### Hi, applicant!

Help you choose a profession and a university

During the interview we identify applicants' readiness to go to Russia, their motivation and learning goals. **23** The candidate selection process is based on General Certificates of

Education and Advance Level government exams.

25

We are planning to open more Russian language classes to admit a new flow of students into the Russian House.

Dear friends!

We have done our best to make our magazine interesting and useful, but we can still improve it together! If you want to share your experience and plans for the future or give your feedback, please contact us at kleshnina.es@hedclub.com.

## Russia and South Asia: Education and Career

For many decades, Russian higher education has been popular among students from the countries of South Asia, and the number of South Asian students coming to study in Russia every year runs into thousands.

Our countries have always maintained friendly relations. In research and education, this manifests itself in the developing academic mobility, joint research conducted in various fields of science, strong ties between universities, and the work of Russian language departments in South Asian countries.

Young men and girls go to Russia to get high-quality education, which is highly valued all over the world. Besides, tuition fees at Russian universities are affordable, and the quality of knowledge has been tested by several generations. After completing their education in Russia, young graduates are considered excellent specialists in their home countries.

### **RUSSIA AND INDIA**

In science and technology, Russia and India implement joint projects both in bilateral format and within BRICS.

Our countries conduct joint research in such fields as agriculture, physics and astrophysics, quantum science, shipbuilding, healthcare, medical technologies. One of the most promising areas is blue economy which comprises the development of innovative methods of management and use of available resources to prevent environmental issues and climate change.

Russia and India conduct research within BRICS in the following areas: photonics, material sciences, and nanotechnologies. Research institutes and universities in the two countries conclude bilateral agreements on cooperation, including academic mobility programs. The Indian Academy of Sciences and the Russian Academy of Sciences actively exchange scientific personnel, and technologies are exported within the Russian-Indian Science and Technology Center with the branches in Moscow and New Delhi.

Cooperation between the two countries also develops in the field of higher education. In recent years, Indian citizens have been increasingly choosing Russian universities. Now 16,700+ Indian citizens are pursuing Specialist's and Master's degrees at Russian universities, including foreign branches. The top fields of study include General Medicine and Philology. There is high demand for IT majors, materials science, mechanical engineering and power engineering, mathematics, economics, management, and humanities.

## -66-

### Himadrish Suwan, Chairman of the Confederation of Young Leaders of India

I can see the energy of young Indians: they really want to learn more about Russia and its culture as well as the programs still implemented by the Russian House in New Delhi.

### **RUSSIA AND SRI LANKA**

In Russia, great importance is attached to the development of cooperation in education, science and technology with the Republic of Sri Lanka. Russian universities train highly qualified specialists for various sectors of Sri Lankan economy and social sphere – more than 800 Sri Lankan citizens study here.

The most popular fields of study among students from Sri Lanka are General Medicine; Informatics and Computer Engineering; Electric Power Engineering and Electrical Engineering; Economics; Linguistics.

To develop humanitarian ties between the two countries, the Russian Center of Science and Culture (Russian House) was established in the city of Colombo in 1986. It teaches the Russian language, chess, ballet, gives art and music education. The Russian House aims to promote the Russian language, familiarize students with rich historic and cultural heritage of Russia, and develop an objective image of our country.

## -66

### Susil Premajayantha, Special Representative of President of Sri Lanka for Relations with Russia

Since 1960s, Russia has been providing Sri Lankans with scholarships that have helped more than 1,000 students get free education in the field of medicine, economics, and engineering. Graduates of Soviet and Russian universities hold top positions in Sri Lanka.

### **RUSSIA AND BANGLADESH**

Bangladesh – Russia relations based on trust and mutual respect have been developing in a positive way in all fields, from politics to humanities. The Intergovernmental Commission on Trade, Economic, Scientific and Technological Cooperation was established and began its work in 2017.

The top priority in trade and economic interaction between our countries is power engineering. Citizens of the republic are especially interested in pursuing engineering degrees at Russian universities.

In cooperation with Russian specialists from Rosatom, Bangladesh is building Rooppur, the country's first nuclear power plant. In autumn 2022, the attendees from Bangladesh completed the basic course for chemistry lab technicians working with primary cooling systems at special water treatment facilities. Training was provided by the instructors from Rosatom State Corporation. It took them 17 weeks to master the whole program, including theory, practice and internship at Rooppur Nuclear Power Plant. There are plans to train a total of over 50 groups of Bengalis. The head of the training center of the nuclear power plant in Bangladesh is Golam Shahinur. In 2018–2019, as a member of the first groups of Bengali attendees, he successfully underwent training at Rosatom Technical Academy.

### Sheikh Hasina, Prime Minister in Bangladesh

Our population is growing, our industry and business are developing, that's why demand for electrical energy is on the rise. And our power engineering is one of the most efficient. That's why we decided to develop nuclear power engineering, too.

We need nuclear technologies not only to produce electricity. We already use them for medical purposes and food treatment. And we are ready to cooperate with Russia in these areas.

