocrinology
- neurology and neurosciences
- pediatrics
- reproductive health
- psychiatry and dependencies
- pharmacology and pharmaceutical chemistry
- critical technology in medicine

IRINA STUDENTSOVA STUDENT SCIENTIFIC SOCIETY

- 60 student scientific circles
- International Youth Scientific Medical Forum "White Flowers"
- Science fairs aimed to familiarize students with research at the university

RESIDENCY PROGRAM

Kazan SMU offers a residency program in Internal Diseases according to CanMEDS standards. The best clinics in Kazan provide clinical training.

Duration 4 years

 +7 843 236-77-44

Science is not only an occupation but also a vocation. At Kazan SMU, every student can "taste" science, tap into its thinking system under the guidance of a mentor. Extensive scientific and clinical facilities, highly qualified academic staff, a great number of up-to-date research areas allow students to take a step towards big science and contribute to public health and longevity.

Kazan SMU is the only member of the Royal College of Physicians and Surgeons of Canada in Russia and Eastern Europe and the first Russian university to undergo international accreditation according to the World Federation of Medical Education (WFME) standards.

FACULTIES

- General Medicine
- Pediatrics
- Medicine and Biology
- Dentistry
- Medicine and Biology
- Social Work and Higher Nursing Studies
- International Students
- Advanced Training and Professional Retraining of Specialists

STUDENT LIFE

The university maintains the long-standing traditions of holding sports competitions and annual amateur art festivals. It has a student club, various circles and creative clubs. The student club hosts discos, has a student theater of variety miniatures, a choir, a vocal studio, and a dance group.

- The Student Club comprises the Grom theater studio, the Astra dance studio, the vocal studio, the Adrenalin cheerleading and aerobics teams, the MDFamily dance studio
- Debate and elocution club
- Brain club
- The Sports Club comprises 16 clubs, the Adrenalin cheerleading squad, the Tulpar aeronautical club, the Bentos diving club
- Student media center
- Volunteer movement
- Aesculapius Student Brigades Office

Kazan State Power Engineering University is a leading power engineering university in Russia. It has been training specialists for power engineering and industry of Russia, the CIS countries, and other foreign countries for over 50 years.

Tuition fees per year

113,600 – 171,100 RUB

KSPEU trains highly qualified personnel in the field of electric power engineering, power engineering and civil engineering.

Taking into account a growing demand of the world's national economies for the increasing quantity of electric power being produced as well as looking for the ways to reduce the cost of such production and the negative environmental impact, power engineering industry specialists, whether they are blue-collar workers or research fellows, will be in demand on a long-term horizon.

ADMISSION REGULATIONS

At KNRTU-KAI, foreign citizens have the right to apply for secondary vocational education programs, Bachelor's, Specialist's, Master's and PhD programs on a fee-paying or non-fee-paying basis.

Citizens of the Commonwealth of Independent States (CIS) permanently living abroad are eligible for **state-funded places** on equal terms with Russian citizens.

Foreign citizens from non-CIS countries can pass the competitive selection to study within the quota allocated by the Russian Government and study for free.

Foreign citizens can apply to KNRTU-KAI for Bachelor's programs based on the results of the university's entrance exams which start in July 2023 (fee-paying and state-funded places).

Applicants can submit their documents both in person at the university and online in their Personal Account on the university website starting from June 19, 2023.

KNRTU-KAI creates comfortable conditions for foreign citizens applying to the university such as online document submission, the university staff members' assistance in document submission, the opportunity to undergo the foreign education recognition procedure directly at the university. Documents can be submitted "in one window."

A.N. TUPOLEV INTERNATIONAL OLYMPIAD

Applicants from the CIS countries can participate in the Olympiad the results of which can be taken into account as entrance exams or bonus points for admission to our university.

Based on the results of the final stage of the Olympiad, applicants can be enrolled at KNRTU-KAI in grant places (for free) and on a contract basis (in fee-paying places).

Start: February 1, 2023

Subjects: Mathematics, Russian Language, Physics, Informatics

2 stages: qualifying (distance) tour and final (in-person/distance) round

You will find more information at abiturientu.kai.ru in the For School Students section.

INTERNATIONAL PREPARATORY DEPARTMENT

- The admission process is open all year round
- If students have no opportunity to come to Russia at once, they can start studying using distance technologies
- Top-notch educators are engaged in teaching major subjects. They have extensive experience and original teaching methods and take an individual approach to each student
- Those for whom Russian is particularly difficult may choose an in-depth course that lasts 1.5 years

POPULAR MAJORS

- Aeronautical Engineering
- Heat Power Engineering and Heat Engineering
- Mechanical Engineering
- Software Engineering
- Economics

The language of instruction at the university is Russian 🇷🇺, but there are several English-taught 🇬🇧 Master's programs. Students can choose one of more than 75 popular majors.

ADAPTATION

After international students are enrolled, they are supported by the staff members of the KNRTU-KAI Institute of International Education.

They help check in at the dormitory, get health insurance, undergo medical examination, prepare and submit visa extension documents, and get migration registration.

During the first two weeks, international students participate in the **Adaptation School** activities such as tours, lectures on Russian legislation, mindset training courses, master classes on living in dormitories, and other events. The university's psychologists help overcome adaptation problems that arise.

PARTNER EMPLOYERS

KNRTU-KAI is a flagship university of state corporations such as Rostec, Rosatom, Roscosmos. A great many graduates work for aviation enterprises. Among the employers are Gorbunov Kazan Aviation Plant, a branch of the Tupolev company, Kazan Helicopter Plant, Ural Civil Aviation Plant, Kazan Research and Production Enterprise "Helicopters-MI," Kazan International Airport named after Gabdulla Tukay, Sochi International Airport named after V. I. Sevastyanov.