### **ADMISSION REGULATIONS AT RUSSIAN UNIVERSITIES**

Foreign citizens can take entrance exams held by the university even if they have valid results of the Unified State Exams. The admission office will take into consideration a better result.

Foreign citizens have the right to combine the results of the Unified State Exams (USE) and entrance exams. For example, if the applicant passes the USE in the Russian language with high scores, they submit the result to the admission office. But if the applicant is dissatisfied with their USE score in mathematics, they can take the entrance exam to try to improve their result. Finally, the highest score is chosen.

Foreign citizens are eligible for state-funded places if they apply under the international education agreements or have compatriot status. Applicants applying within the Russian Government quotas apply to a university as part of a special competition for foreign nationals.

Those applying as compatriots cannot exercise special rights – neither social rights nor rights related to the applicant's achievements.

Some universities have reduced the number of entrance exams for international applicants applying for fee-paying places (on a contract basis) to one. Foreign citizens apply as part of a special competition without competing with Russian applicants. However, you should bear in mind that the number of entrance exams is determined by a university itself. You must get more specific information from the admission office.

The procedure for translating foreign documents into Russian is changed. Some universities undertook to perform this procedure.

The document recognition certificate (if necessary) is submitted not later than on the day of enrollment consent submission. So you should find out beforehand where you can undergo this procedure, how to pay the duty, and clarify other issues for yourself.

Foreign documents must be legalized, if necessary.

Admission. Supported by Rossotrudnichestvo

# Russian education

Today around 30,000 Indians are studying in Russia. They prefer medical specialties which are much more popular among them than other fields of study. Economics and engineering and technology majors are also in demand. Oleg Osipov, Head of the Russian House in New Delhi, talks about Indian citizens' opportunities to apply to Russian universities and the projects familiarizing them with the Russian culture and language. ≈ 30,000 students from India are studying at Russian universities

16

Every year the Russian Government offers education quotas to Indian citizens. Two hundred scholarships were allocated for the academic year 2023/2024. This figure is not so high for such a country as India. Indians' needs significantly outweigh it. The competition is up to 10 applicants per place. Due to this, local young men and girls are forced to go to Russia in their private capacity and study there on a commercial basis. Meanwhile, some positive changes are imminent. For comparison: the previous year's quota included 120 places.

2000 quota places in the 2023/2024 academic year 120 quota places in the 2022/2023 academic year

Russian education fair

"

We plan to be more active in encouraging Indians to try to get state-funded education and increase the number of those wishing to study within the quota.

To participate in the selection to get the Russian Government scholarships, all candidates must **register** in the state information system "Education in the Russian Federation for Foreigners" *education-in-russia.com*. This is a special website where applications from everyone interested are accepted, document competitions are held, portfolios are assessed, and interviews are held, if necessary. **During the interview** we identify applicants' readiness to go to Russia, their motivation and learning goals. To pass the interview, they should be ambitious and well-rounded young people, to an extent.

**W** The Russian House in New Delhi

### Admission. Supported by Rossotrudnichestvo

#### **CAREER GUIDANCE ACTIVITIES OF THE RUSSIAN HOUSE**

The Rossotrudnichestvo representative office in India having a network of the Russian Houses in New Delhi, Mumbai, Calcutta, Chennai, and Trivandrum plays a key role in disseminating information about Russian universities. We place our materials on our social media platforms and at outdoor booths, publish them in local newspapers, hold press conferences, and participate in organizing education fairs.

Besides, Indian graduates set up the companies specializing in providing services to recruit and send local young people to study at Russian universities. They are also actively engaged in drawing attention to higher education in Russia.

Indian graduates are employed both in India and Russia. They work as doctors, teachers, journalists, start and develop their own businesses

"I believe that if I help young and smart people, I can massively augment my work. As you know, one soldier does not make a battle. We must have an army of specialists. And I am creating this army."

**Somasundaram Subramanian, India.** A graduate of the medical faculty of the Russian university. A surgeon, an oncologist, a manager of international educational and scientific projects.

Read in the HED magazine.

### THE RUSSIAN HOUSE'S PROJECTS

- **The school of Russian classical ballet** under the direction of the professional choreographer from the Bolshoi Theatre
- Education fairs for those wishing to study in Russia
- Cooperation with Indian schools teaching Russian
- Chess tournaments
- Performances of Russian artists
- Movie-based Russian language lessons for students
  The program includes watching Russian short movies with discussion, vocabulary analysis, and a quiz. Movie-based lessons are conducted at Indian universities once a month.

### Arunim Bandyopadhyay, Head of the Center of Russian

**Studies,** talks about the first screening of the Russian movie *Moscow-Vladivostok* directed by Ivan Sosnin, which took place at Jawaharlal Nehru University (JNU)

What counts most is that students easily and gladly accepted a new form of learning Russian: they listened, watched, and spoke up. I hope that the number of participants will be increasing, and our students will develop a good habit of watching short movies together with native speakers over time.

# Great Opportunities

## for Sri Lankan Students

Russian higher education has traditionally been in great demand in Sri Lanka since the Soviet times. Sri Lankan students can study at Russian universities within the Russian Government quota (on state scholarship basis) as well as on a fee-paying basis, which is very affordable compared to the tuition fees in the US or Europe.

Today we can see the highest demand for medical education as well as engineering and technologies. The Russian language and tourism are also popular. The annually offered Russian Government scholarships are a great opportunity for Sri Lankan students to change their lives for the better. Maria Popova, Head of the Russian House in Colombo and First Secretary of the Russian Embassy in Sri Lanka, provides detailed information on admission within the quota and graduates' career opportunities.

"

### **ADMISSION WITHIN QUOTAS**

This year, Russia has increased the number of education quota places for Sri Lankan applicants from 40 to 50, what makes us very happy! Every year we receive an enormous number of applications, and **the selection process is based on General Certificates of Education and Advance Level government exams**.

Currently there are around 2,000 Sri Lankan students studying at Russian universities. They usually obtain the information on the opportunities of higher education from the Russian House in Colombo or through private agencies. Being the exclusive promoter of state scholarships, the Russian House in Colombo conducts briefing sessions and seminars related to the subject for local students every year, as well as widely shares the information via its social media.

As soon as we receive the information on the Russian Government scholarships, we start the social media campaign. Students are encouraged to submit their higher education certificates they own. As for the Bachelor's degree, students can submit the General Certificate of Education (Advanced Level) Exam result sheet certified by the Foreign Ministry of Sri Lanka. Students applying for a Master's degree are supposed to submit their Bachelor's degree certificates and their transcript, as well as sports achievements, Olympiad wins and etc. Based on all the information provided, we compile a competitive list of candidates and select the best candidates based on the highest percentage of grades they obtain. 50 quota places in the academic year 2023/2024

40 quota places in the academic year 2022/2023

≈ 2,000 students from Sri Lanka are studying at Russian universities

The Russian House in Colombo

### THE MOST POPULAR FIELDS OF STUDY

### among Sri Lankan students

- General Medicine
- Aeronautical Engineering
- Automobile Engineering and other Engineering specialties
- Aircraft and Aerospace
- Astronomy
- Chemistry/Physics
- Information Technology
- Russian Language
- Art and Theater Studies
- Culture Studies

### LEARNING RUSSIAN

The Russian House in Colombo is exclusively authorized to handle Russian state scholarships for Bachelor's/Master's and PhD Programs. Students are expected to submit their applications for the next academic year until February, 20 via the website *www.education-in-russia.com*. In this connection, we get a huge amount of letters and questions from applicants. To answer the most frequently asked questions and help students ease through the application formalities, the Russian House regularly hosts special briefing webinars about applying for Russian State scholarships online.

One of the biggest challenges faced by young people who get to study abroad is a hard and time-consuming adaptation to a new language environment. That is why one of our key tasks is to support and cultivate the schools and universities that teach the Russian language in Sri Lanka.

As part of this mission, the Russian House in Colombo donated 550 Russian Language teaching textbooks to the Russian Language unit of the University of Kelaniya, which is one of Sri Lanka's top-ranked universities. The event was warmly welcomed by the prominent Russian Language professors and the brightest students of the university.

To continue our cooperation, the Russian House in Colombo hosted a comprehensive Russian Language seminar for the students of Kelaniya University mastering the Russian Language. The course was conducted by three lecturers — two native speakers and a local language teacher. The event was also joined by the University's senior lecturer in Russian Language and other executives of Kelaniya's Russian Language unit, who alongside the students were eager to get a deeper knowledge of the subject and improve their language skills. Later that month, a four-day professional development seminar for the lecturers, who teach Russian as a foreign language in Asian countries, was held in Vietnam's Hanoi. The Russian House in Colombo arranged this amazing opportunity for four Sri Lankan professionals who teach Russian in the island, to participate in the workshop. All the expenses including traveling, food and accommodation were covered by the Russian government.

The Russian Language has been taught at the Russian House in Colombo for decades, by native Russians as well as by local teachers. So we offer two opportunities – learning the language from a native speaker, which is really good for intermediate and advanced levels, and local lecturers making it easier to learn for the Beginners level.

Today we can see a growing demand for learning Russian not only from the students applying for Russian scholarships, but also among the local business society. The languagelearning market in Sri Lanka is changing at rapid pace due to the rebirth of the travel industry after the long economic crisis caused by Covid-19. Thus, we are planning to expand our teaching staff and open more classes to admit a new flow of students into the Russian House. Moreover, this year we are launching Russian Language courses in big cities like Galle and Kandy.

### CAREER PROSPECTS

Russian degrees are highly desired and widely recognized in Sri Lanka that's why career prospects for the graduates of Russian universities are really good.

After studying medicine in Russia, students have to go through the ERPM Exam, which is conducted by the Sri Lanka Medical Council (SLMC) for citizens of Sri Lanka who have obtained their medical qualification from medical schools overseas. After passing the ERPM Exam they can practice medicine as doctors. Also, there is a growing demand for Russian-fluent candidates in the tourism sector. So, generally speaking, the recognition for Russian degrees in every field is pretty high.