SCIENCE

Now R&D is carried out in the field of laser, quantum and composite technologies.

Over the past several years, KNRTU-KAI has implemented a lot of breakthrough projects which still play an important role in developing engineering education and research and technology sector of the republic and Russia.

FAMOUS ALUMNI

KAI's history is related to the names of outstanding Russian scientists. Among the people who worked here are Sergei Korolev, the founder of Russian rocket science; Boris Gubanov, chief designer of the Energy – Buran rocket and space system; Mikhail Simonov, chief designer at Sukhoi Design Bureau Company; academician Vyacheslav Alemasov.

Among KAI graduates are Ildus Mostyukov, chief designer of the single combined arms system of state radar identification of Russia "friend or foe" as well as Vladimir Belugin who was the head of the Russian Federal Nuclear Center – All-Russian Scientific Research Institute of Experimental Physics, and other famous people.

As part of the student social support program KAI.CARE, the university offers special conditions, including scholarships in the amount of up to 15,000 RUB per month for first-year students, dormitory accommodation, and the KAI-OLYMP modern sports center.

Students can study in state-funded and fee-paying places

DOCUMENTS

required for admission based on nine grades

- Identity document
- Nationally recognized document confirming basic general education
- Four 3×4 cm photos
- Individual insurance account number
- 086/Y medical certificate (on request)

EDUCATIONAL PROGRAMS

Full-time studies

2 years 10 months

- Tourism specialist
- Specialist in document support of management, archivist

3 years 10 months

- Pre-school teacher
- Primary school teacher
- Teacher of primary school and primary school of compensatory and special education
- Physical culture and sport teacher
- Designer
- Programmer

After you successfully complete the SVE programs, you will be able to continue your education by pursuing accelerated higher education programs at NCSPU.

SVE programs

At all times, the profession of a teacher is one of the most sought-after and respected in any country. The teacher performs the challenging task of communicating world knowledge and ethical standards to new generations of citizens.

Bearing this in mind, it is impossible to overemphasize the importance of high-quality training for psychology and pedagogy personnel. Throughout its 40-year history, Naberezhnye Chelny State Pedagogical University has trained over 18,000 experts in pedagogy and psychology.

INTERNSHIP AND GRADUATE EMPLOYMENT PROMOTION CENTER

Activities and events: regular analysis of the job market, graduates' surveys, meetings with employers – representatives of educational institutions.

Students undertake their internships at schools, including schools for children with disabilities, lyceums, gymnasiums, kindergartens, sports schools, children's health camps, and other institutions.

The University of Management "TISBI" is an accredited and licensed university, that's why state-funded places are allocated for some educational programs

DISTANCE LEARNING

TISBI uses its own exclusive development – **Integrated University Management System (ISU VUZ)**. Students can attend classes from anywhere in the world where the Internet connection is available. Access to educational and control materials, consultations with teachers, and participation in classes are available through personal accounts in the ISU VUZ.

Admission of foreign citizens

TISBI is the only University in the world that participates in three international educational programs of UNESCO:

- UNITWIN – UNESCO Chairs
- UNESCO Associated Schools Network
- UNESCO – UNEVOC Center for Technical and Vocational Education and Training

The team "We are from Algeria" is the prize-winner of the City Olympiad in Russian as a Foreign Language "Russian Language: The Start in Your Profession"

SCIENCE

TISBI's scientific potential is represented by a great number of materials and resources and highly qualified teaching staff (83% are Doctors and Candidates of Sciences).

Students are actively engaged in research. The Student Scientific Society has more than **10 scientific circles and clubs** for all research areas of the university. Students' research papers are recognized as the best in the competitions for the Russian President Scholarship, the special state scholarship of the Republic of Tatarstan, Kazan Mayor's personal scholarship.

TISBI graduates hold key positions at ministries and government agencies, major corporations, take an active part in the region's social and creative life, successfully run their business.

The University of Management "TISBI" **provides fundamental training for IT specialists in the following areas:** data transmission networks, cybersecurity, programming, system administration.

Students of the Faculty of Information Technologies have a unique opportunity to study at CISCO Networking Academy for free and obtain an international certificate.

Dmitriy Polyakov, TISBI Rector

The University of Management "TISBI" has been confirming its effectiveness and uniqueness for 30 years already. From year to year, our educational programs change according to the market development and real business needs. Since the first days we have been trying to build the learning process in the format of game practice and other modern methods, which allows us to project classes onto the real issues of economics, law and information technologies. In 2022, TISBI's nine programs became the winners of the project *Best Educational Programs of Innovative Russia*.

Besides, the university's educational programs entered the first league of the Subject National Aggregate Ranking. The study not only confirmed the strong positions of the University of Management "TISBI", but also showed leadership of the university's subject areas which are not inferior to the top Moscow universities in terms of the quality of training.

Digital transformation in education is one of our main advantages. TISBI was the only Russian university to participate in the IT project support program implemented by the Ministry of Digital Development, Communications and Mass Media of the Russian Federation, and our integrated university management system is one of the best developments in Russia. The software product was created as early as in the beginning of the 21st century and is constantly refined for new tasks and conditions. For example, during the pandemic and transition to remote learning, ISU VUZ was globally refined. The modules were added to the IT product to organize online courses and distance communication between students and teachers in the modes of webinars and forums.

The University of Management "TISBI" is a **team of like-minded people, including teachers, staff members, students, where everybody can find themselves, become a professional, fulfill themselves, and get support and assistance.** Our mission is to preserve the quality and competitiveness of training the leaders who will be in demand in the modern society.

Welcome to our big and kind family!

The university develops students' pro-active attitude, motivates to work, and develops leadership, teamwork and interpersonal skills and professional competencies.