### SUCCESSFUL GRADUATES

We are proud to say that today there are more than 5,000 Russian graduates in Sri Lanka, many of whom hold top positions in various fields like diplomats, politicians, doctors, professors, managing directors, etc. Dr. Saman Weerasinghe – Former Sri Lankan Ambassador to Russia, Dr. G. Weerasinghe – General Secretary of Sri Lanka Communist Party, Prof. Jayantha Lal Rathnasekara – Vice Chancellor of Uwa Wellassa University of Sri Lanka, Dr. Sunil De Alwis – Additional Secretary, Ministry of Health Sri Lanka, Dr. Kuma Wickramasinghe – Director National Hospital Sri Lanka. The previous directors of Sri Lanka's National Hospital were also Russian graduates, and namely Dr. Anil Jasinghe and Dr. Hector Weerasinghe.

Dr. Anil Jasinghe is now the Secretary of the Ministry of Environment. Dr. Hector Weerasinghe was holding Consul General in Los Angeles, USA. Dr.Ajith Thennakoon is the Chief Judicial Medical Officer in Colombo. Dr. Ruwan Wijayamuni, Chief Medical Officer of Health and Public Health Department, Colombo Municipal Council. Mr. Buddhapriya Ramanayake, Chief Executive Officer of the Russian House in Colombo. The list goes on and on. As we can see, Russian graduates in Sri Lanka are obviously the best in every field and efficiently contribute to the development of their country.

- Compulsory subjects related to digital literacy and the English language; practical training and project activities
- The opportunity to spend one or two semesters at a foreign university under the international academic mobility program

#### INTERNATIONAL PREPARATORY PROGRAMS CENTER

The center provides comprehensive training for foreign citizens to prepare them for Bachelor's and Master's programs in Russian

- Russian language courses (basic, intensive, online/offline)
- Language of the major (study areas: humanities, economics, engineering and technology)
- Studying general subjects
- Preparation for TORFL

#### **Admission requirements**

- Age 18 years old and over
- Complete secondary education

#### Tuition fee – from 1,400 USD

Foreign citizens who have been awarded the Russian Government scholarship are eligible for tuition-free education. For this purpose, they should specify in their selection application form that they need

a preparatory Russian language course.

## THE WAYS TO ENROL AT HSE UNIVERSITY

#### 2,000 state scholarships from the Russian Government for foreign citizens

State scholarships are awarded by the HSE University selection board based on the recommendations of educational programs. It covers 100% of the tuition fee.

- For Bachelor's degree applicants based on the results of entrance exams
- For Master's degree applicants based on the portfolio competition results

2

#### Olympiads

- HSE International Olympiad for Bachelor's degree applicants
- Open Doors: Russian Scholarship Project – for Master's degree applicants

Successful participation gives international applicants the right to study at the university for free in a chosen field of study using the Russian Government scholarship.

#### Partial grants for foreign citizens

The grants covering 25-70% of the tuition fee are awarded to foreign citizens based on their total score in the entrance exams or the portfolio competition.

3

## Applying through Rossotrudnichestvo

You can get a quota place if you apply on the website education-in-russia.com and undergo selection at the Russian House in your country.

#### Nota bene! To get a quota place at HSE University, you should also pass entrance exams at the university.

To apply for participation in the HSE University's competition, you should register in the International Applicant's Personal Account and upload the document package. You can take entrance examinations online and offline.

## PREPARATORY FACULTY FOR FOREIGN CITIZENS

Foreign citizens at ISU are trained by the highly qualified teachers. All of them have many years' experience in working with foreign citizens, are knowledgeable about modern information technologies, and are authors of textbooks and study guides.

## Study areas:

- humanities
- economics
- natural sciences
- medicine and biology
- engineering and technology

Duration 10 months Tuition fee 108,000 RUB

## HOW TO GET INTO ISU

## Choose a field of study and financing option (fee-paying place/stated-funded place)

If you have any questions, you can contact the university representative by email

## Submit the complete package of documents

The documents are submitted to the university's Admission Office on June 20 – August 18, 2023. You should submit the notarized translations of your passport and academic credentials

## Pass the university's entrance exams

The entrance exams will be held on August 19-30, 2023. The exam schedule will be sent to your email address

## Get an official invitation from the university

If you successfully pass your entrance exams for fee-paying places, the university representative will send you the agreement

# Get an official invitation from the university

The invitation will be issued within a month

## Buy a ticket

You should buy a ticket to Irkutsk and inform the university coordinator of your arrival to arrange the meeting at the airport

# Arrival in Irkutsk and registration at the university

The university representative will meet you at the airport and take you to the dormitory, and the International Office staff member will familiarize you with the rules of stay in Russia and will help you get migration registration

#### Foreign citizens can take their entrance exams online.

## Foreign citizens can study for free:

- within the Russian Government quota. They can apply for a scholarship through the information system education-in-russia.com, then undergo the qualifying rounds at the Rossotrudnichestvo representative office
- as part of the program supporting compatriots living abroad

#### STUDYING

#### Specialist's program

- General Medicine (**ER**U, **Set EN**)
- Pediatrics
- Preventive Medicine
- Dentistry
- Pharmacy
- Clinical Psychology

#### **Bachelor's program**

- Biology
- Higher Nursing Education

After completing their sixth year of study, graduates have the opportunity to continue their education at KemSMU by pursuing clinical residency and PhD programs in modern fields of training highly qualified personnel.

## The most popular specialties among international students at KemSMU

- Cardiology
- Surgery
- Neurology
- Psychiatry

#### ADMISSION

To get admitted, applicants must pass competitive selection based on the results of entrance exams in biology, chemistry, physics which are conducted online in the test format in English using proctoring technologies.

The passport and academic credentials must be translated into Russian and notarized

List of documents

International students apply to KemSMU to gain fundamental medical knowledge and acquire practical skills that will allow them to become qualified doctors regardless of their future specialty.

Entrance exam preparation program

**Contacts**⊠ international@kemsma.ru

## **GENERAL MEDICINE**

Specialist's program

Language of instruction: **English \***, **Russian** 

Duration: **6 years** Tuition fee per year: **235,000 RUB** 

During the first three years the only language of instruction is English. Starting from the fourth year, students use Russian during practical classes in clinical subjects and when communicating with patients. Mastering Russian is an important part of the learning process.

Every year students undertake an internship at the healthcare organizations in the city and get their first qualification of an advanced registered nurse practitioner as early as their third year of study.

## The following plays an important role in mastering the program:

- The anatomy museum with a rich collection of unique exhibits
- The simulation center fitted with state-ofthe-art equipment
- The learning management system (LMS)

Graduates are knowledgeable about patient examination techniques and well-versed in modern diagnostic methods and treatment technologies.

#### **LEARNING RUSSIAN**

The first introductory course is offered to applicants at the stage of applying to the university.

Starting from the first year, students begin studying Russian as a foreign language systematically – they take elementary, basic and advanced courses and study medical Russian.

Training is provided by experienced teachers such as philologists who are knowledgeable about the most advanced teaching methods.

By the fourth year, students can communicate freely in Russian with patients, collect complaints, interview patients, participate in professional communication.

#### **ARRIVAL AND ACCOMMODATION**

**Kemerovo** is a cozy green city for comfortable stay and various types of extracurricular activity.

Summers are warm, the average temperature is +20-22°C, but the temperature can often reach +30°C. Winters in Kemerovo are snowy, the average temperature is -10-15°C, and sometimes there are -30°C frosts and even lower temperatures.

Kemerovo has an international airport, but sometimes it is more convenient to get by plane to the airport in the city of Novosibirsk, which has a commuter bus to Kemerovo. The fare is 1,300 RUB.

Upon arrival, students contact the **International Student Office** where they get comprehensive assistance in executing migration documents and getting health insurance.

Students are accommodated in the dormitory within walking distance of the main building. Near the campus are boulevards and parks for walking and doing sports, supermarkets and cafés, public transport stations. The accommodation fee is 1,100 RUB per month.

Tutors from among students and teachers who are group advisors help students solve social and everyday problems.

International students are actively integrated into the social environment of the university, city, and region. They get acquainted with the national culture and traditions of the peoples of Russia and the world, and participate in student creativity festivals.

#### Singh Gaurav, India

Kemerovo State Medical University gave me the opportunity to follow my dream that I was not able to accomplish in my own country, that was to be a doctor. Now it's been five years since I started my medical studies here. I really enjoy studying here and learning about the Russian culture.

#### Mahariya Sachin, India

I am Sachin, a sixth-year student, and all these years at university have been quite good for me. I decided to study exactly in this university because it is economical to study here. The only thing that is difficult for me is to bear the cold weather. Except for this, everything is completely okay and a student can easily and calmly study here.

## **PRE-UNIVERSITY TRAINING**

Pre-university Foundation Program in Russian-medium

**Subjects:** Russian language, mathematics, physics

Tuition fee 3,000 USD

#### Pre-university Foundation Program in English-medium

**Subjects:** mathematics, physics, computer science, technical drawing, technical English, Russian language

## Tuition fee 3,500 USD

MAI is a leading high-tech Russian university creating technologies that determine its tomorrow's image and training leaders able to work with them today.

Over 3,000 students are engaged in the university research.

#### **PRIORITY RESEARCH AREAS**

- Integrated Design
- Unmanned Aerial Vehicles
- Composite Materials
- Mathematical Modeling
- Artificial Intelligence, Big Data, Machine Learning, Internet of Things
- Space Systems
- Advanced Propulsion Power Plants
- Avionics
- Electric Power Engineering and Electrification of Engineering Systems
- Robotization
- Telecommunications
- Additive Technologies
- High-technology Products Service

Training for international students from more than 80 non-CIS foreign countries

#### **STUDENT ACHIEVEMENTS**

- Successful participation in various engineering and professional competitions
- Prizes in international Olympiads on programming, cyber tournaments, student hackathons, the champion's title in aeromodeling, and many other things
- Multiple gold medalists in the WorldSkills Russia championship in the Space Systems Engineering competency, winners in the Unmanned Aircraft Systems category

#### **STUDENT DESIGN BUREAUS**

MAI has five student design bureaus that implement real-life research and design projects. Nine small satellites designed by one of them successfully do their tasks in Earth's orbit.

#### UNIQUE ENVIRONMENT

- 140+ research laboratories, centers and student design bureaus
- MAI airdrome
- Mission control center
- IT center and supercomputer
- Wind tunnel
- Flight simulators
- Full-scale equipment samples
- State-of-the-art testing facilities
- Experimental pilot plant

#### ACCOMMODATION

- MAI campus is a uniquely dynamic environment that has everything you need for professional, creative and sports development
- MAI campus has nine comfortable dormitories and life amenities
- MAI dormitory fee is 90 USD per month
- Students live in 2-3 person dormitory rooms with a shared bathroom. The kitchen is on the floor
- There are over 20 cafés, canteens and buffets on campus
- Health insurance is 150 USD
- Arriving students are met at the airport. They are offered a shuttle to the dormitory

Moscow Aviation Institute enrolls more and more talented and motivated young people from all over the world.

## TAKING INTO ACCOUNT INDIVIDUAL ACHIEVEMENTS

### of Master's degree applicants

- International Olympiad "Engineering Breakthrough: Master's Degree Squared"
- Publications in the journals included in scientometric systems such as Web of Science and Scopus
- International certificate confirming the applicant's foreign language proficiency at B2 and higher levels

## **ADVANTAGES**

NSTU NETI is one of the leaders in training personnel for Industry 4.0 in such areas as nanotechnologies and neurotechnologies, autonomous transport, aircraft engineering and unmanned aerial vehicles (UAV), quantum computing, additive manufacturing (3D printing), cybersecurity, industrial electronics.

- NSTU NETI is ranked among the Top 10 Russian universities in the Global Employability University Rankings. **More than 80%** graduates get employed right after graduation.
- Every year NSTU NETI scientists and engineers create around 200 developments in the field of new materials, electronics, power engineering, and IT.
- NSTU NETI participates in the strategic academic leadership program "**Priority 2030**" in the Territorial and Sectoral Leadership track.

Education in NSTU NETI is based on the philosophy of practical project-based learning (learning by doing).

NSTU NETI cooperates with 92 partner universities from 23 countries.

## Assistance in adaptation to the university and city

## The Interclub volunteers:

- meet international students at the airport or railway station
- help check in at the dormitory
- support students when they get primary migration registration and health insurance
- accompany students when they go to museums, on tours, and to exhibitions
- organize and hold events and meetings for international students both within the walls of NSTU NETI and outside it

## Midurshan Vishvanathan, Sri Lanka

It was very interesting for me to get acquainted with Russia. I always wanted to look at snow, but it was the weather and my ignorance of the Russian language that made it hard for me to adapt in the beginning. I tried to make friends at once and communicate more with Russianspeaking guys.

I always feel comfortable. There are another 4 international students in my group. Our teachers often meet us halfway. I really like Novosibirsk, I walk a good deal, and I especially like going to the Ob Sea shore.

- The clinic
- Culture and Recreation Center including a theater studio, a video studio, a vocal studio, KVN team (a famous Russian team comedy competition), fine arts studio, various style dance studios, etc.
- Volunteering center

## Arya Naradi Iswara, Indonesia

I went to study in Russia under the intergovernmental agreement between the Russian Federation and Indonesia. In the beginning, I studied at the university's Russian Language Center, and only then I entered PGUPS and became a firstyear student. Studying was interesting and difficult. If I had any questions or difficulties, I was helped not only by the students but also by the teachers.

I graduated from the university in 2022. I studied at the Faculty of Transport Construction, and my specialization was Construction of Railways, Bridges and Transport Tunnels.

Don't be afraid of anything, come here, the university is always waiting for you!

## SECURITY

PGUPS cares about student security. All university buildings, including the dormitories, are guarded by the security team 24/7 and equipped with video surveillance systems.

Most international students are sought after by oil and gas companies all over the world.

## ARRIVAL

Visitors are taken from the airport to the city by

🗣 Aeroexpress trains 300 – 400 RUB

 **Taxi** – 1,000 RUB

Metro is the fastest and the most comfortable transport in the city. The fare is 60 RUB per trip.

It is easy to get to the university, so students arriving in Moscow are met at the university at the address: **65, Leninsky Prospekt, bld. 1, Moscow**. The Akademicheskaya metro station.

Upon arrival, foreign citizens receive comprehensive visa support, but they must get health insurance themselves.

All foreign students are accommodated in the university campus – the comfortable dormitories. Each room accommodates 2-3 persons. The accommodation fee is around 20,000 RUB per year.

**The Week of National Cultures** is an annual event aiming to improve the relationship between the university's ethnic groups. The program includes a photo show of the unique sights of various nations, a quest game, the Guess a Movie contest, an exhibition of national costumes, national cuisines, and a gala concert.

## CAMPUS

- 5 dormitory buildings, over 4,000 places
- A gym, a skiing center, a football field with workout areas, basketball and volleyball courts
- Dance, instrumental, drama studios, a chess club, a movie club, an art studio and a recording studio

## INTERNATIONAL FRIENDSHIP CLUB

The social youth organization familiarizes students with the culture and creativity of various peoples in Russia and foreign countries. The Club works with 22 fellow countrymen associations established at the university. At the beginning of an academic year, they find "their" guys on the list of enrollees and help first-year students adapt to the university and Russia.

Founded in 1906

13 Bachelor's. Specialist's, Master's programs

59 residency programs

students

6 PhD programs

2,700 residents and PhD students

11,500 students pursuing advanced training programs

1,256 10,000 international students: Bachelor's, Specialist's, 13,000 Master's, residency, PhD programs, school students preparatory participating in predepartment university training

Pirogov RNRMU is a leading medical university in the Russian Federation that trains physicians, pharmacists, clinical psychologists, social workers, and research staff.

Training is provided at the university clinics established at the leading medical centers in Moscow and at the clinical departments that are a part of the university.

RNRMU is the only Russian medical university that was assigned a category of National Research University.

Students take an active part in the university research. The university organized the Student Scientific Society (SSS).

## ADVANTAGES

- Training of unique medical research staff in the following specialties:
  - medical biochemistry
  - medical cybernetics
  - medical biophysics
- The university is establishing a reference center for world-class preclinical translational studies
- Multidisciplinary accreditation and simulation center
  - Multidisciplinary training of medical professionals in the healthcare system using simulation equipment under the higher and continuing professional education programs
  - Preparation and implementation of primary and primary specialized accreditation of the healthcare system specialists
  - Development of scientific and methodological approaches to introduce the procedure for accrediting healthcare professionals in Russia, development of evaluation tools for accrediting healthcare professionals, training of accreditation board members, analysis and interpretation of the accreditation results to improve the quality of education and develop the continuing medical education system

#### ADMISSION

Foreign citizens, stateless persons, and compatriots living abroad are admitted to the university as part of the enrollment campaign within the established deadlines:

- based on the results of the Unified State Exams or the university's internal entrance exams
- based on the referral from the Ministry of Science and Higher Education

To get into RNRMU, foreign citizens should:

- Prepare the right package of documents
- Pass entrance exams (Pirogov RNRMU's internal entrance tests) or submit the USE results

Applicants prepare for their exams independently – the university website has the **sample test section**. The sample questions are taken from the real and current database of questions.

## APPLICANT GUIDE Application dates for the academic year 2023-2024

Degree level	Admission start date	Admission end date	Exams	Academic year start date
Bachelor's, Specialist's degree Russian-taught programs	June 20	July 10	July 11-25	September 1
English-taught programs	June 20	October 15	as soon as the documents are submitted, but not earlier than July 11	November 1
Master's degree	June 20	July 20	July 21-25	September 1
Residency	July 4	August 6	August 10-15	September 1
PhD degree	June 20	August 26	August 30 - September 15	October 1

#### **DOCUMENTS REQUIRED FOR ADMISSION**

- Application
- Passport or any other document confirming identity
- Visa (for citizens of countries that maintain a visa regime of entry and stay in the territory of the Russian Federation)
- Academic credential. The foreign academic credential is:
  - for admission to the first year of study the document confirming at least secondary general education or secondary vocational education
  - for admission to Master's programs the document confirming a higher education degree of any level) recognized in the Russian Federation
  - for admission to Residency programs the document confirming at least higher education (Specialist's degree, Master's degree) recognized in the Russian Federation
- Certificate of foreign education recognition in the territory of the Russian Federation if such a certificate is required when submitting the document issued in a foreign state

- Referral from the Ministry of Science and Higher Education to study within the quota established by the Russian Federation Government (if any)
- Copy of medical certificate confirming the absence of medical contraindications to studying, Fluorography picture, HIV, HBs, HCV tests
- Voluntary health insurance policy which is valid in the territory of the Russian Federation
- Notarized translation of all foreign documents into Russian

Tuition fees per year

Bachelor's and Specialist's programs 300,000 – 500,000 RUB

Master's programs 250,000 – 340,000 RUB

Residency programs 480,000 – 600,000 RUB

PhD programs 375,000 – 405,000 RUB

#### **PREPARATORY DEPARTMENT**

Every year the preparatory courses of our university bring together attendees from more than 30 countries.

They study the Russian language, physics, chemistry, and biology.

Tuition fee 160,000 RUB crash course 320,000 RUB complete course

#### ACCOMMODATION

International students live together in one dormitory building. It is located within walking distance of the main university building and the nearest metro station.

The comfortable dormitory has everything you need, including an ensuite bathroom, a kitchen, and self-study rooms. In winter, the dormitory is heated.

#### ADAPTATION

**Tutor movement** helps first-year students adapt.

- **Group tutors** always keep in touch with students and help them solve any problems that arise
- Academic tutors help master academic disciplines

#### **AVERAGE EXPENSES**

- Accommodation costs
   25,000 30,000 RUB per month
- Travel using a student's social card costs **850 RUB** per month
- The dormitory fee is around **2,150 RUB** per month

#### EMBEDDED DATA PROCESSING AND CONTROL SYSTEMS

#### Master's program in English 😹

Two-year research Exchange semester Summer internship

Embedded computer systems are a mass high-technology market of information and computer technologies, the most competitive area of cutting-edge R&D.

You can find embedded systems everywhere: from smartphones to cars, from aircraft and spacecraft to medical equipment, from smart house to intelligent transportation systems.

## Students usually choose project themes in the following research areas:

- Communications protocols of airborne equipment
- System modeling and checking
- Embedded systems design
- Embedded systems software development
- Airborne equipment analysis and upgrade
- Video processing
- Heterogeneous computing

#### Liang Heshan, China

"

The friendly environment prevails between students in our university. The teachers are professionals in their field, they are responsible and attentive to us. The university has a student volunteer organization called SCOM, one of the tasks of which is to help foreign students to adapt, you can ask them any question: they will help with translation if something is not clear, they will give advice when problems arise: SCOM organizes interesting events to let us better know the city and Russian culture in whole. There are conversation clubs in different languages, in which you may not only get live communication and spoken language practice, but also learn something about the culture and mentality of other countries.

# "

#### Ibrahim Caba, Côte d'Ivoire

Studying at Saint Petersburg State University of Aerospace Instrumentation was the best experience in my university life. I earned a Bachelor's degree in technical operation of aircraft electrical systems and attitude and heading reference systems.

After graduation from SUAI, I entered École nationale de l'aviation civile (Toulouse, France), the first aviation school in Europe. It's where I undertake a study placement to earn a degree in civil aviation engineering in the field of avionics.

SUAI gave me the skills and knowledge I needed to progress in the field of international aeronautics. The university teachers and administration get on very well with students. The university does its best to help students succeed!

I can recommend SUAI, and this major, in particular, to everyone who wants to build an aeronautics career.

# "

#### Chan Dyk Dai, Vietnam

SUAI is a good university. All teachers and staff members are always ready to be contacted. They always help us and explain the material in detail during classes. Lectures are interesting. We can thoroughly master subjects by studying theory and conducting research in stateof-the-art laboratories.

Saint Petersburg, Russia

NWSMU named after I.I. Mechnikov is one of the leading medical universities in Russia and Saint Petersburg. The university was founded as a result of the merger of St. Petersburg Medical Academy of Postgraduate Education and St. Petersburg State Medical Academy named after I. I. Mechnikov, inheriting rich history, culture and traditions of the two oldest medical institutions in Russia.

### The international attendee from Lebanon

I came to Russia in November, and I've been living in Saint Petersburg since that time. I knew that NWSMU named after I. I. Mechnikov is a very good university, and my friends recommended it. I really like the city and the university itself – I was impressed by its beauty and the number of departments.

#### **PREPARATORY DEPARTMENT**

#### There are two study programs:

- University entrance preparation
- Russian for foreign postgraduate applicants

**Duration:** November 1 – August 31 (including vacation)

#### **Course registration: September**

#### The first-year student majoring in General Medicine for foreign citizens

"

I was preparing for admission to this university right from the beginning, and I chose it because of its high level of teaching and ranking positions. The teachers devote a lot of time to their students. I am happy to study here!

# The first-year student majoring in General Medicine for foreign citizens

This university is one of the oldest in Russia. It has a good reputation both in Russia and abroad. The classical system of teaching combines theory and practice. The teachers help their students throughout the entire educational process.

#### FIELDS OF STUDY

#### **Bachelor's programs**

- Nursing: 4 years of study, full-time
- Nursing: 4.5 years of study, part-time

#### Specialist's programs

- General Medicine: 6 years of study, full-time
- General Medicine in 🗮 English for foreign citizens (English as Medium of Instruction): 6 years of study, full-time
- Pediatrics: 6 years of study, full-time
- Preventive Medicine: 6 years of study, full-time
- Dentistry: 5 years of study, full-time
- Osteopathy: 5 years of study, full-time. The first Specialist's program in Osteopathy in Russia

#### Master's programs

• Public Health: 2 years of study, full-time

As well as more than 70 residency specialties.

#### **ARRIVAL AND ADAPTATION**

Before students arrive in Russia, the University Department of Visa Support and Migration Registration prepares required documents for issuing invitations. Then the department staff members support students in solving migration registration issues such as registration, extension of stay, preparation of documents for departure.

International students are accommodated in the dormitory on campus.

#### STUDENT ORGANIZATIONS

- International Student Council. You can always seek assistance here. It mainly focuses on friendship, harmony and mutual aid between representatives of different countries and peoples at the university
- University student council
- Primary student trade union organization
- Councils of students living in the dormitories
- Group presidents
- Education quality committee
- Tutors
- Volunteer center
- Medical brigades
- Music and Art Club
- Student choir
- The Husky sports club
